Back-Up Alarms

Standard—Compact alarms provide a cost-effective warning solution with exceptional durability and protection against moisture, dust, and vibration.

Self-Grounding—Eliminates potential corrosion points. Epoxy sealed from moisture, dust, and vibration.

Self-Adjusting—Constantly measures ambient noise and adjusts sound level. Eliminates the need for constant manual adjustment and helps prevent intentional alarm disconnection.

Tailgate Spreaders

36RM29

49XE21

9VPY0

Connect to trucks, utility vehicles, tractors, and other vehicles. Integrated steel augers. Sealed, heavy-duty 12V electric drive motors and transmissions. Rustproof spinners.

Pelletized Ice Melt, Seed, and Fertilizers—Has 20-ft. insulated harness with On/Off switch and a manual flow gate with 10-ft. cable to adjust the flow rate.

Rock Salt and Nonpelletized Ice Melt—2FGV4 has 20-ft. insulated harness with On/Off switch, manual flow gate with 10-ft. cable for adjusting flow rate, and a feed auger. 49XE20 has digital, variable-speed controller that allows easy control of spread width. Includes polyethylene lid. 36RM29 and 36RM31 are prewired for an optional vibrator kit (sold separately). 36RM31 includes variable-speed controller for adjusting flow rate.

Sand/Salt or Bulk Salt—Dual variable-speed controls adjust flow rate and spread width independently. Top screen stops rocks or large chunks from getting jammed in the auger. Built-in vibrator can be turned off and on. Mounting kit with straps included, except 49XE27 (mount is available separately). Material stays dry and safe while driving: 49XE21, 9X603, 9VPY0, 36RM30, and 36RM32 have a fitted hard lid; 4CAD4 has a fitted tarp. 36RM34 has a dual-action polymer lid.

Truck Boxes

- Fully weather resistant
- Powder-coated finish
- Tamper-Resistant Lock

Keep expensive tools safe and prevent them from sliding around your truck bed. Choose from a selection of boxes including crossover truck boxes, chests boxes, wheel well boxes, lo-side boxes, and hi-side boxes.

Trailer Tongue Boxes

Rugged, dent-resistant construction with a rust-resistant finish. 55CH83 features an offset, gas spring lid lift to ease access from the driver's side. The deep recessed hinge allows the box to fully open when mounted against a rail or trailer. 55AG06 zinc-plated hasp resists corrosion and fits standard padlocks.

Trailer Ball Mounts

To select the correct ball mount you must be sure the total weight of the trailer and its cargo does not exceed the weight capacity of your vehicle.

Ball Mounts attach to the hitch of the tow vehicle and connect to the trailer coupler. If a trailer rides lower or higher than the tow vehicle, a ball mount can be used to make up the difference in height, so they are level for towing.

Ball Mounts with Hitch Ball have multiple trailer balls with different diameters on one shank. Easily switch between ball sizes for different towing jobs, without having to purchase multiple ball mounts.

Pintle Hooks & Hitches

20PV21

2ZPV5

6ZAP1

30PD48

Pintle hooks are paired with lunette rings to create pintle hitches. These hitches allow for flexibility or swivel motion during towing, making them ideal for heavy-duty or off-road towing on rough terrain.

Air Compensated Pintle Hooks absorb shock and reduce movement between towing parts for less wear and tear.

Mounting Plates allow changing the mounting position to accommodate various trailer heights and ensure trailers are level for transport.

REESE™ Master Lock California Immobilizer Buyers PRODUCTS COMPANY

Trailer/Truck Security Devices

Receiver Locks—Attach to trailer hitch receivers to prevent theft. Bent pin style have lock mounted on a bent pin. Dogbone and barbell style have a straight pin.

Coupler Locks—Attach to trailer coupler to prevent theft whether trailer is attached or unattached to tow vehicle.

King Pin Locks— Keep fifth wheel trailers secure and prevent theft. Locks fit over the king pin.

Lunette Ring Lock—Provides security for trailers that have lunette rings. Separate padlock is required.

Pintle Lock—Solid steel plate covers the pintle ring and eliminates access to the hitch without a key.

Pintle Lock Ring	3 in	Powder Coated Black	(2) Keys	Push Lock Mechanism	California Immobilizer	**39C437**

Trailer Couplers

Straight-Tongue—Bolt onto trailer tongues for towing. Attach to hitch balls and lock with latches for security.

A-Frame—Couplers are welded onto A-shaped tongues and have latches for secure hookups and disconnections. Commonly used when trailers or campers will be jack supported.

Adjustable—Attach to hitch balls with cam locking pins. Height can be adjusted to ensure proper trailer level for towing.

Gooseneck—Have a self-centering lock plate that fits over hitch balls to engage tow vehicles. Locking handles are accessible from any angle and height can be easily adjusted.

Plastic Pull-Tight 2YJT4

Pull-Tight Seals

Pull-tight seals are adjustable-length single-use security seals that wrap around handles and latches in shipping containers, trailers, cargo holds, and trucks and snap closed. **Plastic pull-tight seals** can be removed with light tools or by using heavy force. **Plastic tearaway pull-tight seals** don't require a light tool or heavy force to remove.

Plastic Tearaway 49AH62

Strap Seals

Seals are fixed-length single-use security seals that wrap around handles and latches in shipping containers, trailers, cargo holds, and trucks and snap closed in one locking position. **Plastic tearaway strap seals** don't require a light tool or heavy force to remove. **Plastic strap seals** can be removed with light tools or by using heavy force. **Metal strap seals** are stronger and more durable than plastic seals, so they provide a higher level of protection and can be removed with light tools.

Bolt Seals

Seals have a bolt that passes through a container or door latch on cargo freight, rail cars, and shipping containers and a cap that snaps on to lock it. Also known as disposable padlocks, these barrier seals require a tool, such as bolt cutter, to remove them.

Heated LED Rectangular Headlights

LED headlights have a thermally conductive grid that deices lenses in response to the ambient temperature, to help improve visibility without requiring action by the driver. Headlights feature improved light output, glare reduction, and light placement to meet the demands of on-road trucking. The tough, die-cast housing offers protection from salt spray for efficient thermal management.

Portable Searchlights

GOLIGHT

- Horizontal axis rotation: 370°
- Vertical axis rotation: 135°

Powerful lights are designed to provide intense illumination for automotive, first responder, work truck, marine, military, and outdoor applications. They are UV- and saltwater-resistant. Remote control and mounting options include wireless handheld (H/H) or dash-mount, hardwired dash-mount, and handheld portable wired remote. Mounted searchlights are available with permanent mounting or portable magnetic-mount.

Portable Canopies, Shelters, and Tent

- UV blocking

CANOPIES (TOP AND FRAME)

Instant Canopies—Heights for skus 11C555, 11C554, and 22EC65 adjust in 3⅛" increments, up to 1 ft. Water, flame, and mildew resistant. Optional Side Wall Kits are sold separately. Optional Combination Door, Side Walls, and Floor Kit is available for skus 5NY99 and 11C555. Skus 5NY99 and 5DFL9 include roller bag and anchor kit. 5DFL9 has reflective tape located at key points for higher visibility in low-light conditions. Can be used as an emergency shelter. Optional Solid Wall Kit is sold separately.

Multiuse Canopies—Powder-coated steel frames. Optional Solid Wall Kits for skus 11C539 and 11C541 are sold separately. 11C543 has 8 legs and 2" dia., 20-ga. frame. 11C544 has 10 legs and 2" dia., 20-ga. frame.

Event Canopy—Easy-to-set-up canopy has 2" powder-coated steel frame. Includes 8 white leg covers, 8 foot pads, and elastic ball straps to secure the top/cover to the frame system.

SHELTERS (INCLUDE WALLS)

Peak-Top 11C547—Has a powder-coated steel frame. Includes roof cover, bungees, 6 foot pads, and 6 stakes.

Peak-Top 4XMA6—Features strong, commercial-grade aluminum frame with twist-lock button sliders that lock the frame in place. Includes a heavy-duty 500-denier polyester top and a double-handled roller bag for easy portability.

Peak-Top 11C540—Has a white drawstring cover, 8 legs, and a wall kit with 2 solid and zippered end walls and 2 sidewalls with screened windows. Zippered door is 7.5 ft. W x 6.5 ft. H.

Peak-Top, Heavy-Duty 11C542—8-leg A-frame design has interchangeable corner brackets. Features 4-pc. roof truss system that doubles the roof load capacity to a maximum of 3800 lb. Includes bungees, 8 foot pads, 8 stakes, and reinforced wire. Each of the 2 sidewalls contain 3 windows with roll-up window covers. Front and rear door walls have dual zippers and can be rolled up and secured with hook-and-loop straps. When side and end walls are not in use, 4 valances can be attached for a more decorative look.

Dome-Top 11C546—Sheds snow and has extra-long walls to protect vehicles and other contents year-round. Front wall has double-zippered, 6.5 ft. W x 6.5 ft. H door. Includes bungees, buckles, 4 brackets, and 8 stakes.

PARTY TENT

Spring-lock powder-coated steel tube frame is easy to assemble; adjustable feet let you set up on uneven ground. Front and back roll-up doors and zippered side doors provide easy access. Vented roof and roll-up windows permit free air circulation. Large windows let in plenty of light. Side wall can be raised to create more space or a sun block, using included 3-pc. side tubing, 3 ropes, and 3 helix pegs. Includes wheeled carry bag for easy transport.

SIDE WALL KITS

Attach to canopies to create shelters.

COMBINATION DOOR, SIDE WALLS, AND FLOOR KIT

Tub-style floor prevents water and pests from entering. Fast, easy clip system attaches to the inside top frame and legs of the canopy. Side walls have nylon zippered screen windows for ventilation. Cover of screened door can be rolled up for additional ventilation. Door features YBS zippers. Includes carrying bag and stakes.

Portable Gas and Diesel Generators

Dayton

- Electric-start models include dry battery
- 2-yr. warranty
- For outdoor use only
- CARB compliant

Maintenance-free, brushless alternator provides high-quality power (5 to 6% total harmonic distortion) and extended life. High amp surge capacity is ideal for starting high amp tools. Quiet muffler reduces engine noise. Low oil shut-off protection. All models except 2ZRP6 include wheel kits. Skus 2ZRP8, 2ZRP9, and 6FYA4 include hour meter and idle control. All models are CSA Listed.

Economy Series 60NP39

Deluxe Series 60NP43

Industrial Series 60NP40

Portable Gas Generators

HONDA GENERATORS

- 3-yr. residential and commercial warranty
- For outdoor use only
- CARB compliant

Powerful commercial-grade OHV engine runs on regular gasoline—no need to mix with oil. Cast-iron cylinder sleeve for added engine durability. Oil Alert feature automatically shuts down engine if oil pressure reaches an unsafe level. 120/240V selector switch allows full generator wattage through the 120V outlets to power equipment requiring high initial startup. Full frame protection with isolation mounts for added durability. USDA-qualified spark arrestor/muffler.

Economy Series—Digital Automatic Voltage Regulator (DAVR) technology maintains voltage stability within ±1% to protect equipment being powered. All circuits have overload protection.

Deluxe Series—Voltage fluctuations are minimized by the iAVR power feature, which also allows high-amp-load starts with up to 10-sec. voltage increase above the maximum rating. Electric start (battery included) with recoil start backup. Include reinforced standing legs, lockable folding handles, and wheel kit.

Industrial Series—They feature an Eco Throttle technology to help increase fuel efficiency and boost run times, making units lighter while still able to produce the same power as most competitive models. iAVR power feature minimizes voltage fluctuations and increases voltage above the maximum rating for up to 10 sec.; allows starting of high-amp-load applications. Circuits are GFCI-protected. All include a 2-wheel kit to ease transport. Meet OSHA, CARB,and EPA Standards (except 60NP40 which meets OSHA Standards).

GP Series
4FPU3

XD Series
39FY95

GENERAC

Portable Gas and Diesel Generators

- Electric-start models include battery (except XD Series)
- For outdoor use only

GP Series—All models offer circuit breaker-protected outlets and never-flat wheels. Low-tone mufflers for quiet operation. 2-yr. limited residential warranty, except 493T13 and 53PD02 that have a 3-yr. limited warranty. COsense® feature on the OHV engine shuts off and warns user when Carbon Monoxide builds up and low-oil level shutdown protects the engine. 4FPU2 and 4FPU3 feature idle control and include lifting eye and wheel kit.

XD Series—Yanmar LW Series direct-injection diesel engine is more-efficient than gasoline engines and offers long service life; low oil shutdown helps protect against dry-run damage. TruePower provides less than 6% total harmonic distortion for clean power. Durable welded steel frame has a lifting eye for easy transport. 2-year limited residential and commercial warranty.

HONDA GENERATORS

Portable Gas Inverter Generators

- CARB compliant
- Capable of parallel operations
- 3-yr. residential and commercial warranty, except 60NP32 has a 1-yr. commercial, 2-yr. residential warranty
- For outdoor use only
- Accessories available on Grainger.com

Super Quiet Series generators have a powerful commercial-grade OHV engine that runs on regular gasoline—no need to mix with oil. The Oil Alert feature automatically shuts down engine if oil pressure reaches an unsafe level. Eco-Throttle system increases fuel efficiency by allowing engine to run only as fast as needed for the load. Totally enclosed body helps reduce noise.

Portable Gas Inverter Generators

GENERAC

- PowerDial control integrates Start, Run, and Stop functions
- All are CARB compliant, except 599D42
- 599D42 meets EPA standards
- Smart Parallel Kit available on Grainger.com

iQ Series Inverter Generator features a Smart LED dashboard that shows fuel level, remaining runtime, wattage usage, and generator status. Economy Mode operation saves fuel and reduces noise. **GP Series** Inverter Generators are perfect for all applications from job sites to tailgating. Lightweight for easy transportation. Idle control automatically adjusts engine speed to save fuel and reduce sound emissions. Integrated USB ports make charging mobile devices easy and LED indicators alert you of low oil, overload, and ready-to-use.

Use a Smart Parallel Kit (sold separately) to connect 2 generators directly through the 120V outlets for double the power.

Portable Generator Accessory Installation Guide

To eliminate the risk of backfeeding the electrical utility during a power outage, isolate the circuits using generator power from the rest of the building. The National Electrical Code (NFPA 70, Article 702.6) mandates that a transfer switch be installed with all standby power systems, including portable generators. Select the circuits most needed during an outage and connect them to the transfer switch in combination with appropriate power inlet boxes and cords.

NOTE: Generac, Reliance, and Square D generator accessories, including transfer switches, power inlet boxes, cords, and panels are available on Grainger.com.

Bundled
49LX92

Unbundled
49LX83

GENERAC

Guardian Series Air-Cooled Automatic Standby Generators

- 5-yr. limited warranty, except 49LX85 has a 3-yr. limited warranty
- CARB compliant
- See Grainger.com for accessories

Aluminum enclosure protects against severe weather and corrosion. Fire rating allows for installation as close as 18" to building structures. Toolless fuel conversion provides easy switching between natural gas and LP fuels. New base eliminates sinking and allows unit to be placed directly on ground (increasing surface area by 9X). WiFi comes standard on all units for constant monitoring and instant response if service is needed. Bundled unit 49LX85 comes with a 50A, 8-circuit transfer switch. Bundled unit 55KE64 includes a 100A, 16-circuit transfer switch. Bundled unit 49LX92 comes with a 200A, whole house transfer switch. Unbundled unit 55KE62, 49LX83, and 411G60 do not include a transfer switch.

Note: Transfer Switches (RTS Series) are necessary for operation. For accessories, transfer switches, and larger QT Series Air-Cooled Automatic Standby Generators, see Grainger.com

Pro TIP

Generator Sizing Guidelines

To start an electric motor, a generator requires **2 to 3 times** its nameplate amperage or wattage. If the electrical current demand on the generator is of long duration, **the system can overload.** As a preventative measure, **there are five steps to selecting the right size generator:**

1. Calculate total wattages of all appliances to be operated at once
2. Determine volt-amperes (wattage) requirement of motor
3. Find total watts and VA to get total requirements
4. To allow for anticipated future needs, add 25% to Step 3 total
5. Refer to data charts for the unit that meets your total load criteria

For further details read the full article, "Generator Sizing Guidelines" at **grainger.com/generator-sizing**

GENERAC

Protector Series Liquid-Cooled Automatic Standby Generators

Quiet-running generators with aluminum housing feature improved water ingress protection and electric connections to stand up to severe weather conditions. Options for additional features help address individual applications, such as advanced controls for instant monitoring. Include oil drain extension, radiator drain extension, battery charge alternator, flex fuel line, and fan/belt guards.

Note: Transfer Switches (RTS Series) are necessary for operation. For accessories, transfer switches, and larger QT Series Liquid-Cooled Automatic Standby Generators, see Grainger.com

XR550 Professional Series 12V872

Gasoline Engines

BRIGGS&STRATTON

Rotation is CCW. Mixer engine 12V818 features internal gear box with 6:1 reduction. For outdoor use only; not designed for recreational vehicle use.

XR550 Professional Series—Dura-Bore cast-iron sleeve withstands wear and abuse. 12V872 is 4000 rpm; 12V817 is 3600 rpm; and 12V818 is 3600 rpm.

900 Series—OHV design with Dura-Bore cast-iron sleeve and Dual-Clean air cleaner. 3800 rpm.

CR950 Series—Features reliable performance with cast-iron Dura-Bore sleeve, Magnetron Electronic Ignition, and dual ball bearing. 3300 rpm.

XR1450 Professional Series—Provides high performance and extended durability with OHV design and Dura-Bore cast-iron sleeve. 3750 rpm.

XR2100 Professional Series—3600 rpm engine designed for frequent use in demanding work environments. Features 21 gross torque (ft.-lb.), cast-iron sleeve, and pleated paper air filter. 3600 rpm.

725EXi Series—Walk-behind mower engine allows you to never change the oil. Just check oil and add. Features larger angled fuel neck and tool-less access to air cleaner for easy maintenance. ReadyStart starting system requires no prime and no choke. 3200 rpm.

Commercial V-Twin Series—5-step debris management system has chopping fan shreds debris and reduces oil temperature. Features oil pump, cast-iron sleeve, electronic ignition, cyclonic air filter, OHV design, and automotive-style starting with EFM. 27.0 gross HP, 3600 rpm.

Vanguard Vertical Series—Features float feed carburetor, Dual-Clean air cleaner, and Dura-Bore cast-iron cylinder sleeve. 18.0 gross HP, 3600 rpm.

KOHLER®

Gasoline and Diesel Engines

Command PRO 6VMW2

For outdoor use only; not designed for recreational vehicle use.

COURAGE UTILITY GASOLINE ENGINE
- CARB compliant

Single-cylinder OHV model with cast-iron cylinder liner and in-line fuel filter. Engine oil can be added or drained from either side of the engine. 3600 rpm.

COMMAND PRO GASOLINE ENGINES

Feature electronic ignition, hardened crankshaft journals, and a self-relieving choke carburetor. EPA compliant.

6.6 to 7.7 Gross Torque—4-cycle, OHV engine. Cast-iron cylinder liner, aluminum block. 3600 rpm. Pleated paper encased filter with perforated metal/foam precleaner.

9.2 to 20.4 Gross Torque—Single cylinder, OHV engine. 16X887, 11M961, 11M962, and 11M963 are 4000 rpm. 11Z373 and 6VMW2 are 3600 rpm. All have low-oil shutdown feature. Pleated paper encased filter with perforated metal/foam precleaner.
- CARB compliant

27.7 to 51.1 Gross Torque—V-twin cylinder, OHV engine. 3600 rpm. Dual-element air filter, except 24TM20 and 24TM21 have heavy-duty canister-style filters.

DIESEL FOUR-STROKE ENGINE
- Tier 4

Features direct fuel injection, fuel filter, full-pressure lubrication, and a reborable cast-iron cylinder liner. Offers a single cylinder with an internal oil filter, electronic shutdown fuel valve, control panel, and counterbalanced crankshaft. 3600 rpm.

HONDA ENGINES

GX Series Gasoline Engines

270cc 23PF68

- Horizontal shaft
- Dual-element air cleaner
- CARB compliant
- 3-yr. warranty

Overhead Valve (OHV) commercial-grade engines offer greater fuel efficiency, automatic mechanical decompression system, and precise intake and exhaust control to ensure fast and reliable starts. Ball bearing-supported crank shaft and cast-iron cylinder sleeve provide greater durability and long life. Oil alert system helps prevent engine damage due to inadequate oil. 23PF75 features a Cyclone Air Cleaner system that decreases the service intervals for air filter maintenance.

Commercial-Duty Zero-Turn Mowers

ARIENS

ZERO-TURN MOWERS

A wide cutting width and high-performance engines propel these mowers to finish large jobs quickly. Fully welded steel frames with side discharge.

Edge—This mower has a 660cc Kohler 6000 series engine and foot-operated deck lift. Features durable 34" stamped deck constructed of 12-gauge steel. High-back seat with springs with sealed ball bearings.

IKON XD—Commercial-grade mower has fully fabricated and foot-operated welded deck. Features 726 cc Kawasaki FR691 engine. Hydro-Gear EZT transaxles offer increased torque and load capacity. Two independent steering levers for easy manuverability. Padded high-back seat with arm rests and large tires. Dial-operated cut height with 13 cutting positions.

DEWALT EGO greenworks ECHO

Battery-Powered Walk-Behind Mowers

- Lithium-Ion battery

EGO—Rechargeable electric mowers give you the power of a gas engine, without the noise or fumes of gasoline, and with the freedom of movement of cordless. 45-min. of cutting time on a single charge. LED headlights let you mow any time of day. Easy push-button starting. Folds flat for easy cleaning and storage.

Greenworks Pro—Designed with Smart Cut technology to improve performance and extend run time. Digitally controlled brushless motor provides greater efficiency and higher performance.

Walk-Behind Mowers

HONDA Power Equipment

Mulching discharge option leaves fine clippings on the lawn to retain moisture and provide nutrients while reducing removal time and expense.

MicroCut twin-blade system uses 4 cutting surfaces to make ultrafine clippings for superior mulching and bagging. Offers 8 mowing heights. Roto-Stop blade stop lets you step away from the mower to empty the bag or clear items out of the way without stopping and restarting the engine.

Self-propelled, hydrostatic cruise control transmission offers precise speed control from 2 to 4 mph, to change and maintain the right speed for mowing conditions. Rugged, 16-ga. heavy-duty steel deck with front bumper and edge guards.

Battery-Powered String Trimmers

These powerful trimmers help you make short work of thick brush, without the noise, fumes, or expense of gas-powered models. Include 0.08"-dia. cutting line, but can be used with larger diameter line, as well. Line length can be easily adjusted via an integral bump feed. Higher amperage provides longer run times.

Note: For accessories including Batteries, Charger, Trimmer Spools, Trimmer Strap, and Trimmer Lines, see Grainger.com.

Gas-Powered Brush Cutters and Mowers

Note: For accessories including Brush Blades and Trimmer Line, see Grainger.com.

HANDHELD

Makita—Features a fuel-efficient engine with automatic decompression for quick-and-easy starting. Oil fill port and drain plug are easy to access. Includes shoulder harness and brush cutter blade.

ECHO—Each brush cutter has bicycle-style "U" handle for control and easy access to the throttle and stop switch. Commercial-grade cutting heads with blade conversion kits, making them blade convertible. 447P92 features Speed-Feed cutting heads and flex cable drive shafts, is extremely lightweight and has a toolless adjusting U-handle that folds for storage. Brush blades sold separately for both mowers.

WALK BEHIND

Billy Goat—Cuts through weeds over 6 ft. tall, as well as saplings. Features 3-speed transaxle with reverse, reinforced blade spindle, and protected rear-mounted clutch and steel plow-style handles. Angled rear discharge deck eliminates packing and wind rows.

Gas-Powered Blowers

ECHO—Feature rotational control to help reduce operator fatigue. 44X133 has rubber top-handle grip with secondary handles for all-position operation and flared-end pipe for moving heavy or wet debris. 425W09 has a curved blower tube and shoulder harness attachment that helps reduce user fatigue. Easy access variable cruise control button located on curved handle. 44X141 is a combination blower, shredder/mulcher, and vacuum. 4-blade shredding mechanism provides 12:1 debris reduction. Includes 35"L intake tube for longer reach and zippered collection bag. 44X133 and 44X141 are CARB and EPA compliant. 425W09 is CARB compliant.

Makita—Compact and lightweight model features a commercial-duty engine with variable speed control. Fuel system oil mix to gasoline is not required. Automatic engine decompression allows quicker and easier starts.

Gas- and Battery-Powered Backpack Blowers

ECHO—Engines offer cruise control. Blowers allow wide-angle tube rotation for optimum mobility. Padded backrest and shoulder straps help minimize fatigue. L-style frame helps reduce impact damage, and Posi-loc tubes provide a secure connection. 44X139 has a vented back pad that allows air circulation in hot weather.

Makita—Commercial-duty engine has decompression system for easy starts. Fuel system does not require oil to be mixed to gasoline. Compact, lightweight blower comes with adjustable joy-stick handle, wide backpack straps, and ventilated back panel. CARB Tier III and EPA Phase II compliant.

EGO—Quiet, lightweight Power Plus backpack blower has a powerful turbine fan for heavy debris-clearing power. Variable speed control and high-efficiency, brushless motor.

Greenworks—Handheld blower creates high-velocity air speeds that handle tough tasks like clearing wet, heavy leaves, grass, and stubborn debris. Designed with a brushless motor that provides power and performance. Additional features include trigger starting, variable-speed control, turbo button and cruise control. Includes battery.

Handheld Electric- and Battery-Powered Blowers

Westward Electric-Powered—Lightweight 2-speed blower/vac includes High/Low control switch and collection bag.

Makita Battery-Powered—Quieter than gas-powered blowers have zero emissions. Lightweight design provides 30 min. of continuous run time on a single charge. Kit 52YW72 includes 36V Li-ion battery and charger. Charger actively monitors current, voltage, and temperature throughout charging process to optimize battery life.

EGO Power Plus—Rechargeable blowers have a convenient, cordless design with the power to match or exceed the performance of many premium gas-powered models. Quiet operation allows use in areas with noise restrictions. Provides 1 hr. of run time on a single charge. Weather-resistant construction. Extra batteries and chargers sold separately; higher-amperage batteries provide longer run times.

DeWalt—Quiet, powerful, battery-operated blowers give you simple variable-speed operation. Ergonomically designed handles with trigger and speed control.

BILLY GOAT

Litter Vacuums

Suitable for leaf, litter, and debris removal in residential or commercial applications.

Residential/Light Commercial Duty—Feature a 5-blade serrated impeller, zipperless bottom-load mesh turf bag with fasteners for easy unloading. 12" wheels allow maneuvering in tight spaces. Clean up to 35,640 sq. ft./hr. 5NLG6 is for hard surfaces, 5NLG7 has a 1-speed transmission ideal for hilly turf applications.

5NLG7

Commercial Duty—3-speed with a 6-blade impeller. Top-fill mesh turf bag slides out on rails to ease unloading. 14" wheels allow maneuvering over uneven areas. Micro-adjustable height control allows use on turf or hard surfaces. Cleans up to 45,000 sq. ft./hr.

Industrial Duty/Hard Surface—Feature cyclonic filtration with dust sock technology to help reduce dust in dry conditions. Shift-on-the-fly hydrostatic transmission features a variety of forward and reverse speeds for operating in wide open areas and to allow maneuvering in tight spaces. 4-latch bag system is easy to operate.

SWEEPEX

Rotary Broom Sweepers

Walk-Behind Sweepers—Compact sweepers have a powerful Honda engine and an oscillating broom head, as well as 3 forward gears and 1 reverse gear, for excellent performance on a variety of surfaces. Multifunction controls for travel speed, brush speed, pressure, and brush direction. Adjustable height allows comfortable use. Fold for easy storage. Include Multipurpose Brush Kit. Additional attachments sold separately for year-round functionality, see page 992.

Brush Kits—Dirt Brush Kits get at embedded and hard-to-remove dirt. Maintenance Brush Kits are ideal for sweeping ground coverings, such as brick pavers, which require special care.

Brush Extension Kit adds 5.5" to the broom sweep path, and helps with cleaning around corners and edges.

Debris and Leaf Collection—Debris Shields help protect the user from flying debris, such as rocks, sticks, and other scraps; Debris Collectors catch the debris, and direct it into the sweep path.

Leaf Collectors push and clear leaves from entryways, sidewalks, and parking lots.

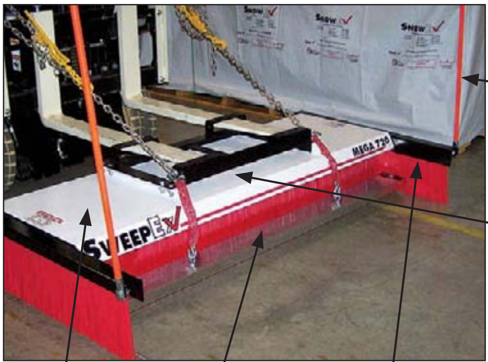
SWEEPEX



Edge Marker Kit 4CAC4

Forklift Mount 4AZZ9

Mega Series Sweeper 4AZZ7

Magnet Bar 4CAC2

Debris Containment Ends and Edge Markers 4CAC3

Sweepers—Turn forklifts into cleanup equipment. Sweepers are attached to forklift tines and are suitable for wet and dry use, indoors and outdoors. 11"L virgin polypropylene bristles are easy to rotate and change. Mega Series requires Forklift Hitch 4AZZ9 for mounting to fork tines. Replacement brushes are available on Grainger.com.

Accessory Attachments—Magnet Bars pick up nails and loose metal debris. Debris Containment Ends keep debris in front of sweeper. Edge Marker Kit allows driver to see exactly where sweeper is located. To attach the Pro and Mega Series sweepers to a skid steer unit, use 54EM87 Skid Steer Hitch with Pro Series sweepers and both 54EM87 Skid Steer Hitch and 54EM88 Adapter Plate for the Mega Series sweepers.

ARIENS

Snow Throwers and Accessories

- All snowblowers offer a powerful Ariens AX engine

Single-Stage—Lightweight, easy to maneuver, and transport. Manual chute rotation and deflector control. Foldable handle bars allow easy storage.

2-Stage Deluxe—3-blade, 14" steel impeller and auger carve out a 24" to 30"-wide path throwing snow up to 60 ft. A dual-belt auger drive continuously sustains engine power directly to the blower head, with no maintenance adjustments required. Feature a heavy-duty cast-iron gear case with alloy steel gears and L-3 severe-duty gear oil. High-performance final drive ratio ensures higher torque at wheels and provides superior traction through deep snow.

ACCESSORIES

Shear Bolt Kits—Intentionally designed to snap if the auger jams or clogs, and will rupture at the designed load limit to protect the auger gear box.

Maintenance Kit—Kit includes 32 oz. of Ariens 5W30 engine oil, replacement spark plug, fuel stabilizer granules, and a spare ignition key.

Slicer Bar Kits—Use to cut large drifts and packed snow and direct snow into the auger; rotate bars down and out-of-the-way when not needed. Can be installed without tools.

Composite Skid Shoe Kit—Nonabrasive shoe protects decorative surfaces from snow thrower damage. Kit includes 2 skid shoes and installation hardware.

Snow Thrower Covers—Water-repellent, tear- and abrasion-resistant covers can stand up to rugged environments. 6mm bungee around the edges.

Protective Floor Mat—Park snow throwers on the raised-edge mat to help contain melting snow, and to help prevent gas, oil, and rust spots and scratches.

Front Weight Kit—Adds 10 lb. to the front of Ariens snow throwers, to equalize weight distribution and hold the scraper blade closer to the ground to get a cleaner surface. Also enhances operator comfort and control.

Protective Cab—Installs quickly and easily, with no tools required, to protect against heavy snow and wind. Freeze-resistant clear windows. Does not require weight kit.

40LJ51

Snow Throwers

Electric start snow throwers offer a Briggs & Stratton engine and use synthetic oil.

Single-Stage—40LJ51 features an auger-assisted drive system with a thermal plastic urethane auger. Manual chute rotation and quick deflector.

55JK85 and 55JK86 offer quick adjust deflector, a compact size, and quick height and distance adjustment.

2-Stage—FreeHand control and reversible skid shoes provide easy control. Friction disc transmission has 5 forward and 2 reverse speeds. The dash-mounted chute control and on-panel deflector control provide easy operation. Steel skid shoes.

5TN63

Universal 2-Cycle Oil

Clean-burning formula protects against heat, corrosion, and rust. Use where different ratio mixtures are required. For engines with 25 HP or less.

Size	Mfr. Model	Item No.
15 oz	SL2261	**5TN63**

OREGON

Only One 2-Cycle Oil

Can reduce oil consumption and particulate emissions by up to 50% compared to standard oil. Mix with 1 gal. of gasoline.

Size	Mfr. Model	Item No.
1.8 oz	40092	**46C507**

45J374

ECHO

2-Cycle Engine Oil and Stabilizer

ECHO Power Blend Synthetic Oil (45J373 and 45J374) helps facilitate proper break-in and extends the life of your equipment. Red Armor 45J377 can stabilize fuel for up to 2 years. Cleans away existing engine deposits and helps protect against carbon buildup.

Size	Mfr. Model	Item No.	Pkg. Qty.
2.6 oz	6450001GE	**45J373**	6
16 oz	6450006GE	**45J374**	1
2.6 oz	6550001E	**45J377**	6

STOR-X Fuel Stabilizer

Preserves gasoline and diesel fuel up to 1 yr. Inhibits formation of varnishes, peroxides, and gums. 1 bottle treats up to 20 gal.

Size	Mfr. Model	Item No.
8 oz	402815	**3KB54**

ECOTRACTION™

Zeolite Winter Traction

- Effective in all temperatures

Safe, eco-friendly granules provide better traction than sand and resist freezing and clumping. Excellent for areas with heavy foot traffic and great for vehicles on side roads. Highly visible green particles embed into ice and snow for long-lasting traction. Will not harm people or animals if accidentally ingested and will not damage plants, grass, or concrete parking surfaces. Designed to improve soil's nutrient reservoirs, infiltration rate, aerations, and water absorption.

Size	Coverage Area	Package Type	Mfr. Model	Item No.

Premiere Liquid De-Icer

- Effective to -20°F

Nonchloride formula inhibits corrosion and won't damage carpets, floors, or shoes. Safe for vegetation. Can be used before storms to prevent ice and snow from adhering to pavement.

CHAPIN

Pretreat and De-Ice Backpack Sprayer

Internal pressure chamber provides operational pressure of 90 psi to deliver pretreatment and de-icing liquids. Poly tank has easy-fill 4" opening, built-in straining basket, and Viton O-rings and seals. Poly wand has a continuous spray feature. 2 poly and 1 brass nozzle provide stream and fan spray pattern choices.

Tank Cap.	Mfr. Model	Item No.
4 gal	61808	**11C538**

SNOWEX

Walk-Behind Electric Sprayer De-Icer

- Spray width: 3 to 4 ft.

Delivers a consistent spray pattern of any de-icing liquid from the main nozzle or alternate spray wand. 60 psi pump has On/Off switch for selective lane or spot spraying on sidewalks, stairways, and hard-to-reach areas. Has a poly tank, heavy-duty powder-coated steel frame and handle, stainless steel axle, and 13" pneumatic tires. Includes 12V battery with 110V charger.

Tank Cap.	Mfr. Model	Item No.
12 gal.	SL-80	**12A764**

CHAPIN

Push Liquid Sprayer

- Cover large areas with up to 12 gal. of liquid

Features a 24V lithium ion battery for up to 1.75 hr. of continuous spraying. Movable spraying arm/boom sprays to the front, left, or right. 6"W opening for easy filling and cleaning access. Includes 20"L extension wand with shut-off, poly tank, and powder-coated steel frame. Can be used with insecticides, herbicides, liquid ice melts, and liquid fertilizers. Operating pressure: 40 psi. Spray/flow rate: .4 to .5 gpm.

Tank Cap.	Mfr. Model	Item No.
12 gal	97902	**415J03**

Handheld and Shoulder Spreaders

Handheld broadcast spreaders feature 1-hole drop. Durable polypropylene construction resists corrosion. Shoulder spreader is ideal for areas where full-size spreaders can't go. Keeps product protected from weather. Trigger-controlled gate opening.

Push Broadcast and Drop Spreaders

Broadcast spreaders spray in a designated pattern from the unit. They can have a 'deflector' that limits the spray reducing where the output goes. 1-hole models are best for spreading finer materials such as grass seed and fertilizer. Broadcast and drop spreaders with high-output (HO) drop are best for larger granular materials such as ice melt. Drop spreaders drop the product directly below the spreader for greater control of location (this could help prevent harm to the environment, surfaces, vegetation, concrete, etc.). Stainless steel axles resist corrosion. Drop spreaders are for sidewalk and other controlled spreading applications. Garden seeder helps prep rows for planting and accurately plants seeds at the right intervals.

Shovel and Handle Types

SHOVEL TYPES

Round and Square
Used for digging and moving materials. These shovels usually have a long, straight handle; giving you more leverage when digging. The larger blade size comes with a pointed or rounded tip and is ideally used for digging, moving, breaking, and turning soil applications.

Scoop
Primarily used for moving grain material. Feature deeper basin that helps prevent spillage and has a deep enough edge to help snow removal.

Spade
Used for removing material and creating trenches of different shapes. Spades usually have a small, straight, flat blade and a shorter shaft. They are primarily used for slicing, lifting, moving, edging, and loosening soil and roots.

Trench
Similar to spades and are used to dig narrow trenches.

HANDLE TYPES
Come in straight or D-shapes and are made from wood, fiberglass, steel, and aluminum.

Mattocks and Picks

Hand tools with dual-function heads are excellent for breaking up rocky or hard surfaces such as concrete and packed earth. 22F045 has ductile iron head; others have steel head.

Cutter Mattocks—Have a hoe on 1 end and a cutter blade on the other, to cut and dig roots and cultivate soil.

Pick Mattocks—Broad mattock blades break up hardened soil; particularly good for burrowing, trenching, and hoeing. Pick points penetrate soil.

Railroad Picks—Designed to break up hard, rocky soil and similar materials. Each has chisel point on 1 end. 1THA8 and 4GFF2 have a pick point on the other, 20C884 has a ¾" point on the other. 4GFF2 is nonconductive.

Wheelbarrows and Accessories

Knobby tires provide deep traction for maximum contact. Ribbed tires provide positive steering on hard-packed surfaces.

Steel Tray Wheelbarrows—Drawn trays are pressed from heavy-gauge steel. 4" large curl, ball bearing wheels, and durable chip-resistant finish for added strength. Include cross supports, leg brace, and fully balanced to help prevent accidental tipping and spillage. Models with solid polyurethane tires can run over sharp metal, glass, and even nails.

Poly Tray Wheelbarrows—Seamless polyethylene trays are durable, easy to clean, and corrosionproof. All-steel front tray braces, cross strips, and "H" braces provide extra strength. Steel leg stabilizers help make them tip resistant.

ACCESSORIES

Solid Wheelbarrow Tires—Eliminate changing flat tires. Universal fit 6" ball bearing hub will fit any wheelbarrow.

Slime Smart Tubes—Prefilled with a precise volume of sealant to seek out and seal punctures. Prevent flats up to ⅛".

Spot, Trailer, ATV, and Skid Sprayers

Sprayers are large enough to apply insecticides and herbicides to lawns, acreages, fence rows, and ditches. Fimco sprayers are made of corrosion-resistant poly and include a full-length drain sump and handgun nozzle. Chapin sprayers feature chemical-resistant tanks. 416P35 to 416P37 include a triple filtration system that helps extend life of sprayer. 4NED5 is equipped with a pump kit that fits most roller pumps. Use with 3YB55, 6-roller pump, sold on page 2693.

BERNZOMATIC FLAME ENGINEERING INC. SIEVERT Swedish design and quality since 1882

Propane Weed Burner Torches

Easy-to-use method for controlling weeds. Ideal for use around rocks, pavers, driveways, and along fences. Can be used to melt snow and ice on driveways, sidewalks, and steps.

Hand Torches and Torch Kits—Ideal for spot weeding and pin-point flaming where a full continuous flame is not needed. Require a standard vapor withdrawal cylinder.

Shop Torch Kit—Ideal for small jobs where a large torch is too powerful or difficult to use.

Backpack Torch Kit—Excellent for spot weeding or where a continuous full flame is not required. Suitable for forest service use, farm, garden, and municipalities.

Clauss WESTWARD® CORONA SEASON AFTER SEASON FISKARS® STANLEY

Pruners

Titanium Bonded Nonstick and Titanium Nitride coatings improve blade strength and help blades stay sharper longer; Titanium Bonded and Nonstick coatings also improve corrosion resistance. Stainless steel blades are inherently corrosion resistant.

Bypass and Anvil—Bypass models have curved blades to allow clean cutting, and can cut near the trunk without crushing plant tissue. 468F45 FATMAX has a grip hook for maximum cutting power on large limbs. Features ergonomic nonslip rubber grips for comfort and curved handles to increase leverage. TiCN-coated blades will cut through 1" of live growth with minimal effort. Anvil pruners are excellent for cutting woody stems or deadwood.

Flower—Flower pruners have pointed blades that can easily maneuver the tight spaces between flower stems.

2-Pc. Cutter Sets—Include bypass pruner and flower pruner.

STANLEY CORONA WESTWARD FISKARS Clauss

Loppers

Bypass design is ideal for cutting green, living growth; anvil blade design cuts dry, dead growth.

Bypass—Longer handles with force-multiplying mechanism. Titanium carbo-nitride (TiCN) coating on 468F46 and 425R86 allow blades to retain sharpness. SyncDrive technology adds more cutting force than nongeared loppers.

Compound Lever Bypass—Lever mechanism helps reduce cutting effort.

Antimicrobial Bypass—Titanium blades resist corrosion and adhesives. Stainless steel is 3 times harder than untreated stainless. Blades stay sharper longer. Telescopic Lopper 429U21 extends from 19" to 24".

Anvil Loppers—Have nonslip grips and telescopic aluminum handles. Gear mechanism on 2RDN2 helps reduce cutting effort.

PowerGear Lopper—Geared lopper gives you up to 3 times more leverage than traditional loppers. Low-friction, rust-resistant coating prevents sap and debris buildup on blade. Ergonomic handles.

Hedge and Garden Shears

HEDGE SHEARS

3-Pt. Compound Cutting Action—Increases leverage. Bumper pads protect hands.

Dial-a-Cut—Wavy-blade shears cut easily. Adjustment knob for harder or softer cuts.

Power-Lever—Self-sharpening, serrated blade. Handle adjusts from 25" to 33"L.

Power-Gear—Have 2 gears to aid cutting force, reduce cutting effort, and provide leverage through the cut.

Antimicrobial Handles—Titanium Bonded shears are harder than untreated stainless, so blades stay sharper longer.

Heat-Treated Blades—Straight edge with limb notch shears feature comfortable nonslip grip. Blades can be resharpened.

GARDEN SHEARS

Titanium Bonded resist corrosion and adhesives. Nonstick Titanium 429U32 resists tape, glue, hook-and-loop, and sap. Micro ceramic coating will not wear off—up to 100,000 cuts.

SHARPENER

Sharpens straight edge tools, such as hedge shears, anvil loppers, and pruners.

Hand Saws

Bow Saws—Westward saws have a lightweight tubular steel frame with safety tension lever. Stanley FATMAX Bow Saw has a high-tension control knob, durable knuckle guard, and comfort molded grip. 24" removable blade.

Pruning Hand Saws—Blades fold or slide out of the way. Triple-edge teeth cut quickly. Titanium Bonded blades on 429U25 resist corrosion and adhesives and stainless steel is 3 times harder than untreated stainless.

Tri-Cut Saws—Hard chrome-plated tri-edge blades provide a cleaner cut than a single blade. Impulse-hardened teeth. An index finger stop provides additional safety.

Axes, Machetes and Hawkbill Knife

General purpose axes drive their wedged blade into wood to fell trees, remove branches, and split logs. They have a single-bit head attached at a right angle to a long handle. Axes require two hands to swing and maximize their striking force. Fiskars Machete 45HE08 is for grass, soft fibrous plants, light brush, perennials, and small roots. The hook/tip is for dividing plants, clump cutting (pulling motion), and digging small roots and weeds. Serration for precision cutting of grass. 45HE11 is for large dense areas of lighter weight material. Blade tip chops grass, palms, and branches. Westward models have a steel blade with a powder-coated paint finish, resistant to rust and abrasion. Hawkbill Knife has carbon steel blade and ergonomic plastic handle.

Brush Clearing Tools

Brush Axe has a thick, drop-forged blade and nonstick coating. Insert-molded design prevents blade from loosening. Machete Axe body slices grass and vines while the hook is used for power chopping grass and palms. The head can be used for quick, controlled chopping. The end of the axe is used for push cutting and chiseling. Double-Edge Bush Hook is for clearing brush, weeds, tough vines, and undergrowth. Carbon steel blade has both edges sharpened. Clearing Hook allows controlled cutting for medium brush, woody stems, small branches, and hard fibrous plants. The hook/tip provides heavy-duty pulling motion for removing suckers, clearing vines. Coarse saw edge for precision cutting. Use Ditch Bank Blade for clearing undergrowth. Carbon steel blade has both edges sharpened. Clearing Hatchet works on light/medium branches. Hook is for light-duty pull cutting.

Brush and Log Removal Tools

BRUSH PULLERS

Easily clear brush with gripping teeth and strong, wide opening jaws that will not slip when engaged.

SHRUB AND CLUMP PULLERS

Feature triple chain system with no-slip gripping links that act as a choker to remove large shrubs, clumps of brush, and small trees.

ROOT CUTTER

Hardened serrated-edge blade and slide hammer cut easily through soil, removing roots without ripping up landscape. Slices roots up to 12" deep.

SKIDDING TONGS

Ideal for skidding and dragging operations. Opens to 25 in. 1.25 in-dia. steel tongs stay sharp for a long time. Powder-coated finish.

MINI LOG GRAPPLE

Easy-to-assemble grapple with 12 teeth grabs hold of logs for skidding and lifting. Powder-coated finish provides durability. 3000 lb. capacity.

KUSHLAN PRODUCTS, LLC

Plate Compactors and Tamping Ram

PLATE COMPACTORS

Heavy-duty shock mounting helps reduce vibration to upper engine handle. Sealed belt cover helps keep out sand and soil, and open plate is self-cleaning.

Single Direction—Plate compactor has water tank, sprayer, and collapsible handle. High-powered engine with low fuel consumption. Fluid tank and dolly wheels are removable for easier movement.

Reversible Plate—Forward and reverse gears allow greater mobility in trench work. Heavy-gauge cast-steel base plate resists wear. Centrally located lifting bar and dolly wheels ease transport. Wraparound cage helps protect plate from damage. Use to compact asphalt, gravel, and mixed materials.

TAMPING RAM

Features heavy-duty roll cage and heavy-duty throttle cable. Includes removable dolly wheels for easier mobility. Utilizes lean carburetor settings and additional measures to reduce the emissions of carbon monoxide, oxides of nitrogen and hydrocarbons which are produced in the combustion process.

Hardware Cloth, Netting, Wire, and Barbless Cable

- Galvanized steel construction

HARDWARE CLOTH AND POULTRY NETTING

Hardware Cloth—Welded cloth has a double zinc coating for maximum rust resistance and long life. Can be used as tree guards, window covers, on screen doors, gutters, and more.

Poultry Netting—A lightweight containment solution for many maintenance projects. For use in plant protection, animal cages, as a soil erosion inhibitor, and more.

WIRE AND BARBLESS CABLE

Electric Fence Wire—2 wire gauges in different lengths work with most farm voltages.

Smooth Wire—Durable, single-strand wire with rust-resistant finish is ideal for bundling, hanging, and tying.

Barbed Wire—Can be installed in line or as loose coil. Ideal for agriculture, animal boundary, military and prison protection, and security applications.

Barbless Cable—Economical way to control livestock without the entanglement dangers of a barbed wire fence.

Fence Posts and Drivers

Fence Posts—All fence posts are made of steel. U-Channel posts are compatible with poultry netting and hardware cloth.

Manual Fence Post Drivers—Weighted and reinforced steel heads on 4LVN8 and 9ANX7 are constructed for driving steel fence posts, the tapered loop handles offer comfortable hand placement. 3PNJ2 high-strength cap can be used with a post driver to sink sign posts into the ground.

TENAX Solutions All Around You

Barrier Fencing

Tenax Snow Fence 9KDE5 is a UV stabilized fence with oval mesh openings designed to slow wind and create drifts for snow storage so they will not interfere with roadways, driveways, or runways. Strong HDPE plastic resists wind damage and remains flexible in freezing temperatures. Tenax Safety Fence features smooth top and bottom borders that are less likely to cut and scrape adjacent materials during installation and removal. Fences are reusable, lightweight sets providing boundaries around work zones, construction sites, sporting events, and blowing sand, silt, or snow. Also effective for crowd control.

Fence Screens and Scaffolding Netting

Privacy and Debris Screens are durable, lightweight, tear resistant, and easy to install. HDPE screen material will not absorb water. Windscreen is ideal for windy locations and where privacy and security are desired. Screen is easy to install, highly visible, and has wing-type openings that allow air to flow through. Material has horizontal and vertical tear-proof bands for greater stability in windy conditions.

Chain-Link Fencing

A. Fabric—Galvanized zinc is uniformly applied to steel wire before weaving for an even, protective coating that is free of sharp burrs. Smooth fabric is easy to work with during installation.

B. Top Rails—Pregalvanized sheet steel is formed into tubing.

C. and D. Terminal and Line Fence Posts—Galvanized steel terminal posts are used at the ends of a run as corner posts or as gate posts. Line posts are used as support posts in the middle of a run.

E. Gates—Steel is galvanized before weaving. Welded frame with 17-ga., 1⅜" tubing, and 9-ga. fabric fill, which is galvanized before weaving into 2" mesh.

F. to Z. Fence and Gate Hardware—Extensive assortment of aluminum and galvanized fittings are manufactured to rigid quality standards.

Erosion Control Blankets and Silt Fences

These soil-preserving products control erosion and sediment.

EROSION CONTROL BLANKETS AND STAPLES

Biodegradable blankets contain at least 80% aspen wood fiber. Topped with a photodegradable netting. Green color. Biodegradable anchor staples sold separately.

SILT FENCE WITH WOOD STAKES

Lightweight woven fabric lets fluids pass through while trapping soil, preventing soil loss. Fencing is preattached to posts for easy installation.

Sprinklers

Whirling Sprinklers—Innovative shape control allows easy customizing of the sprinklers to the coverage area. On/Off switch allows you to adjust water flow at the sprinkler, not the faucet.

Impulse Spike Sprinkler—Shape adjustment is as simple as moving the collars to mirror the shape of the desired coverage area. On/Off switch eliminates trips from sprinkler to spigot, without getting soaked.

Oscillating Sprinklers—Plastic 425Y08 and metal 425Y09 are fully adjustable oscillating sprinklers with width and length controls. 425Y09 features On/Off control.

Traveling Sprinkler—Travels up to 200 ft. Adjustable arms and automatic shut-off. Die-cast iron body.

Tripod Telescoping Sprinkler—Far-reaching spray for large coverage areas. Metal stand and spiked feet provide durability and maximum stability.

Tree Watering Bags

Slow-release water bags provide an efficient means of properly watering newly planted trees or shrubs and promoting deep root growth. 8UNT8 is for use on a level surface for proper drainage. Low-profile design is for use on low-brushed bushes and trees such as pines. 9W936 can be used with chemical and nutrient additives and can be zipped together for larger applications.

Description	Color	Drain Time	Max. Tree Dia.	Item No.

30"H x 18"W at Base—For Shade Trees	Green	5 to 9 hr	4 in	**9W936**

Watering Cans

Cans have a long spout and handle so the container can be tipped to pour water over plants and soil in gardening applications. Feature an offset bottom to keep the cans off the ground and two handles for easy portability and pouring. Hot dipped steel containers are covered with molten zinc to protect from rust and corrosion.

HYDE — For a better finish, start with HYDE.

Pivoting Nozzle Pole

A slide grip pivots the nozzle up to 135° to reach spray into tight spaces and awkward angles. Attaches to your existing garden hose for longer reach and spray patterns from fine mist to high power, 2.5 to 5 gpm. The adjustable nozzle has a rubberized tip to protect surfaces. It can be exchanged with any standard garden hose accessory to use the pole's pivot action and reach. The hose interface spins freely to prevent kinks. Features water/soap mixture control and easy switch to clean water only for rinsing.

Cold Water Hoses

- Premium-Duty: 6 ply
- Heavy-Duty: 5 ply
- Standard-Duty: 4 ply
- Light-Duty: 2 and 3 ply
- Super Light-Duty: 1 ply

All have GHT connections. Hoses with aluminum couplings are certified for use in potable water applications. PVC Premium- and Heavy-Duty Hoses are kink-resistant and have crushproof couplings. Standard-Duty polypropylene hoses feature a helix wrap, providing flexibility. They resist abrasion, crushing, and kinks. Polypropylene material is up to 35% lighter than standard hoses. Collapsible Hose 423J02 is a fabric hose. Super Light-Duty Soaker Hose 423H99 can be used above ground or buried for direct underground soaking.

EPDM Garden Hoses

- Temp. range: -40° to 190°F
- Safety factor: 4:1

EPDM (ethylene propylene diene monomer) garden hoses provide excellent resistance to UV rays and ozone and are used in landscaping and grounds-maintenance applications. Hoses with coupled assembly feature fittings on both ends for attaching to equipment. Bulk hoses do not come with fittings.

Garden Hose Reels

Enclosed Garden Spring-Return Hose Reels—The corrosion-proof, polypropylene case resists most acids, alkalis, and UV rays. The enclosed reel protects the hose, the reel, and the components inside from outdoor exposure. These low-pressure hose reels mount on exterior walls. Feature garden-style hose ends.

Metal Freestanding Garden Hose Reel—Unit features a heavy duty bracing and swivel 360°.

Plastic Freestanding Garden Hose Reel—Reel comes fully assembled with a swing up handle for portability.

Plastic Wall-Mount Garden Hose Reels—Hand-crank reels are manually-operated using a crank handle that is attached to the barrel of the reel.

Mouse Traps

MULTIPLE-CATCH MOUSE TRAPS

Triangle Corner—Easy-to-set galvanized steel trap is designed to save floor space and capture live mice. Clear lid makes it easy to check contents.

Speedy Clean Little Pete—Ramp unit comes out quickly and easily for cleaning, or to use trap for insects. Pop-down tabs raise unit in damp areas. Clear lid allows quick visual inspection.

Repeating—Catches multiple mice with 1 setting; mechanism sweeps mice into holding chamber. No poisons or bait needed. Safe to use around children, pets, and in FDA/USDA-inspected plants.

Pro-Ketch Low-Profile and Ketch-All—Galvanized steel traps use no chemicals, baits, or poisons; approved for use in USDA/FDA-inspected facilities. Low-profile 1VJR6 is designed for confined spaces.

SPRING-LOADED MOUSE TRAPS

Jawz—Plastic-based trap with bait well. Easy to set; reusable.

Little Bigfoot—Wood-based trap with heavy-duty spring and expanded adjustable trigger for greater sensitivity.

Plastic Snap-E—A preformed bait cup aids in baiting, reduces bait stealing, and attracts mice to the ideal strike bar location.

Heavy-Duty—Reusable trap squeezes to set. Includes bait cup. For disposal, squeeze again to open.

GLUE MOUSE TRAPS

Stick-All—Prebaited to attract mice and insects without poisons or dangerous chemicals. Keeps them out of sight.

Cold Temperature—Nontoxic glue is formulated to be effective in temps. as low as 0°F. Excellent for use in unheated garages, basements, and in commercial walk-in refrigerators.

Baited—5DKE9 is prescored to fold for trapping and disposal. 5YAY1 nontoxic glue trays are prebaited with food-grade attractant. 11L633 adhesive traps also serve to monitor for insects.

Baited Mouse and Insect Boards—Nontoxic traps will not harden for 1 yr. under normal conditions. Perforated to tear off and place glue directly against baseboards to secure traps. Fold into tunnel shape for use in tight or dusty areas.

Pro Series Slim Multi-Catch —Narrow design can be placed in hard-to-reach areas where rodents travel. Use alone as a live trap, or add glue board 20YR50 (sold separately) to trap multiple mice.

Bulk Glue—Nontoxic glue is approved for use where pesticide use is prohibited or undesirable. Spreads easily in lower temperatures.

SPRING-LOADED RAT TRAPS

Plastic Big Snap-E—A preformed bait cup aids in baiting, reduces bait stealing, and attracts rats to the ideal strike bar location.

Note: Can be used for both rats and mice.

Bigfoot—Heavy-duty spring and expanded adjustable trigger setting provide greater sensitivity.

Jawz—Heavy-duty plastic with strong spring for quick kills. Reusable. Set by hand or foot. Quick-release button. Includes bait holder.

Rat Snap Trap—Interlocking teeth snap making escape almost impossible. Reusable. Easy-to-use and set with no-touch disposal.

GLUE RAT TRAPS

Rat Glue Boards—Suitable for use on mice and other rodents. Indoor use.

Baited Glue Trap—Nontoxic formula. Included Hercules Putty helps prevent dragging.

Glue Board—Ready-to-use board is nontoxic, economical, and traps both mice and rats.

Mouse and Rat Bait Stations and Rodenticides

Bait Stations—Stations provide a place where rodents feel secure while feeding on poisonous bait. Tamper-resistant designs keep bait out of reach of livestock, children, pets, and nontarget animals. Stations do not require the cleanup of traps and can help monitor rodent activity.

Rodenticides—Pellets are for burrow baiting, while bait packs help protect bait and fit in tight spaces. Block baits are for all-weather use and resist mold and moisture. Brodifacoum formula is for single-feed use. Bromadiolone is a single-feed bait for everyday control of recurring rodent problems. Bromethalin acts quickly and is highly palatable to rodents. Diphacinone formula is an economical bait for day-to-day control of recurring rodent problems.

Animal Traps and Repellents

Mole Traps—Trap moles at the entrances and exits of surface tunnels.

Animal Traps—Easy to bait, set, and release. Smooth inside edges do not harm animals. Effective for a wide variety of animals.

Repellex—Repellents are made from plant-based materials and have no harmful chemicals or pesticides. Not for use on food crops. Innovative emulsifying agents allow formula to absorb quickly into the soil and form a protective coating around plant roots and other underground food sources.

Transonic Mole—Nontoxic solution to most outdoor rodent problems. Stake into ground, where solar-powered unit flashes, buzzes, and vibrates, to disorient and repel moles and gophers.

Rat-Out Gel—Nontoxic gel repels rats, mice, squirrels, gophers, and other mammals. The garlic smell deters rodents before they even touch it, but if they do come into contact with the gel, its tacky quality turns them away.

1DGX2

Wildlife Repellents

Systemic Repellents—Deliver hot pepper concentrate through the plant roots making plants inedible to animals. Maintain potency while evenly distributed throughout the plant. One treatment can last the entire growing season. Not for use on food crops.

Granular Repellent—Organic, all-natural formula is safe to use around children, pets, and food crops. Granules will not wash away in the rain, evaporate, or freeze. Easy to apply by shaking on the ground.

Electronic Repellents—Use 6WB54 indoors. Sonic and ultrasonic sounds repel insects, rodents, bats, and spiders. Used outdoors, 1DGX2 is a humane, maintenance-free ultrasonic yard protector for deer, raccoons, rabbits, squirrels, skunk, rodents, and more. Continuous or motion-sensor operation.

Bird Slides

Birds slide off surfaces because they can't get a grip. Use on ledges, eaves, angle irons, I-beams, and most "L" shaped ledges to protect against all bird species. Can be primed and painted to match color of structure to look like it's a part of the building. Trim for fit.

20YR37

Visual Bird Repellers

2D and 3D Decoys—Stake decoys into the ground to repel geese. 3D bodies swivel on stake and furry tail moves in the wind.

Terror-Eyes—Inflatable, moving bird predator uses holographic, moving eye lenses that follow infesting birds.

Scare Eyes—Inflatable repellent simulates glaring eyes of predator birds. Rotate colors within 3 weeks for max. effectiveness.

Screech Owl—20YR37 features 4 predator/scare sounds, which are photocell-activated during daylight hours.

Gator Guard—Floating alligator head repels geese and small animals from water areas.

Irri-Tape—Iridescent diffraction foil ribbon combines holography, wind, and light to create a ripple effect that pest birds perceive as a danger signal.

Floating Swan—Repels Canada geese. Effective on water or land; 2 steel anchoring stakes included. For best results, relocate the decoy periodically.

Falcon Decoy—Covers up to 6,000 sq. ft. Scares small pests and birds such as pigeons and gulls. Place on flat surface. Bottom has a plug that can be removed to fill with sand to weigh down base.

Optical Gel—Keeps birds off of structures without harming them. Supplied in ready-to-use plastic dish container which can be affixed to surfaces with commercially available dab of silicone. Birds see ultraviolet light spectrum as fire and avoid site. Gel has firm density that won't run. Resistant to high and low temperatures, rain, and snow.

Bird Repellent Nets, Spikes, Gel, and Spray

Bird Nets and Clips—Seal off all structural openings to keep out birds and small animals.

Spikes Needle Strips, Kits, and Adhesive—Attach to any surface to permanently prevent birds from landing and roosting. Install with adhesive, sold separately.

Birdproof Gel—Nontoxic formula deters all birds and helps prevent landing and roosting by creating a sticky surface. Apply with a caulking gun, indoors or out. Solvent removal. EPA Registered.

Repellent Spray—Goose repellant can be sprayed with agricultural or hand sprayer on turf, fruits, vegetables, fountains (without fish), pools, and building structures. Not harmful to plants or animals.

Bird Deterrents

Bird Barrier

Products are designed to avoid injury to humans, birds, or animals.

StealthNet—Ultrastrong, UV-resistant polyethylene netting provides an impenetrable barrier against sparrows, swallows, and other small birds. Black color. Custom sizes are available; call 1-800-GRAINGER (472-4643).

Bird-Flite—Thin stainless steel rods on a polycarbonate base repel pigeons and larger birds from signs, chimneys, security cameras, cut-outs, lights, pipes, and ledges. Glue or screw in place.

Dura-Spike—Blunt stainless steel spikes discourage pigeons and larger birds from landing and nesting. Flexible construction conforms to building features, such as ledges, parapets, pipes, chimneys, lights, etc. Cut to length and glue or screw in place.

Bird Coil—Expanding coils destabilize surfaces and discourage birds from landing. Kits include clips, end brackets, and other hardware or adhesive to attach to your specific substrate.

Daddi Long Legs—Device's stainless steel rods rotate and wave in the breeze, interfering with birds' wings as they try to land. Effective against gulls, pigeons, and larger birds. Plastic base screws into most surfaces.

BIRD-X

Silent and Audible Bird Repellers

ULTRASONIC BIRD REPELLERS

Balcony Guard—Keeps birds away with continuous or motion-sensor operation. Weatherproof. 120V power or 4 C batteries (not included). Includes mounting kit.

Ultrason X—Ultrasonic sounds get rid of birds, bats, rodents, and more. Weatherproof. For indoor or outdoor use.

Quad Blaster—Ultrasonic sound waves attack birds and bats in any enclosed or semi-enclosed areas. For indoor use only. 3NZD2 includes red strobe light that acts as visual deterrent.

SONIC BIRD REPELLERS

Broadband PRO—Controls bird pests with ultrasonic and sonic signals. Has a series of species-specific distress cries and predators' noise. Includes 3 visual predators: Scare Eyes, Prowler Owl, and Irri-Tape. For indoor or outdoor use.

BirdXPeller Pro and Pro 2—Bird distress sounds and predator noises are effective against targeted species. 6WB52 repels pigeons, starlings, sparrows, and gulls. 8DML0 repels grackles, blackbirds, crows, cormorants, and ravens.

Super BirdXPeller Pro and Pro 2—Use birds' own distress calls to scare them away. Include

CATCHMASTER FLOWTRON®

Insect Killers and Accessories

Safe and effective units attract flies and other light-sensitive flying insect pests with multiple attractants, including ultraviolet light and pheromone-based lure.

Adhesive Board—Safe, silent traps draw pests to a strategically placed large-capacity adhesive board, where they get stuck and remain trapped. Once full, boards are easy to dispose of and replace. 24K340 GLOstik Flying Insect Trap features a reflective cap with high-efficiency LED light to attract and trap insects to the disposable glue tube. Portable, reusable, battery-operated base with LED lasts up to 10,000 hr. Uses (3)AAA batteries not included. NightGuard 1ABE2 is a portable, free-standing unit. Galaxie 1ABE3–1ABE6 use a combination of ultra-violet energy and Flowtron's exclusive fly attracting pheromone. Ideally suited for installation in front-of-store locations. Elite Stun Unit 1ABE1 special stun effect ensures out of sight capture.

Zapper Lantern Style—Once drawn to the unit, insects fly through an electro-statically charged grid where they are killed instantly. 2W546 and 3ZF09 have removable collection chambers.

PowerVac Vacuum—Once flying pests are attracted close enough to the unit, the powerful vacuum draws them in to a removable, see-through tray for easy disposal. Weatherproof, lightweight, portable unit can be used in just about any outdoor location.

Flowtron Backflight Retrofit Kit—4LV47 includes bracket with prewired socket, bulb, 2 screws, and foam pad with adhesive back.

TOUGH GUY CATCHMASTER BIRD-X

Flyswatters and Insect Traps

Flyswatters—Stiff plastic mesh head measures 5"W x 5"L.

Flying Insect Glue Trap—Adhesive trap has multibait attractant for common flour and grain moths.

Fly Traps—5YAY4 controls nuisance flies and also monitors fly populations to help determine when to treat. 5ZPK8 is a nontoxic, odorless and transparent sticky trap that mounts on indoor window panes to trap all types of flying insects. 8DF85 and 8CNR3 have a multibait attractant designed to lure multiple fly species. 8DF85 provides inconspicuous pest control. 8CNR3 features a fluorescent chartreuse color and double-sided surface area to trap up to 10,000 flies. 45WP99 has a specially formulated lure designed to attract a broad range of flies. Just add water and hang. Features safety lock cap and leakproof design.

Crawling Insect Glue Trap—Ready to use for trapping crickets, roaches, spiders, and other crawling household pests.

Bed Bug Prevention and Detection Monitors—Help identify post-treatment activity. 6JHG3 is a cost-effective monitor with low-profile design ideal for tight spaces or behind bed boards. 36A149 provides easy visual inspection through the clear shell; for use under mattresses.

Choose the Right Ladder for the Job

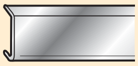
STEP 1: WHAT MATERIAL DO YOU NEED?

Fiberglass or Aluminum?

Fiberglass

Rugged and durable, ideal when working around electricity. Feature nonconductive side rails.

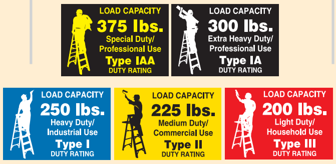
Aluminum



Lightweight and easy to carry. Not for use around electricity.

STEP 2: CHOOSE LOAD CAPACITY/DUTY RATINGS

Load capacity is the combined weight of user and materials.



STEP 3: CHOOSE THE SIZE/HEIGHT

STEPLADDERS

Max. Ht. of Desired Reach (ft.)*	Choose This Size (ft.)
7	3
8	4
9	5
10	6
11	7
12	8
14	10
16	12
18	14
20	16

* Assumes a 5-ft. 6" person with a vertical 12" reach.

EXTENSION LADDERS

Height to Top Support Point (ft.)	Choose This Size (ft.) †
9 Maximum	16
9 to 13	20
13 to 17	24
17 to 21	28
21 to 25	32
25 to 28	36
28 to 31	40

† Reflects section overlap, ladder angle and 3-ft. extension above roof line.

L7300 SERIES

- Safely lean against wall
- Rail latch holds rear rail to front rail in leaning mode

Fiberglass, Type 1AA, 375-lb. Duty Rating

6300 SERIES

- Red side rails
- Molded versatile LockTop securely holds drills and tools
- Top accommodates Lock-In accessories
- Molded large boots with EDGE Bracing
- Steel Internal spreader bars

Fiberglass, Type 1AA, 375-lb. Duty Rating

7300 SERIES

- Molded external rail shields and EDGE Bracing
- Aluminum Tool-Tra-Top securely holds tools
- Extra-large knee braces—front and back
- Extra-wide base width
- Steel internal spreader bars

Fiberglass, Type 1AA, 375-lb. Duty Rating

7400 SERIES

- Aluminum external rail shields and EDGE Bracing
- Aluminum Tool-Tra-Top securely holds tools
- Extra-large knee braces—front and back
- Extra-wide base width—widest ladder in industry
- Larger spread than 7300 Series
- Aluminum internal spreader bars

Fiberglass, Type 1AA, 375-lb. Duty Rating

400 SERIES

- Aluminum Tool-Tra-Top
- Fully knee braced—front and back
- Slip-resistant foot pads
- Internal spreader bars except on 4-ft. and 6-ft. sizes

Aluminum, Type 1AA, 375-lb. Duty Rating

6100 SERIES

- Molded Proguard Boot provide firm slip-resistant footing
- Versatile HolsterTop securely hold drills and tools
- Top accommodates Lock-In accessories
- Metal bottom step knee braces
- Internal spreader bars

Fiberglass, Type 1A, 300-lb. Duty Rating

6200 SERIES

- Orange side rails
- Molded versatile LockTop securely hold drills and tools
- Top accommodates Lock-In accessories
- Molded large boots with EDGE Bracing
- Steel internal spreader bars

Fiberglass, Type 1A, 300-lb. Duty Rating

370 SERIES

- Molded Tool-Tra-Top securely holds tools
- Internal "H" spreader on 4-ft., 5-ft., and 6-ft. sizes
- Auto-closing molded pail shelf
- Aluminum foot bracket with slip-resistant pad

Aluminum, Type 1A, 300-lb. Duty Rating

6000 SERIES

- Molded HolsterTop
- Top accommodates Lock-In accessories
- EDGE bracing at bottom
- External spreader bars

Fiberglass, Type 1, 250-lb. Duty Rating

360 SERIES

- Molded Tool-Tra-Top
- Auto-closing molded pail shelf
- External spreaders
- Slip-resistant foot pads
- Ideal for painting

Aluminum, Type 1, 250-lb. Duty Rating

5900 SERIES

- Molded HolsterTop
- Top accommodates Lock-In accessories
- EDGE bracing at bottom
- External spreader bars
- Ideal for light-duty or homeowner use

Fiberglass, Type II, 225-lb. Duty Rating

Specialty Ladders

OBEL SERIES

- Custom molded top designed for electrical contractors
- Integrated retractable conduit holder for cutting pipe
- Wire spool holders and a multiuse hook
- EDGE bracing at bottom
- Internal spreader bars

Fiberglass Electricians Job Station Stepladders, Type 1AA, 375-lb. Duty Rating

E7400 SERIES

- Convenient for versatile applications
- Ideal for two-person jobs and working at various heights
- Duty rating applies to each stepladder side
- Double riveted, fully knee braced steps
- Aluminum external rail shields and EDGE bracing

Fiberglass Extension Trestle Ladder, Type 1A, 300-lb. Duty Rating

FTP6200 SERIES

- Back rail fits through studs, tight areas, around corners and uneven surfaces
- Spreader handle designed for convenient setup and transport
- Fully based front section
- Extra-wide stance for stability
- Available up to 12 ft.

Adjustable Enclosed Safety Cages

- Nonconductive, high-strength, fiberglass-resin composite
- Fully adjustable 1-ft. increments

Offer versatile, safe alternative to tie-off, allowing access to constricted areas and drop ceilings while complying with tie-off rules. Help protect operators in a fully enclosed working platform, allowing them to work safely and quickly with 2 hands. Each side adjusts independently to multiple heights; adjusts to work safely on uneven surface and stairs. Models with Wheel Lift™ casters allow cage to move from place to place fully deployed. Built-in Tip & Glide™ wheels make it quick-and-easy to roll anywhere.

Aluminum Extension Planks 4XP31

4XN82

Ladder Jacks, Planks and Leveler

Aluminum Extension Planks - PA200 Series—Made of 2" deep box section extrusions for outstanding rigidity in ladder jack, trestle ladder, and step stool applications. Locking mechanism sets plank in 12" increments; positive stops prevent overextending.

WARNING: When assembled as a scaffold or staging, planks must be used in conjunction with suitable guardrail protection in compliance with applicable governmental codes, ordinances, regulations, and safe practices.

Ladder Jack Clamping System—Ladder jacks mount to either side of extension ladder and clamps securely hold stage platform to ladder jacks. OSHA and ANSI Standards require ladder jacks only be used on Type 1, Type 1A, or Type 1AA ladders.

- Accommodates up to 20"W stage planks

D7100-2 SERIES
- Rung plate rung to rail connections
- Ideal for utility and telecommunication industries
- Base and fly separate
- Rail shield and shoe bracket protect rail from damage
- 36-ft. and 40-ft. are Type 1A 300 lb.

Fiberglass D-Rung, Type 1AA, 375-lb. Duty Rating

7100-2 SERIES
- Round shape rungs
- Ideal for utility and telecommunication industries
- Rung Plate rung to rail connections
- Base and fly separate
- Rail shield and shoe bracket protect rail from damage

Fiberglass, Round Rung, Type 1AA, 375-lb. Duty Rating

D500-2 SERIES
- Interlocking side rails
- Base and fly separate easily
- 1¾" D-rungs
- Base section width is 19⅛"
- 40-ft. and 48-ft. are Type IA 300 lb.

Aluminum, D-Rung, Type 1AA, 375-lb. Duty Rating

D6200-2 SERIES
- Direct rung to rail connections
- Base and fly separate
- Combination rail shield bracket and shoe with slip resistant pad
- Molded rung braces at bottom for increased durability

Fiberglass, D-Rung, Type 1A, 300-lb. Duty Rating

D6200-3 SERIES
- Three-section design allows the ladder to close shorter than 2 section ladders
- Easier to maneuver and transport
- Include carry handle
- Direct rung to rail connections

Fiberglass, Compact, Type 1A, 300-lb. Duty Rating

D1500-2 SERIES
- Stacked side rails so base and fly sections are same 18⅛"W
- Base and fly separate easily
- Dual-action feet with spur plate

Aluminum, D-Rung, Type 1A, 300-lb. Duty Rating

D5900-2 SERIES
- Direct rung to rail connections
- Curved shape side rails for user comfort
- Lighter carrying weight than heavier duty rated ladders

Fiberglass D-Rung, Type II, 225-lb. Duty Rating

D1200-2 SERIES
- Direct rung to rail connections
- Ideal for painting
- Lightweight

Aluminum, D-Rung, Type II, 225-lb. Duty Rating

D1200-3 SERIES
- 3-section, compact
- Interlocking side rails
- Mar-resistant molded end caps
- Slip-resistant shoe with SHU-LOK feature and spur plate
- Slip-resistant TRACTION-TRED D-rungs
- Spring-loaded locks

Aluminum, D-Rung, Type II, 225-lb. Duty Rating

D6000-2 SERIES
- Direct rung to rail connections
- Combination rail shield bracket and shoe with slip-resistant pad
- Molded rung braces at bottom for increased durability

Fiberglass, D-Rung, Type I, 250-lb. Duty Rating

D1300-2 SERIES
- Interlocking side rails
- 1¾" D-rungs
- Base section is 17⅜"W
- Ideal for painting

Aluminum, D-Rung, Type 1, 250-lb. Duty Rating

7800 SERIES
- Converts to a step or extension ladder
- Padded V-rung at top in extension position
- Fixed aluminum locks secure rungs in extension ladder position
- Large hoop feet

Fiberglass, Combination Ladder, Type IAA, 375-lb. Duty Rating

D7100-2LV SERIES
- Rung plate rung to rail connections
- Base and fly separate easily
- Factory installed, foot action Level Lok extends up to 10" in 3⁄16" increments
- Prepierced holes at top of fly section for easy field installation of accessories
- 36-ft. and 40-ft. models are Type 1A, 300 lb.

Fiberglass, D-Rung Extension Ladder, Type IAA, 375-lb. Duty Rating

D8200-2EQ SERIES
- Factory installed EverLevel leveling system: adjusts up to 8¼" in ⅜" increments
- Direct rung to rail connections
- Dual-action feet with spur plate

Fiberglass, D-Rung Extension Ladder, Type IA, 300-lb. Duty Rating

560-3 SERIES
- Removable top fly section
- Heavy-duty rope and double pulley system
- Dual-action feet with spur plate
- Maximum working length is 47 ft.

Aluminum, Round Rung Extension Ladder, Type I, 250-lb. Duty Rating

D1800-2EQ SERIES
- Factory installed EverLevel leveling system: adjusts up to 8¼" in ⅜" increments
- Direct rung to rail connections
- Built-in bubble leveler at bottom rung
- Dual-action feet with spur plate

Aluminum, D-Rung Extension Ladder, Type I, 250-lb. Duty Rating

500-1 SERIES
- Dual-action feet with spur plate
- Hoop end caps
- 8-ft. to 12-ft. ladders are 16⅞"W
- 24-ft. ladder is 20⅝"W
- 18-ft., 20-ft. and 24-ft. models are Type IA, 300 lb.

Aluminum, Round Rung Straight Ladder, Type IAA, 375-lb. Duty Rating

7100-1 SERIES
- Rung plate rung to rail connections
- Rail shield and shoe bracket protect rail
- Dual-action feet with spur plate for use on hard or penetrable surfaces

Fiberglass, Round Rung Straight Ladder, Type IAA, 375-lb. Duty Rating

M7100-1 SERIES
- Round shaped rungs
- 3-ft. replaceable plastic sleeves to avoid rim damage to rail
- Ladder is 12⅜"W
- Wide hoop feet with rubber pads at bottom

Fiberglass, Manhole Ladder, Type IAA, 375-lb. Duty Rating

D1500-1 SERIES
- Dual-action feet with spur plate for use on hard or penetrable surfaces
- Mar-resistant end caps
- Ladder is 18⅛"W

Aluminum, D-Rung Straight Ladder, Type 1A, 300-lb. Duty Rating

D6200-1 SERIES
- Dual-action feet with spur plate for use on hard or penetrable surfaces
- Molded rung braces at bottom for increased durability
- Ladder is 19"W

Fiberglass, D-Rung Straight Ladders, Type IA, 300-lb. Duty Rating

S7700 SERIES
- Ideal for manhole use
- Maximum number of 3-sections can be used, each section 6-ft. high
- Lock sections with cam driven tension clamps
- Ladder width 12"
- Requires Shoe 41D286 and End Cap 41D285, available separately

Fiberglass, Parallel Sectional Ladder, Type I, 250-lb. Duty Rating

General Aerial Work Platforms

AWP Series—These platforms feature user-friendly controls with auxiliary platform lowering. Designed with durable, exclusive Genie mast system and rocker base system for easy maneuvering around and over obstacles. Small outrigger allows for positioning close to walls. Use with Super Straddle accessory 38R201 to work over fixed seating.

Boom Lift Series—Provide the ultimate versatility in positioning capabilities, giving a wide range of motion allowing above and below rotation for precise positioning. Works in tight spaces, as well as those difficult to reach, and hard-to-access work areas. Offer quiet emission-free operation in most sensitive work environments.

IWP Series—Industrial work platforms have a rigid aluminum mast designed for strength, reliability, and low maintenance. No outriggers are needed due to automatic level sensing with integrated leveling jacks. Designed with auxiliary platform-lowering feature on both platform and ground controls.

GR and GRC Series—GR Runabout Series are compact, low-weight self-propelled machines. Feature zero inside turning radius, 30% gradeability, and proportional lift and drive controls. GRC Runabout Contractor Series feature tube-in-tube telescoping steel mast and steel platform. Lifts will drive when fully elevated, providing access to all major components for convenient servicing.

Aerial Work Platform Course 45JJ77—Genie Lift Pro online operator training is a high-quality, professional-grade program that is delivered through a web-based platform and is designed to satisfy the general training requirements for aerial work platforms as defined by ANSI, OSHA, and CSA.

Slab Scissor Lifts

- Meet ANSI A92.3, CSA B354.1, EN 280, AS1418.10

Environmentally friendly electric lifts release no emissions and onboard diagnostics make troubleshooting easy. Ideal for maneuvering in tight spaces around indoor and outdoor construction with solid, nonmarking tires. Also used for maintenance and installation applications on firm, level surfaces. All lifts feature a 36" roll-out platform extension, proportional controls for drive functions, multiple disc brakes, emergency stop at platform and ground controls, and AC power to platform.

Personnel and Merchandise Lifts

PERSONNEL LIFTS

Ballylifts

Totally enclosed platform has built-in ladder with flat, skid-resistant treads and grab rails provides access to platform in fully lowered position while antiskid rungs provide access to platform when lift is raised. Features leveling jacks that secure lift to floors and uneven surfaces. 8ADE3 is a cantilevered platform with aluminum deck. 8WZ64 has a standard platform.

MR Lifts

Roomy 28" x 36" enclosed platform accommodates 2 workers and has built-in ladder with flat, skid-resistant treads and grab rails. Features leveling jacks help secure lift to floor and also compensates for uneven surfaces. Self-storing outriggers extend from base to provide stability. Rails fold for doorway passages and storage.

Drivable and Pushable Vertical Mast Lifts

These lifts hold 1 person and are ideal for work on overhead lighting and ceiling maintenance. 53DN39 reaches a platform height of 18 ft. and 38GT54 reaches a platform height of 30 ft.

MERCHANDISE LIFTS

Power Stocker

- 26X075 and 26X077 include a safety sensor

Ground-entry, drivable and pushable hydraulic order pickers raise merchandise to shelf level and allow merchandise to slide off easily to minimize lifting. No outriggers are required. Floor locks on pushable models secure the lift in place. High-quality controls for additional safety and ease-of-use. Guardrails are removable, making loading and unloading easy. Recharge using a standard 110V outlet. Charger cord included.

With Riggers, 38GT54

Portable Personnel Lifts

- Safer, more versatile alternative to ladders and scaffolding
- 330-lb. capacity
- Includes tool tray

The LiftPod is easily disassembled to fit in the back of a pickup truck while the Ecolift's patented stored power system raises and lowers the platform quietly without batteries or hydraulics. Ideal for plant and facility maintenance and various contractor applications.

Drivable Scissor Lifts and Pushable Mini Scissor Lifts

- No outriggers required
- Meet ANSI Standards

Easy-to-operate with joy stick control and feature emergency stop button and lowering system. Pushable, ground entry, 12VDC, lifts are designed with a slim base for access to tight areas. Recharge using a standard 110V outlet. Power unit stored in lockable slide out drawer and comes with battery charge indicator. Drivable scissor lifts have extendable cantilever platforms, minimizes the strains from pushing lifts, providing additional access to machinery and equipment. Also, drivable at full heights and have a battery power source.

Features to Consider When Choosing a Rolling Ladder or Work Platform

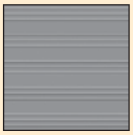
TREAD

Use the chart to find the right tread material for your work environment.

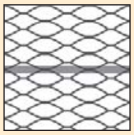
Tread Types:

FEATURE	SERRATED	PERFORATED/ OPEN GRIP	EXPANDED METAL	RUBBER MAT/ ABRASIVE MAT/ ANTISLIP VINYL	RIBBED (ALUMINUM)	RECOMMENDED USE
Aggressive Slip-Resistance	●					Ideal in the harshest enviornments where liquids are present and other materials that can create buildup on the tread including grease, oil, and other debris.
Maximum Drainage & Self-Cleaning Properties			●			The most open tread design that provides maximum drainage and self-cleaning properties.
Good Slip-Resistance & Drainage Properties		●				The most common tread used and ideal in most environments. Upward holes provide excellent slip-resistance and downward slots provide good drainage of liquids (exclusive to Tri-Arc).
Durability & Longest Lasting	●	●				Utilize the most material making these treads able to withstand the constant use over time and extending the life of the ladder and keeping it safe for use.
Least Aggressive Environments (offices, backrooms, retail store floors, etc.)				●	●	These solid treads provide slip-resistance properties that are ideal in environments where all types of shoes can be worn and where there are not liquids and other debris found.

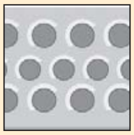
Abrasive Mat



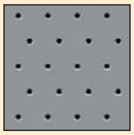
Antislip Vinyl



Expanded Metal

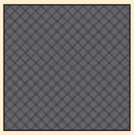


Open Grip



Perforated

Ribbed



Rubber Mat

Serrated

FEATURES TO CONSIDER WHEN CHOOSING A ROLLING LADDER OR WORK PLATFORM

When selecting a rolling ladder, it's important to consider the required access, working height, and load capacity. Understand your space and your needs, as picking the right size or length is just as important as the style you choose.

Load Rating

Load Rating is the maximum weight capacity the ladder can safely carry, including the weight of the user and equipment. Make sure to factor in your tools and protective gear when looking for the right ladder.

Size Considerations

The higher you work, the wider your ladder must be in order to remain safe. Consider working height or height and width limitation on ladder dimensions.

Ladder Actuation

Rolling ladders feature various safety locking mechanisms to make sure your ladder doesn't roll while in use.

PLATFORM HEIGHT
Subtract 5- to 6-ft. from desired working height.

OVERALL HEIGHT
Consider ceiling or overhead obstructions.

BASE DEPTH
Typically the taller the ladder the wider the base. Ladders with a 24"W or smaller base are suitable for use in tight spaces or narrow aisles.

PLATFORM DEPTH
Consider working area.

3UY16

Cotterman® Ballymore Steel Rolling Ladders

Cotterman® TRI-ARC SIGNATURE SERIES
Heavy-Duty Steel Rolling Ladders

- Handrails available
- Ship unassembled
- 24" platform width
- 50° and 56° ladders are gray; 59° are gray/yellow
- Foot-activated step lock

50°, 56°, and 59° climbing angles for easy forward descent.

Description	Brand	Item No.
Gate Options for Extra Heavy-Duty Rolling Ladders		
Front Gate	Cotterman	29JU21
Rear Side Gate	Cotterman	29JU24

Cotterman®
TRI-ARC SIGNATURE SERIES

Deep Top Steel Rolling Ladders with 20" and 30" Deep Platforms

- Handrails included
- 450-lb. load capacity
- Gray
- Cotterman: 59° climbing angle
- Tri-Arc: 56° climbing angle

Large depth top platform provides ample safe working space.

** Deep Top Kit is required when ordering Stock Picking Shelf Kit. † All-Direction Maneuverability Kits and Stock Picking Shelf Kits cannot be combined.*

Customize Your U-Design Steel Rolling Ladder

Configure your U-Design Steel Rolling Ladder exactly how you want it. Combine additional features to build a productive ladder for your needs.

Select from 3 Accessory Kits

Perforated

Serrated

- **Deep Top Kits—**Add 10" or 20" of additional length to the platform.
- **All-Direction Maneuverability Kits—**Enable the ladder to turn within its own radius.

- **Stock Picking Shelf Kits—**Add two or three 50-lb. capacity shelves.

Note: All-Direction and Stock Picking Shelf Kits cannot be combined. A Deep Top Kit is required when ordering a Stock Picking Shelf Kit.

Find more information on Rolling Ladders on page 1034.

3-Step Standard Base 20Z356

5-Step Straddle Base 6MXV6

Cotterman® Welded Steel Tilt-N-Roll Ladders

- 30"H handrails included
- Ship assembled
- 450-lb. load capacity (standard base); 350-lb. load capacity (straddle base)
- Gray
- 59° climbing angle
- No ladder actuation

Ladder rests solidly on four 2½" rubber pads when climbing. Easily moved by tilting back on 4" wheels with handrails. The balanced design won't allow ladder to scoot away or toward user.

Note: See Grainger.com® for Safety Yellow options.

- Ship assembled
- 59° climbing angle

During climbing, each standard base ladder sits solidly on four 2½" rubber pads for greater stability. Easily moved by tilting back on 4" wheels with handrails. The balanced design won't allow ladder to scoot away or toward user.

Lock-N-Stock Steel Folding Ladders

- 22"H handrails included
- Ship assembled
- 350-lb. load capacity
- 7" platform depth
- 16" platform width
- 24" bottom width
- Blue
- Rear exit on 3KNK7 and 3KNK8
- 59° climbing angle
- No ladder actuation

Ladders are easy to climb, roll, fold, and store. Lock in folded or climbing positions. Easy-to-maneuver in open or closed position.

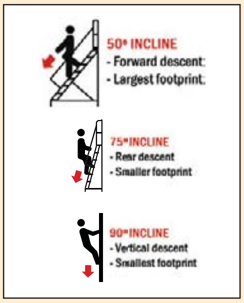
U-Design Configurable Platform Selection Guide

STEP 1

Select an Incline:

Crossover Platforms (CP) and Rooftop Platforms (RP) use 2 ladders paired together. Different inclines are acceptable.

Max-Access Platform Systems (MAPS) use 50° incline stair units/ladders.



STEP 2

Select a Ladder Height:

CP: Choose based on vertical clearance height need for application.

RP: Select a ladder with a height greater than the required height.

MAPS: For crossover applications, deduct 5" for clearance height.

STEP 3

Select a Span or Platform:

CP and RP: Combine 20" and 30" spans to create up to 90" of horizontal clearance. For spans over 90" (CP) or 120" (RP), use a leg kit.

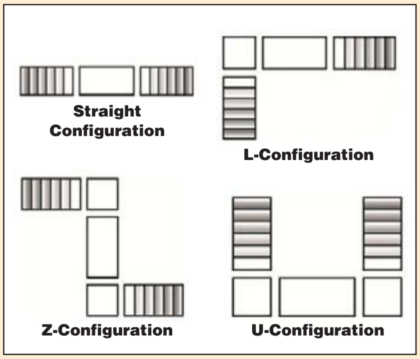
MAPS: Create platform configurations by combining 36" x 36" platforms. A tower support leg is required when 3 platform units are combined.

STEP 4

Select a Crossover Configuration or Support Legs:

CP and RP: Add turn platforms for configurations requiring a 90° turn including L-, Z-, or U-shaped crossovers.

MAPS: A tower support leg is required for each 50° stair unit/ladder.

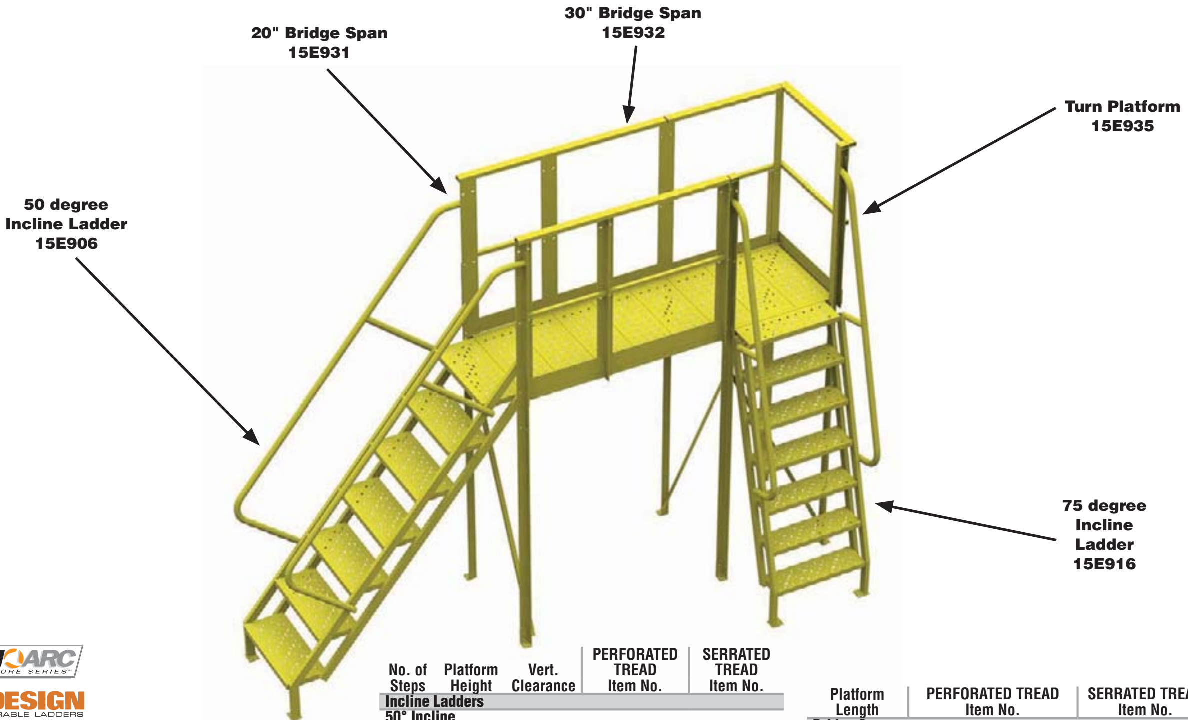


STEP 5

Select Platform Handrails:

MAPS: Add handrails to any side for fall protection. 5-step and larger ladders require handrails on all platform unit sides for code compliance.

A configurator tool is available at Grainger.tri-arc.com/GRconfigurator_login.html



TRI-ARC SIGNATURE SERIES
U-DESIGN CONFIGURABLE LADDERS

Configurable Crossover Platforms

- 1000-lb. load capacity
- 24"W steps
- Clearance height is 2" below platform height

Customize a crossover platform by choosing components based on environment and application requirements. Platforms require minimal assembly, include assembly hardware, and have foot plates for bolting to the floor. Rectangular tubing frame is 1" x 2" and tubing handrails are 1½" dia. Individual pieces are 30"W overall and guardrails are 42"H above platforms. Steel construction with yellow powder-coat finish. Meet OSHA Standards.

Configurable Cantilevered Rolling Ladders

TRI-ARC SIGNATURE SERIES · U-DESIGN CONFIGURABLE LADDERS

- 300-lb. load rating
- Clearance height to floor is 2" less than platform height
- 50° climbing angle
- Unsupported and supported cantilever platforms are available in 20", 30" and 40" depths
- Meet OSHA and ANSI Standards

Design a customized cantilever platform by selecting a model based on environment and application requirements. 5" x 2" polyurethane swivel casters have total-lock brakes. Steps are 24"W. Unsupported models have 30"W overall width; supported models have 41" overall width. Guardrails are 42"H, rectangular tubing frame is 1" x 2", and tubing handrails are 1½" dia. Yellow powder-coat finish. Cantilever Ladder Support Conversion Kits convert unsupported cantilever to supported cantilever.

Spacesaver Crossover Bridges

Cotterman®

4-Step 21VC70

- 500-lb. load rating
- 24"W and 5"D steps
- Serrated or diamond plate treads
- Gray powder-coat finish
- 70° climbing angle

These crossover bridges allow you to walk safely over high traffic areas, equipment, duct work, or other obstacles providing mobility and access to needed areas. Steeper 70° climbing angle provides a less overall footprint. Constructed of rugged welded aluminum or steel 4" toe boards and mounting holes on legs.

BILJAX Haulotte

Indoor Rolling Utility Work Platforms

- Yellow powder-coat finish
- Lightweight
- Can easily be set up and dismantled by one person
- Platform adjusts every 2" in height
- Roll from room to room without disassembling
- 5"-dia. casters with locking wheels

Pro-Jax® lightweight, all-steel scaffolds are designed for indoor use. Plywood deck platform has steel frame and supports. Casters are removable for use on stairs. Knurled rungs. Outrigger needed when increasing platform height. Ideal for electrical, painting, acoustical, and finishing work; window cleaning; sign installation and maintenance; building maintenance; and HVAC installation.

Note: Guardrails are required by OSHA on all platforms 10 ft. or higher.

BILJAX Haulotte

Indoor/Outdoor Rolling Tower Work Platforms

- Yellow powder-coat finish
- Provide larger platform for multiple persons and materials
- Greater height capability than utility scaffolds
- Can accommodate longer length requirements
- 8"-dia. casters with locking wheels

Complete systems assemble quickly and easily; frames, braces, inserts, attachments, guardrails and workboards. High-strength steel tubing frames have coped and arc welded perimeter joints. Large, adjustable-height work platforms and easy-access guardrail system. Order accessories separately to reconfigure or expand existing tower systems.

Scaffold Towers

METALTECH®

- Towers meet OSHA, ANSI, and CSA requirements

Jobsite Series—Suitable and safe for all types of interior work and can be easily stackable up to 3 units high. Steel construction with yellow powder-coat finish. Include 5" casters for easy mobility.

Saferstack Contractor Series—Complete scaffold tower is 2 sections high with safety guardrails and platforms. Frames stack in 30% less space than regular models, interlock for safer storage and transport, and help prevent stacked frames from sliding. Constructed with steel, aluminum, and wood with a blue antislip, textured powder-coat finish. 38HT50 includes 4 leveling jacks.

Adjustable Rolling Platforms

STEEL

Werner—Lightweight portable scaffold sets up in seconds. Planks can be positioned at multiple levels. Scaffold rolls on 4 high-grade, mar-resistant locking neoprene wheels. Folds for storage. Meet OSHA and ANSI Standards.

MetalTech—Designed for indoor use, scaffold folds and stores easily. 38HT79, 38HT80 and 38HT59 meet OSHA, ANSI, and CSA Standards.

ALUMINUM

Werner—Lightweight and corrosion-resistant. Double-locking legs allow height adjustment up to 12". Base section includes wood-deck plank and 5" swivel lock casters. Towers include base section, upper and guard rail sections, toe boards, and outriggers. Meet OSHA and ANSI Standards.

Platform 10H719 with Tool Tray 10H725 and Safety Hoist 10H724

Adjustable Rolling Steel Platforms

- Can be easily assembled by 1 person in about 5 min.
- Include four 5" locking casters
- Yellow color

Platform height manually adjusts from 2 ft. to 11 ft. (in 6" increments). Platforms come complete with outriggers, toeboards, and guardrails. Outriggers telescope out on all 4 corners for a better than 3:1 height-to-base ratio. Platforms meet OSHA, ANSI, and CSA requirements.

Order accessories separately to reconfigure or expand existing tower systems.

Cotterman® Truck/Trailer Access Ladder

- 800-lb. load rating

Offers easy entry to tractor trailers and cube vans where loading docks or bays are not available. Ladder can be easily moved on two 10"-dia. rear wheels. Features slip-resistant strut treads and 36"H handrails (42" in California) with removable snap hook chains. 50° climbing angle for easy descent. Meets OSHA and ANSI Standards.

No. of Steps	Platform Length	Platform Width	Step Width	Bottom Width	Base Depth	Item No.
5-Step	24 in	27 in	24 in	27 ½ in	69 in	**5FZE6**

Refrigerator Truck Rolling Access Platform

- Height adjusts in 4" increments

Provides fall protection during routine maintenance and inspection of refrigeration units on small- to medium-sized box trucks. 24"L x 120"W platform provides a comfortable and safe work surface. Serrated tread surface for slip resistance and drainage; ladders on both sides for dual access. Reinforced lifting points accommodate adjustability using standard engine puller and designated lifting point for using rope and bucket for bringing items from ground to platform.

Height	Platform Width	Depth	Overall Height	Load Capacity	Item No.

All-Welded Steel Single-Sided Rolling Work Platforms

Cotterman® Easy 50®

- Assembled
- 800-lb. load rating
- Meet OSHA and ANSI Standards
- Gray powder-coat finish
- Includes handrails (except for some 2-, 3- and 4-step platforms)

Accommodate two people. 50° climbing angle allows easy descent. Lock work platform on front rubber pads to prevent unwanted movement; release the lock to allow the ladder to roll on 4" casters; swivel in front, rigid in rear.

2-Step

Adjustable-Height Steel Work Platforms

Cotterman®

- 800-lb. load rating
- Meet OSHA and ANSI Standards
- Gray powder-coat finish

Achieve a comfortable working height and eliminate unnecessary reaching. Legs adjust individually to accommodate uneven floors or obstructions. Grip strut. Open grid platform and tread allow liquids to drain quickly. For oily, wet, or outdoor environments.

1-Step—Create larger elevated work areas by placing them side-by-side or end-to-end. 6" to 9" and 10" to 15" have 2½" rubber pads on all four legs.

2-Step—Adjusting device keeps the step rise equal when platform height adjustment is made. Ship fully assembled.

Cotterman®
Adjustable Work Stands with ErgoMat Deck

- 800-lb. load rating
- Durable, powder-coat finish

Platforms adjust to the desired working height and can be placed side-by-side or end-to-end for a larger standing area. Ergonomic matting reduces fatigue and provides additional comfort when standing for long periods of time. Adjustable legs accommodate uneven floors.

Cotterman®
Welded-Steel Safety Cages

- Gray powder-coat paint finish
- Meet or exceed OSHA Standards

SAFETY CAGES

Modular cages help make existing fixed ladder OSHA compliant. Cages mount to the side rails of fixed ladders up to 20"W. Top and middle sections have a 29" I.D.; bottom section flares to a 34" I.D. for easy entry. Include mounting hardware for flat or angle side rails.

To determine proper length, the cage should begin 7 ft. to 8 ft. from the floor and extend 42" above the landing surface (except for hatchways). Use this figure to build a combination of one bottom section, plus middle section and top sections for ladders with 42" extend handrails.

LADDER GUARD

Cotterman®
Fixed Welded-Steel Ladders with Safety Cages

- 300-lb. capacity
- Gray powder-coat paint finish
- Provide step-off points from 13 ft. to 29 ft.

Allow solid climbing and safer landing access. Safety cages come welded to ladder for quick-and-easy assembly. Cages and walk-thru handrails extend 42" above landing surface for easier access. Cage begins 7 ft. from bottom of the ladder and has flared bottom opening for easy entry. Ideal for raised platforms and roofs. Meet or exceed OSHA and ANSI standards.

Steel With Walk-Thru Handrails

How to Choose What Service Classification You Need

WEIGHT CAPACITY	INPUT VOLTAGE	LIFT SPEED	CHAIN LENGTH (Lift)	LOAD MOVEMENT	NUMBER OF LIFTS	START/STOPS	OPERATING TIME
Determine the max. weight you need to lift. (include lifting, supporting, and positioning devices).	What is the nominal voltage (±10% of rated voltage) in your facility? Single-Phase 115 or 230V 3-Phase 208, 230, or 460V.	What speed do you want to lift the load? Industry standard for ⅛ to 1 ton is 16 ft./min. (fpm). 2 ton is 8 fpm. For flexibility consider a variable-speed lift.	Measure from the point of mount to the floor.	What is the actual distance the load must be lifted and lowered?	Determine the number of lifts per hour for the job.	How many times does an operator activate the push-button control? Rule of thumb: 8 start/stops per cycle (load lift and lower).	Hoists have a "Service Classification" rating. To determine this classification for your job, use the following calculation: Minutes Run Time = Feet of Load Lift x Lifts per Hour x 2 ÷ Hoist Speed Then calculate: % On Time = Minutes Run Time ÷ 60
Ex: 2400 lb. includes all the components of the load (pallet, drum, sling, etc.).	Ex: 230V	Ex: 8 fpm	Ex: 12 ft.	Ex: 7 ft.	Ex: 15	Ex: 120 start/stops	Ex: 12 ft.

Hoist Service Classifications

Service Classification	Total Equipment Running Time	Max. Start/Stops Per Hour	Typical Areas of Application
H4 - Industry Standard	Approaching 50% of the work period	300	High-volume handling in steel warehousing, machine shops, fabricating plants, mills, and foundries. Manual or automatic cycling operations in heat-treating and plating operations.
H3	Not to exceed 25% of the work period	150	General machine shop, fabricating, assembly, storage, and warehousing use, where loads and operation are randomly distributed.
H2	Not to exceed 15% of the work period	75	Light machine shop, fabricating industries, and service and maintenance work, where loads and use are randomly distributed with capacity loads infrequently handled.

Note: For higher duty cycles, refer to the Air Hoist section.

452R33

452R42

Dayton

H4-Rated Single-Speed Electric Chain Hoists

- Lubrication: grease
- Positive braking, under all load conditions
- Include chain container
- Heat-treated steel alloy
- Meet ANSI/ASME B30.16 UL 1340

Brake stops and holds the load, even with loss of power. Rigid top and swivel load hooks provide positive load engagement. Include overtravel prevention system. Overload limiting clutch prevents hoist damage from heavy loads. 15-ft. power cord. Dual-voltage hoists reconnect for use at 230VAC.

Note: Replacement parts available on Grainger.com

Dayton

H3-Rated Single-Speed Electric Chain Hoists

- Gears are enclosed in grease case
- Electric disc motor brakes
- Thermal overload protection
- Chain container included
- Hardened alloy steel chain
- Meet ANSI/ASME B30.16 UL 1340

Latch-type hook provides positive load engagement. Brake stops and holds the load, even with a loss of power. Offer up to 18-min. "On" time per hr. with full thermal protection. Upper and lower limit switches prevent chain overtravel.

H4-Rated NER 3-Phase Electric Chain Hoists

- Dual speed via under-the-cover variable frequency drive
- Count hour meter and chain container
- Plug-in pendant and power cord
- Low-profile upper and lower limit switches
- 10-yr. warranty on brake
- IP55 rated for indoor or outdoor use
- Meet ANSI/ASME B30.16 and UL 1340
- RoHS Compliant

Designed for heavy- and severe-duty applications.

H4-Rated NERP 3-Phase Electric Chain Hoists with Push Trolley

- Push trolley operates on S or W beams
- Side guide rollers for smooth travel
- High-strength, Grade 80, nickel-plated load chain
- Includes chain container
- Meet ANSI/ASME B30.16 and UL 1340
- RoHS Compliant

Hoist and trolley rated IP55 for indoor or outdoor use and are built to handle heavy- and severe-duty applications.

H4-Rated NERM 3-Phase Electric Chain Hoists with Motorized Trolley

HARRINGTON

- Lightweight, die-cast aluminum body
- Fan-cooled motor with 60-min. duty rating
- Grade 80 nickel-plated load chain
- Chain container included
- Upper and lower limit switches
- Trolley operates on S or W beams
- Rubber bumpers and drop stops
- Meet ANSI/ASME B30.16 and UL 1340

Hoist and trolley are suitable for indoor or outdoor use. Electromagnetic brake will not release unless motor is energized. 5-pocket load sheave reduces chain vibration. Side guide rollers for smooth travel along beam.

Note: See Grainger.com® for variable-speed options.

H4-Rated SNER 1-Phase Electric Chain Hoists

HARRINGTON

- Compact, die-cast aluminum body
- Heat-treated, Grade 80 nickel-plated chain
- Chain container included
- Easy-access control panel
- Long-life friction clutch
- Meet ANSI/ASME B30.16

Hoist is suitable for indoor or outdoor use. Pull-rotor motor brake with no brake coil to fail. Load sheave design reduces vibration and wear. Cast-iron chain guide provides smooth, quiet operation.

H4-Rated 1-Phase Electric Chain Hoists with Trolley

HARRINGTON

SNERP WITH PUSH TROLLEY

- Pull-rotor motor brake for reliability
- Hinged control panel, sealed housing, and durable load sheave
- Push trolley provides extra mobility
- Suitable for S or W beams
- Meet ANSI/ASME B30.16

SNERM WITH MOTORIZED TROLLEY

- Vibration-reducing load sheave
- Durable pull-rotor motor brake
- Low-headroom design
- Grade 80 nickel-plated load chain
- Chain container included
- Trolley operates on tapered or flat beams
- Side guide rollers for smooth movement and reduced wear
- Includes drop stops and rubber bumpers

H2-Rated Single-Phase Electric Chain and Wire Rope Hoists

Dayton

- Gears are enclosed in a sealed grease case
- Electric disc motor brakes
- Thermal overload protection
- 1000- and 2000-lb. models include chain container
- Hardened alloy steel chain
- Meet ANSI/ASME B30.16 UL 1340

Ideal for applications that require multiple lift points. Commercial-duty hoists feature latch-style swivel hooks for positive load engagement. Brakes stop and hold load, even during power loss, while upper and lower limit switches prevent chain overtravel. 12-min. "On" per hr. duty cycle. Include 13", 3-prong plug power cord.

Electric Chain Hoists—¼-ton, 800-lb., and 1-ton capacity hoists are double-chained.

Electric Wire Rope Hoist—Paddle limit switch provides positive protection in the "Up" direction.

Single-Phase Dual-Speed Electric Chain Hoists

HARRINGTON
A KITO GROUP COMPANY

6HJP7

- Heat-treated gearing
- High-performance friction clutch
- Compact and lightweight, die-cast aluminum body
- Precise load positioning
- Chain container included
- Corrosion-resistant, nickel-plated load chain
- Meet ANSI/ASME B30.16, ASME HST-1, and NFPA 70 Standards

Single Adjustable Speed V—Engineered with Smart Speed Technology so you can change the factory set speed to a higher speed with a simple adjustment inside the hoist. These compact units provide low headroom and are easily installed, transported, or stored. Perfect for industrial and commercial applications.

Dual-Speed—Low speed can be adjusted from 0 to 100% of maximum speed by setting a screw within pendant.

Ergonomic Dual Adjustable Speed—One-handed cylinder control frees other hand to easily position load. Rocker switch above handgrip permits easy low- and high-speed selection, while finger turn knobs set speeds from 0 to 100%.

OZ LIFTING PRODUCTS LLC

½-Ton 30-Ton

¼- to 30-Ton Manually Operated Hand Chain Hoists with Overload Protection

- Load-tested at 150% capacity
- Forged alloy steel hooks with cast-steel safety latch and bolt-and-lock nut
- Weatherproof load-holding Weston-type brake with twin pawl design
- Fully enclosed gearing to protect from debris and contamination
- Meet HMI and ANSI/ASME B30.16, CE, AS 1418.2 Standards
- 48RD59 meets ASME B30.16 Standards

When activated, factory-set overload protection will not let hoist operate, but allows operator to lower load (if lifting) or release load (if pulling). Hand-wheel design enables hand chain to feed directly into wheel sprocket from any direction or angle. Lower block has a thrust bearing, allowing easy rotation of a suspended load without twisting load chain.

Load Capacity	Pull to Lift Rated Load*	Min. Between Hooks	Housing Length	Housing Width	Housing Depth	10 ft LIFT Item No.	20 ft LIFT Item No.

Ratchet Pullers

Dayton® WESTWARD® MAASDAM POW'R-PULL

Use to assist with efficient lifting, towing, pulling and tensioning. Large ratchet diameter with high tooth count permits accurate positioning of loads. Zinc plated, heat treated steel latch hooks resist corrosion.

CABLE PULLERS

- Meet ASME B30.21 Standards

Positive locking ratchet mechanism on Dayton models. Dual interlocking ratchet-drive design on Westward models that centers load stresses across unit for easier operation while lifting or pulling. Heavy-duty aircraft cable helps withstand high tension and heavy loads. $\frac{3}{16}$" cable dia.; except 61LA34 is ¼".

WEB PULLER

- Meets ASME B30.21 Standards

Dual interlocking ratchet drive mechanism for long-lasting durability in electrical utility work, construction, and industrial maintenance/repair operations. 1⅛"W nylon strap.

ROPE PULLERS

Ideal for recovering vehicles, securing material to trucks, handling logs and stumps, moving boats and trailers, transporting furniture, and clearing debris. Single interlocking ratchet design. Can accommodate an unlimited length of ½" dia. rope.

** Dimensions given are for minimum I-beam and will vary with larger beams.*

Caution! Obtain professional structural engineering assistance to determine load carrying capability of new and existing structural steel beam work.

Dayton HARRINGTON

Beam Clamps

- For commercial, construction, and industrial applications
- Adjustable to fit a wide range of beam sizes

Provide a temporary or permanent mount to tapered or flat I-beams. In addition, they position the load beneath the center of the I-beam. Designed to reduce I-beam stress by applying the load inside of the flange edge. Include suspension bar. Comply with ASME Standards.

4ZW25

HARRINGTON

½- to 10-Ton Push Trolleys

- Load equalizing suspension
- Maintenance-free sealed ball bearings
- Fit both tapered and flat-flanged beams
- Meet ANSI/ASME B30.11 Standards

23XR94

Feature specially designed contoured wheels that fit both tapered and flat flange beams. Load equalizing suspension distributes the load to all wheels. Sealed precision ball bearings are lubed for life and offer smooth movement, with low friction and long life.

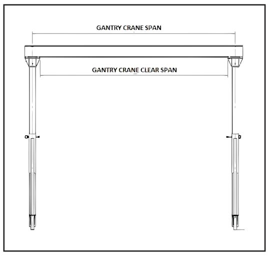
Adjustable- and Fixed-Height Gantry Cranes



- Balanced design for easy rolling even under load
- Simple, bolt-together construction
- Easy set-up and maintenance
- Conform to AISC, OSHA, and CMAA Specifications

Adjustable-Height Aluminum—Lightweight, all-aluminum gantry cranes are perfect for applications where crane weight is critical. Height and span are adjustable. Height adjusts down from maximum in 6" increments.
- 4 phenolic swivel casters

Adjustable-Height Steel—Heavy-duty, supported leg design. Adjustable span on 10- to 16-ft. models. Height adjusts down from maximum in 12" increments.
- 4 steel swivel casters

Fixed-Height Steel—Designed with supported legs for heavy-duty applications. Adjustable span is standard. Assembly instructions provided.
- 4 steel swivel casters

Portable Steel and Aluminum Gantry Cranes

- 4 swivel casters
- 2 uprights and 1 crossbar I-beam

Accept most manual and electric hoists and trolleys (not included). Ship unassembled.

Heavy-Duty Steel—Casters feature a 4-position swivel lock in 90° intervals.

Heavy-Duty Aluminum—Suitable for two-person assembly in the field or where repeated assembly and knock-down is required. Pinned-together modular design completely disassembles. Casters feature 4-position swivel locks in 90° intervals.

Adjustable-Height Models—Adjust in 6" increments by using come-along, fork truck, or overhead crane (not included). Uprights have ratchet puller/come-along attachment points.

Jib Cranes and Mounting Kits

Caldwell
HARRINGTON A KITO GROUP COMPANY

Cranes accommodate most standard trolleys that support electric or manual hoists. Anchor bolts not included. Mounting kits support hoists and trolleys (not included).

WALL-MOUNTED

Rotate up to 180° in large applications. Up to 35-ft. span on tie rod style. Heavy-duty fittings made with roller bearings and zerk fitting for easy field lubrication. Easily mount to reinforced columns or walls. Include beam with end stops, fitting kit, and assembly hardware. Painted safety yellow.

BASE-MOUNTED PILLARS

Rotate 360° on tapered roller bearings with self-aligning guide rollers. Heavy gussets reinforce base plates to ensure alignment and rigidity. Rolled steel, wide-flange beams provide smooth trolley travel, with stops at both ends. Concrete footing required.

Steel Davit Cranes

Individually tested and certified at 125%. Each davit crane features 360° rotation with four different boom height adjustments. Optional AC and DC winches. Cranes include mounting base and steel cable.

Cap.	Lift Range	Finish	Base Type	115V AC OPERATION Item No.	12V DC OPERATION Item No.	MANUAL OPERATION Item No.

Truck/Floor-Mount Jib Cranes

Mount to truck trailer bed or floor. Crane swivels 360°, and boom manually telescopes. Steel construction with painted finish. Mounting base has predrilled holes (hardware not included).

MANUAL WINCH

- 8" x 8" base plate

Boom is raised with manual hydraulic hand pump. Cable winch raises and lowers the lifting hook.

POWER WINCHES

- 12" x 12" base plate

DC Models

50-ft., 3⁄16"-dia. wire cable and 12½-ft. power cord for attaching to truck battery (battery not included). Handheld remote control on 8-ft. cord.

AC Models

25-ft., ¼"-dia. wire cable and 9-ft. power cord have molded plug. They operate with toggle switch on side of winch.

CompOZite Davit Cranes

DAVIT CRANES

Cranes use a combination of advanced composite materials and Mil-Spec, zinc-plated steel to create a light, long-lasting, and easy-to-use system for lifting. Composite material also has excellent corrosion resistance. Each crane is proof tested and includes a test certificate.

MOUNTING BASES

Include mounting pattern template. Wall-mount base has a 360° swivel angle.

CABLES

Galvanized assembly is good for general purpose use, and stainless steel is ideal for corrosive environments.

Cap.	Lift Range	Finish	Operation Mode	Item No.

Counterbalanced Mobile Floor Cranes

Counterbalanced design eliminates the need for front legs. Allows easier maneuverability in tight and hard-to-reach areas. Boom is raised with a manual hydraulic hand pump.

Cap.	Lifting Height Max. (in.)	Lifting Height Min. (in.)	Boom Length (in.)	Item No.
500	90 in	5 in	53½ a 77½	5XPG3
1,000	90 in	5 in	53½ a 77½	5XPG4
2,000	96 in	15 in	53½ a 77½	5XPG5

Handheld Vacuum Cups

Units feature a rubber platform, red-line vacuum indicator, check valve, and instant-release lift tabs. All except 55JG32 include carrying case.

55JG32

55JG33

Cup Size	Handle Material	Max. Load Capacity	Item No.
6 in Dia	ABS Plastic, Aluminum	60 lb	**55JG32**
8 in Dia	Fiber, Nylon	125 lb	**55JG33**
8 in Dia	Metal	125 lb	**55JG34**
9 in Dia	Metal	150 lb	**55JG35**
10 in Dia	Metal	175 lb	**55JG36**

Handheld Vacuum Cups

Attach to most nonporous surfaces without marring or scratching. For metal, glass, stone, concrete, laminates, and plastics. A finger-operated vacuum pump removes air from between the load and the rubber vacuum pad to hold the cup in place. A red-line indicator provides a visual warning if cup should lose holding power. Include a heavy plastic pad protector, except 2MDE3 and 2MDE4. 6A985 to 6A988 include a plastic carrying case.

Plate and Beam Clamps

Clamps are equipped with a safety mechanism, ensuring the clamp's gripping surface remains in contact with the plate when no load is applied or during no load conditions. All clamps are proof tested prior to shipment.

WARNING: Use the proper size clamp for the load. Lift only one plate at a time when using vertical plate lifting clamps. See the manufacturer's manual for additional warnings.

Pallet and Adjustable Load Lifters

Lifters allow the user to convert an overhead crane into a lift truck to handle palletized loads. No slings or chains necessary. **Adjustable load lifter** has 40$^{11}/_{16}$" min., 52$^{11}/_{16}$" mid., and 64$^{3}/_{16}$" max. throat heights. **Pallet lifters** have 48" throat height. Meet ASME B30.20 Standards.

Load Indicators, Crane Scales, and Crane Dynamometers

22F450

49P426

TRACTEL

Load Indicators, Wireless Base Layer—Precision force sensors measure forces and indicate loads. Accuracy: ±0.2%.

Load Indicators with Remote Display—Measure hanging loads (lb./kg) and tensile forces (N). Accuracy: ±0.1% (22F449 and 22F450) and 0.2% (22F443 and 22F444).

RON CRANE SCALES BY EILON ENGINEERING

Crane dynamometers are load indicators used to measure hanging loads. User-selectable units of measure and calibration. See Grainger.com® for more information.

Crane Dynamometers with Wireless Remote—Programmed to ensure that received and indicated values are identical to transmitted value. Long transmission range up to 450 ft./150m.

Crane Dynamometers with Wired Remote—Remote indicator reads measured data on all models up to 300 ft.

Crane Scales with Wireless Remote—Cage protects against external shocks. LCD with remote IR control.

Lifting Magnets

MAG-MATE®

Require no electricity to operate.

PowerLift Rare Earth—Reduce the chance of dropping a load due to a power failure. On/Off magnet with a locking system ensures that the magnet is ready. Magnets can be used on flat or round surfaces. For handling steel plates, billets, blocks, and containers. RFID enabled. 3:1 design factor. Meet ASME B30.20 Standards.

BasicLift—Full-width cam releases angle iron or strip steel. Stainless steel casings. Large lift lug accommodates most crane hooks. Max. temp.: 300°F. 2:1 design factor.

Creative Lift Ceramic—Nonmarring roller cam release requires less torque to release parts. Rust- and chip-resistant stainless steel casing. For thick nonflexing metal. Max. temp.: 300°F. 3:1 design factor. Meet ASME B30.20 Standards.

Trigger Lift—For removing hot metal parts from cutting tables. 1-handed trigger release. Lightweight aluminum housing. Max. temp.: 300°F.

Sheet Handlers—Lift or move stacked steel plates. 1 sheet at a time.

Power Grips—Securely grip steel plates, sheets, or parts. Loop handle makes it easy to move items.

Parts Retriever—T-handle makes it easy to release parts after retrieval. For use where small parts need to be counted or collected.

Grip Sticks—Reach tight spots with long straight end or 10° angled end. Lightweight aluminum shaft with interchangeable grip and magnet.

Salvage Magnets—Suitable for use in both wet and dry environments for coating, stripping, plating, and chemical operations.

Sheet Fanners—A magnetic field separates the steel sheets. Fanner height should be 2" to 3" higher than the stack.

Manhole Cover Lift System—Combined dolly with magnets to eliminate the need for pry bars when handling manhole covers or lids. Dolly adjusts to lift most manhole covers or lids.

VersaLift—On/Off magnet with test feature. Can be used on flat or round surfaces. RFID enabled, supports custom pole shoes. 3:1 design factor.

ERIEZ

Lifting Magnets

Safely lift and transfer steel and iron without slings, hooks, or cables. Use individually or in series with a spreader beam. Capacity is lower on thinner materials. Paint, coatings, scale, or other materials on the contact surface may significantly reduce holding power. Conform to ASME B30.20.

For more information on Eriez Lifting Magnets, see documentation on Grainger.com®.

SafeHold Manual On/Off—Permanent, 2-pole magnets lift round and flat materials without electricity. Include hook bale.

SafeHold Automatic On/Off—Suitable for lifting flat materials from burn tables and where access is limited. Permanent magnets; no electricity required. Turn on or off automatically each time they go through a full lift cycle. Include lifting eye.

Selecto Electric—Lift/Off/Drop switch is top-mounted. Magnetizing requires 115VAC electric power. Includes lifting eye.

Dayton

Permanent Lifting Magnets

Lightweight, small-volume magnets are easy to transport, provide a more effective use of available floor space, and increase stacking height. Large, heavy pieces can easily be moved by one operator. Can be used with both flat and round components. Stable structure is made with high-energy rare earth NdFeB magnets. Use with spreader beam to handle long plates, pipes, or bars.

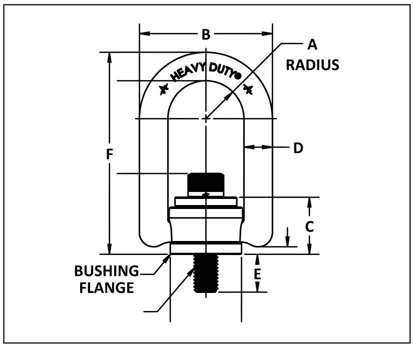
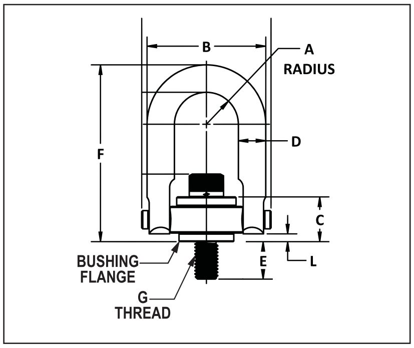
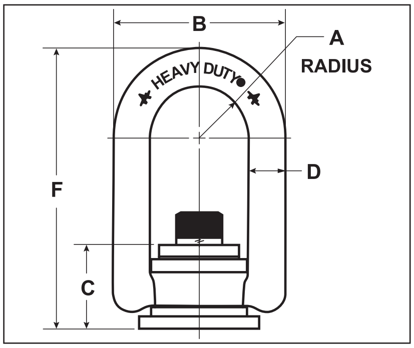
Pivot Only



HDHR/ENHDHR/HDHRM



SEHR/SEHRM



WMHR

Hoist Rings

PIVOT-ONLY

Rings are built with forged chrome moly steel, with black oxide finish. Heat-treated and pivot 180° under load. 6:1 design factor.

EN-GUARD ENHDHR

Designed with 4140 alloy steel. Corrosion-resistant electroless nickel finish. Serialized; disassemble and reassemble for easy inspection. Rings bolt-on and swivel 360° and pivot 180° and have 5:1 design factor.

HDHR AND HDHR-METRIC

Rings feature forged 4140 alloy steel with black oxide finish. They have individual serial numbers. Bolt-on and swivel 360° and pivot 180° under load. 5:1 design factor.

SEHR, SEHR-METRIC, AND SEHRSS

Rings are serialized, bolt-on, and feature 5:1 design factor. They swivel 360° and pivot 180° under load. SEHR and SEHRM rings are designed with 4140 alloy steel and black oxide finish. SEHRSS are designed with 300 series stainless steel.

WMHR

4140 alloy steel construction with black oxide finish. Welded and swivel 360° and pivot 180° under load.

† Magnetic particle inspected per ATSME 1444. # Complies with ASME B30.26

Bolt-On Hoist Rings

RUD®

Swivel load rings maintain working load limit (WLL) during lift without unintended loosening and adjust to the load direction. Heat-treated alloy steel with a high-visibility fluorescent pink powder coating that permanently changes color at increased temperatures. The color changes to a deep black with small bubbles if the chain/component reaches 752°F to indicate overheating. Attach to machinery or static loads to lift, move, or position with a lifting sling. 100% electromagnetic crack detection according to EN 1677, except INOX-STAR and VLBG-Plus.

WARNING! Working load limit of an assembly is determined by the component with the lowest working load limit; do not exceed.

Powerpoint—Universal connection for hook-and-ring assemblies, round sling, loop, endless sling, and more. Double ball bearing enables friction-free turns, swivels, and tilts. Maximum working load limit (WLL) with smallest thread diameter.

Starpoint—Swivel eyebolt rotates 360°, adjusts to the direction of the pull, and allows for full engagement of the bolt. Come with tightening key.

Starpoint Eye Nuts—Pivots 360° for an easy adjustment in load direction. Can be side-loaded when adjusted to the correct plane. Available in metric sizes. Safety factor: 4:1.

INOX-STAR Eyebolt—Stainless steel eyebolt pivots 360° in load direction. Body and bolt are designed with Duplex Steel 1.4462 that offers high resistance in sea water and in environments with a high concentration of chlorine ions.

VLBG—Engineered with lifting points that pivot 360°; foldable suspension ring pivots 180°. Designed with a captive, but exchangeable, 100% crack-tested bolt and clear marking of the minimum WLL for all loading directions. Safety factor: 4:1.

VLBG-Plus—360° swivel hoist rings with typically higher working limit in all directions. Bracket adjustable in force direction.

VWBG-V—Double ball-bearing hoist ring is designed for heavy loads which need to be twisted and turned. Pivots 360° so it can be loaded in all directions. 100% crack-tested with a 4:1 safety factor.

RUD®

Weld-On Load Rings

Tested weld-on lifting points are made from high-quality steel, and heat-treated for increased strength. All parts are 100% electromagnetic crack detected according to EN 1677 and have clear identification of nominal WLL. Safety factor: 4:1.

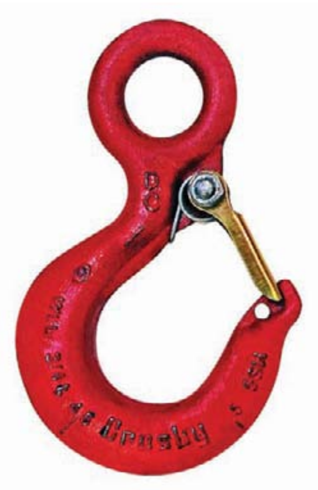
Grab Hooks

Excellent for use with chain-to-chain hooking, over-the-road safety chains, vehicle stabilization, and general applications in place of slip hooks. **B/A Products Grade 70 and 80 Steel** feature a Twist Lock design which prevents accidental release of chain from hook connection and also prevents inadvertent rehooking. **Yoke Grade 100 Alloy Steel** features supporting wings to prevent chain link deformation.

29WR16



29WP90

Crosby Slip Hooks

Ideal for applications requiring chain or cable to pass through the opening without binding. Forged hooks are quenched and tempered providing maximum strength without excessive weight and bulk. Deformation indicators help determine if throat opening has changed indicating abuse or overload. Angle indicators indicate the maximum included angle which is allowed between 2 sling legs in the hook. These indicators also help approximate other included angles between 2 sling legs. Swivel hooks help prevent tangling and help with positioning during connection. Alloy steel hooks are designed with a 4:1 safety factor; carbon steel are designed with a 5:1 safety factor. Replacement safety latches are available on page 1071.

Master Link Sub Assembly

Swivel Latch Lock

Clevis Pin Latch Lock Slip Hook

Dayton

Grade 80 Chain Sling Components

Build chain slings to meet specific application needs and requirements. Latch lock, slip hooks, and coupling links meet ANSI/ASME B30.9 and OSHA Standards. OSHA requires ID tag on overhead chain slings.

Description	Working Load Limit	Trade Size	Finish	Item No.

Grade 30 Proof Coil Chains

Grade 43 High Test Chain

Grade 70 Transport Chain

Grade 80 Lifting Chain

Dayton LACLEDE CHAIN PEERLESS A KITO GROUP COMPANY

Straight Chains

Grade 30 Coil—Constructed of low-carbon steel for light- to medium-duty use.

Grade 43 High Test—Steel chains have greater tensile strength than proof coil. Use as binder chains for securing loads.

Grade 70 Transport—High-strength, heat-treated chains offer durability for securing loads.

Grade 80 and 100 Lifting—Made from heat-treated alloy steel for overhead lifting and towing applications.

Dayton

General Utility Chains

Durable, welded-steel links are for use as barriers or tailgates in addition to other applications where low-tensile strength is required. Zinc-plated for corrosion resistance. Straight and Twist Link chains meet NACM Standards.

Note: Do not use utility chains for lifting.

Chain Slings

Durable metal ID tag is attached to each sling.

Note: See Grainger.com® to view sling capacities for the lowest angle at which slings are rated for use.

Grade 63 Stainless Steel—Chain and components are rated for overhead lifting. Not for temperatures over 650°F.

Grade 80 Alloy—Manufactured from alloy steel and engineered for superior strength, lightness, and durability. Chain is embossed with Grade 80.

Grade 120 Alloy—Workload limits are up to 50% higher compared to G80. Lighter in weight when you downsize your sling, with higher design factors and improved wear resistance when used at Grade 80 workload limits.

***** Load capacity @ 60° angle.***

Dayton · LiftAll · pewag

Adjustable Chain Slings

Handle odd-shaped, hard-to-position loads using either 1- or 2-point lifts. Proof tested and supplied with certificate of test. Ideal for use where headroom is limited, with portable hydraulic cranes and balanced or unbalanced loads.

Note: See Grainger.com® to view sling capacities for the lowest angle at which slings are rated for use.

Grade 100 Alloy—+25% WLL compared to G80. Pewag chain slings include integrated "XK" shortening hook to adjust chain length. Heat resistant to 400°F. Meet the 20,000 cycle ASTM Standard fatigue test for G100.

Nylon Web Slings

LiftAll® PRODUCTS FOR BETTER LIFTING | STREN-FLEX® STRENGTH & FLEXIBILITY IN LIFTING

- Nylon webbing is recommended for general purpose lifting
- Red core warning yarns indicate wear for easy inspection and replacement
- Required tags show rated capacities and material type
- Meet OSHA 29 CFR 1910.184 and AMSE B30.9 Standards

Endless–Type 5—Versatile slings economically priced for use in all three types of hitches: vertical, choker, and basket. Spread sling legs for improved load balance. Sling rotates to minimize wear.

Flat Eye and Eye–Type 3—Popular slings for use in all three types of hitches. Easier to remove from beneath the load than sling Types 1, 2, and 4.

Reverse Eye–Type 6—Features reinforced eyes and wear pads on both sides of body and eyes for maximum wear resistance. Butted edges are sewn together to double the sling width.

Twisted Eye and Eye–Type 4—Similar to Type 3 except eyes are turned 90° and nest easily on the crane hook.

Universal Link–Type U—Helps extend sling life by protecting webbing from abrasion on rough crane hooks. Features Unilink fitting with Web-Trap on each end for use in three hitch types. Unilinks allow choking from either end to help vary wear points.

Attached Eye Cargo Baskets–Type 9—Light-duty basket sling has a wide body for load stability.

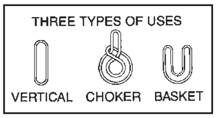
Dayton

LiftAll

Polyester Round Slings



- Color-coded for quick identification
- Sling flattens against load to grip tightly
- Only 3% stretch for better load control

Load-bearing yarns protect from UV degradation and slings are resistant to grease and most acids. Wear points of all endless-style slings shift with each use for maximum sling life. Temperature range: -50° to 200°F. All load fibers protected by two woven covers. Eye and Eye style has an additional wear-resistant cover to extend sling life. Remove sling from service when red striped white core yarns are exposed. Meet or exceed all OSHA and ASME B30.9 Standards.

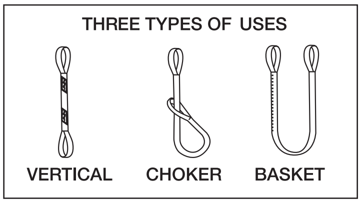
Twisted Eye and Eye - Type 4
Flat Eye and Eye - Type 3
Endless - Type 5



Poly Web Slings

LiftAll

- Woven surface yarns cover each side and carry a portion of the load
- Longitudinal core yarns carry the majority of load
- Red core warning yarns indicate damage
- Tuff-Tag provides serial numbered identification for traceability

Surface yarns are connected side to side to protect core yarns, but also position surface and tensile yarns to work together to support the load. Meet or exceed all OSHA and ASME B30.9 Standards.

Endless-Type 5—Versatile slings economically priced for use in all three types of hitches: vertical, choker, and basket. Spread sling legs for improved load balance. Sling rotates to minimize wear.

Flat Eye and Eye–Type 3—Popular slings for use in all three types of hitches: vertical, basket, and choker. Easier to remove from beneath the load than sling Types 1, 2, and 4.

Twisted Eye and Eye–Type 4—Similar to Type 3 except eyes are turned 90° and nest easily on the crane hook.

Universal Link-Type U—Helps extend sling life by protecting webbing from abrasion on rough crane hooks. Features Unilink fitting with Web-Trap on each end for use in three hitch types. Unilinks allow choking from either end to help vary wear points.

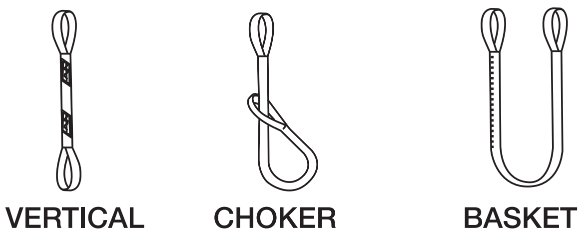
THREE TYPES OF USES



Wire Mesh Slings

- Galvanized high-tensile steel mesh
- Use in basket or choker hitch
- Terminal thickness ½"

Use Roughneck 10-ga. wire mesh slings in metalworking or other industries where loads are abrasive, hot, or tend to cut web slings. Withstand temperatures to 550°F. Plated fittings fit most crane hooks.

Winch Selection Guide

Winch Rating—Pulling capacity or the "rated max. load" for a winch is determined by the max. load a winch can pull with only the first layer of rope on the drum, an industry standard. Full capacity is retained on the first two layers. This rating does not include any friction factors, which will vary according to the specific applications.

Pulling vs. Lifting—Unless specifically indicated, the winches featured are designed for pulling only. Winches may not have all of the features necessary for every lifting application. Winches rated for lifting are marked as such. Winches are not designed to meet hoisting applications. Refer to all ANSI/ASME requirements for specific applications. All of the winches featured are not to be used for lifting, supporting, or transporting people or loads over areas where people could be present.

Power—Most Dayton electric and hydraulic winches have power "in" and "out". Some also have a clutch and/or freewheel feature.

Duty Cycle—Unless specified otherwise, most electric DC and AC powered winches cannot be operated continuously. To do this will overheat and damage the motor. The typical normal duty cycle is 1 to 3 min. ON, followed by a 20-min. cool-down period. For more frequent operation needs, refer to long cycle or longer duty rated electric units, and continuous duty rated hydraulic winches.

ROLLING WEIGHT

Rated Line Pull (RLP)*	Grade 10%	20%	40%	60%	80%	100%
1000 lb.	5025	3401	2155	1664	1422	1285
1500 lb.	7538	5102	3233	2496	2134	1928
2000 lb.	10,050	6803	4308	2816	2407	2175
2500 lb.	12,563	8503	5388	4160	3556	3213
3000 lb.	15,075	10,251	6428	4991	4268	3854
3500 lb.	17,588	11,905	7543	5824	4979	4499
4000 lb.	20,100	13,668	8643	6655	5690	5138
4500 lb.	22,613	15,306	9698	7488	6401	5784
5000 lb.	25,126	17,009	10,776	8320	7112	6427
6000 lb.	30,151	20,408	12,931	9983	8535	7712
9000 lb.	45,226	30,612	19,397	14,975	12,802	11,568

* Most winch ratings are based on the first layer of wire rope on the drum. You could experience a loss of up to 13% pulling capacity per layer of wire rope (see example below)

Rolling Weight—For safe, sure loading, find the column in the table that matches your percentage of slope or grade. Determine the slope by dividing the amount of your rise by ramp length. Match the slope with the nearest weight of what you may be pulling, always round up, and locate the corresponding winch Rated Line Pull (RLP)*. This guide includes 10% rolling friction. Some applications may require larger capacity winches than indicated. To convert lb. to kg. multiply by 0.4536.

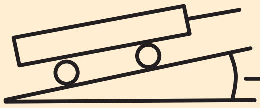
- **A 10% grade is a rise of 1 ft. in 10 ft.**
- **Winches are not intended as a load securing device**
- **Secure load with appropriate tiedowns**

ROLLING LOAD CAPACITY

Maximum Pull Capacities For Rolling Type Loads at Various Angles of Inclines

Percent Incline	Multiply by:	Percent Incline	Multiply by:
Level Surface	10	30 (17°)	2.61
5 (3°)	6.67	50 (26°)	1.86
10 (6°)	5.02	70 (35°)	1.53
20 (11°)	3.4	100 (45°)	1.29

To calculate the rolling load capacity of a winch (the amount of load that can be pulled up an incline), multiply the rated capacity, single or double line, by the factor shown in the chart at the left. Multiplication factor shown includes a 10% rolling friction factor; actual friction factors may vary.



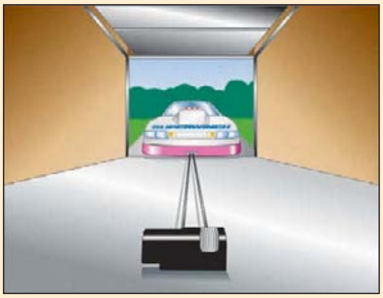
Example of the effect of each layer of cable drum wind on Rated Line Pull (RLP) and rolling loads for a 5000-lb. capacity winch. RLP-The weight the winch can pull perpendicular to the ground with a single line on the first layer of wire rope on drum.

5000 lb. Capacity Winch	RLP	10%	20%	40%	60%	80%	100%
1st layer	5000 lb.	25,126	17,007	10,776	8320	7112	6427
2nd layer	4231 lb.	21,260	14,390	9118	7040	6018	5438
3rd layer	3667 lb.	18,426	12,471	7902	6101	5216	4713
4th layer	3236 lb.	16,258	11,004	6972	5383	4602	4159
5th layer	2894 lb.	14,547	9846	6239	4817	4118	3721

When to Consider a Pulley Block—If you need to offset the winch but retain a straight shot, a pulley block lets you, with a hook for mounting and a pulley for the wire rope. A pulley block also adds to the winch's pulling capacity; simply attach the pulley block's hook directly to the load and the winch's hook to a sturdy mount nearby.

Electrical Performance—To maintain electrical performance from a battery to the winch, it is recommended dropping three wire sizes for every doubling of the length of the standard wire harness.

Example: No. 6 to No. 3 or 2 ga.



FEATURE EXPLANATION FOR CHARTS

1. Clutch Release—Ability to control release of a load with a clutch instead of a winch motor.

2. Freewheel—Ability to pull cable freely from the winch drum by hand under no load conditions.

3. Pulley Block—For double line winch operation and pull redirection. Doubles pulling capacity of winch, but results in lower speed, lower amp draw, and longer run time.

4. Mechanical Brake—Friction within the winch gears or separate friction brake device which automatically holds the load in position when the power switch is released.

5. Dynamic Brake—Electromechanical stopping and holding of a motor that holds a load only when there is power connected to the winch.

TYPES OF GEARING

Planetary Gearing—Has a coaxial shaft capable of large reductions in a small space. Capable of handling high bearing loads.

Worm Gearing—Has right-angle shafting, requires only two gears, and is self locking. Generally provides high ratios.

Spur Gearing—A simple gear design using two or more parallel shafts with gears operating in the same plane. Produces less friction than worm or planetary gearing for greater efficiency. Requires a braking system.

Find more information on winch selection on page 1080.

Medium-Duty

Premium Truck

Heavy-Duty Truck

Heavy-Duty Truck

12/24VDC Electric Winches

Versatile winches for a variety of pulling tasks.

Utility—29JU84 is ideal for use on trailers or hitch mounts. Easy-to-use clutch lever and corded remote control. Use 29JU85 for trailers or the jobsite. Includes durable steel rope, roller fairlead, and remote control.

Medium-Duty Truck—Cone brake holds the full-rated load for trucks and SUVs. Features low-profile design with separate control box. Chip-resistant, powder-coated finish.

Premium Truck—Built to last. Offers durability, style, and performance for trucks, Jeeps, and SUVs. Premium components. Full IP68 waterproofing. Rated to 408 hr. in rigorous salt-spray tests. Large dia. drum for durable rope attachment and long rope life. Convertible control pack for upright or low-profile mounting.

Heavy-Duty Truck—Handles the heaviest winch loads. Features cone brake and chip-resistant, powder-coated finish to resist corrosion. 3EXT2 and 16Y217 include remote-mount control box. 3EXT3 has thermometric indicator for feedback via LED on remote control.

Powersport Winches—All-metal construction with advanced digital controls, built-in load limiter, and clutch design. IP68 waterproof sealing. Modular controls for expandability. Standard-duty permanent magnet motor on 492P72 to 492P77. Use on ATVs and 2-person side by sides. 492P78 to 492P84 feature Motactor (motor + digital contactor) which simplifies winch installation and increases performance. Ideal for ATVs and 4-person side by sides.

Find more information on winch selection on page 1080.

1VN79

1VN80

THERN

115VAC Worm Gear Winches

Power "In" and "Out" with 15 min. of continuous "On" time at full load. Internal mechanical brake provides positive load control for lifting and lowering. Ball bearings and self-aligning bronze bearings provide smooth operation. Corrosion-resistant, cast-aluminum gearbox and drum. Single-phase motor has power cord and push-button control. Winch cable is available separately.

2ZU40 features high-speed direct drive, and includes 8-ft. pendant cord. **1VN79** may be permanently installed in industrial settings. **1VN80** has handles and large wire rope storage.

WARN StrongArm

AC Electric Winches

Include power In/Out. Pulling capacity given as a reference only and does not include friction factors that will vary according to specific applications.

Note: Not recommended for outdoor use or areas where units could get wet. Should be used with a ground fault circuit interrupter.

PLANETARY GEAR

All-steel, high-speed winches have prewired remote on 6-ft. cable with cable tension plate. Includes mounting bolts.

SPUR GEAR

Dutton-Lainson StrongArm models are rugged, high-performance winches with efficient spur gear systems. Pulling capacities are based on third layer of cable rather than the first for a more realistic estimate of actual use. Precision needle bearings provide low friction and longer life. Final drive gears are heat-treated carbon steel for greater strength. Dynamic motor brake and friction brake for load holding. High-impact cover and stainless steel front plate completely enclose cable drum. Factory installed, 10-ft. remote control cord.

Industrial-Duty Hand Winches

- Cable sold separately

Adjustable-length handles to change the force required to lift or pull a load. Use bronze and ball bearings.

Spur Gear with Brake—Automatic Weston-style brake provides positive load control to assist with lifting and lowering.

Worm Gear—Provides load-holding capability when handle is released. Use in applications where fine adjustments may be necessary. 2ZU39 is designed to be operated with 400 rpm max drill drive.

Dayton

Hand Winches

- Cable sold separately

Feature a corrosion-resistant frame, with a rubberized handle grip for added comfort. Floor- and wall-mounted options available.

Spur Gear Without Brake—Designed for applications where it may be necessary to pull the line freely from the winch. Manual ratchet locks the load in position; winch will freewheel with the ratchet released. Not recommended for lifting applications.

Spur Gear With Brake—Designed for applications where freewheeling is not a requirement. Self-activating disc brake system holds load when the handle is released. Include a guard for the brake.

Worm Gear—Provides load-holding capability when handle is released. Use in applications where fine adjustments may be necessary.

LiftAll Dayton

Winch Cables and Winch Strap

Winch Cables—For use on manual and electric winches. Bright winch cables feature carbon steel wire construction. Winches constructed from Galvanized steel help resist corrosion in demanding applications. Stainless steel winch cables are for use in corrosive environments.

Vehicle Tow Cable—Assembled with hooks at each end for easy use. Corrosion-resistant. Includes hook-and-loop cable straps and forged hooks. Do not use for lifting. 2"W.

Vehicle Recovery Straps—Light polymer/nylon fabric eases storage and application. Cut- and abrasionproof straps are for use in all types of weather. Internal warning markers indicate when replacement is necessary.

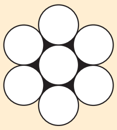
Cable Selection Guide

CONSTRUCTION

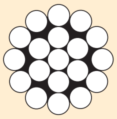
1 x 7 Strand



Attributes—Provides excellent abrasion resistance with low flexibility and low stretch.

Applications—Used as guying wire, tensioning members, and for applications with straight pulling and pushing requirements.

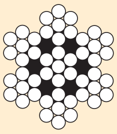
1 x 19 Strand



Attributes—Provides excellent abrasion and compression resistance with limited flexibility.

Applications—Used as guying wire and as tensioning members with pulling and pushing requirements.

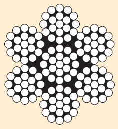
7 x 7 Strand



Attributes—Provides excellent abrasion resistance with good flexibility. Best for strength and flexibility.

Applications—Can be used over small-diameter pulleys and also used as control cable for equipment.

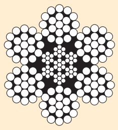
7 x 19 Strand



Attributes—Excellent flexibility, strength, and greatest amount of stretch. Resistant to crushing.

Applications—Can be used over small-diameter pulleys and also used as control cable for equipment.

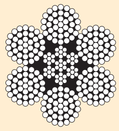
6 x 19 Class IWRC



Attributes—Provides abrasion and crush resistance with excellent flexibility.

Applications—Logging ropes, choker rope, rotary drilling, and cable track lines.

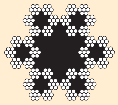
6 x 37 Class IWRC



Attributes—High strength, extremely flexible, and excellent fatigue resistance with super flexibility. Lower abrasion resistance.

Applications—Winch lines, cranes, and towing.

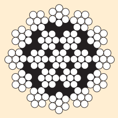
6 x 42 Fiber Core



Attributes—Balanced combination of abrasion and fatigue resistance for machinery operation.

Applications—Winch lines, cranes, and towing.

19 x 7 Strand Core



Attributes—Provides rotation resistance with superior flexibility. Susceptible to crushing and kinking. Extra care must be exercised when using cable.

Applications—Lifting and pulling applications.

MATERIAL TYPES

Galvanized

Galvanized steel provides some corrosion resistance and is an economical alternative to stainless steel.

302/304 Stainless Steel

Good corrosion resistance and more economical than 316 stainless.

Fiber Core

Provides support while remaining flexible. More susceptible to crushing.

Nylon-Jacketed

Provides high flexibility and abrasion resistance. Typically used for drive cables and physical fitness equipment.

Vinyl-Jacketed

General purpose PVC provides high flexibility and superior appearance. Typically used as barriers and lanyards.

Polypropylene-Jacketed

Polypropylene impregnated and coated galvanized steel.

Cable Spool

Precut Cable Length

Dayton

Coated and Uncoated Steel Cable

- Precut cable includes permanent thimble eye on one end; safety-fused on the opposite end
- See Grainger.com® for additional steel cable offering

For use with manual or electric winches. Galvanized steel cable with safety orange vinyl coating provides high visibility for hazardous areas.

Warning: Do not exceed working load limit.

Crosby Steel Tapered Sleeves

Standard steel sleeve terminations have an efficiency rating of 96% with IWRC or 93% with FC based on strength of wire rope. These sleeves are used for wire rope constructions: 6 x 19, 6 x 37, RRL, FC, and IWRC.

Crosby Terminator Wedge Sockets

29WR30

- Meet ASME B30.26 requirements

Sockets secure the tail of the wire rope to the wedge to eliminate wedge loss and the need for an extra piece of wire rope. Also eliminate potential breaking off of the tail from fatigue. Pin diameter and jaw opening allows wedge and socket to be used in conjunction with closed swage and spelter sockets.

Swaging Tools

- For oval- and stop-sleeve swaging
- Heat-treated steel jaw
- Used for making loops and splicing cable
- Easily provide accurate cutting and crimping

Hand Swaging Tools—Single-compression die, except 12R355 is multicompression. 12R359 and 12R360 are scissor-action type. 12R375 is a hydraulic compression tool; includes interchangeable dies and packaged in a plastic carrying case. Include test gauge.

Hand Swager/Cutter—Designed for use with cable up to 3/16" thick. Hardened steel jaws allow tool to taper as it cuts, leaving evenly cut ends.

Hand Swaging Kits—Kits 12R364 and 12R365 include Hand Swaging Tool 12R355, cable cutter, and an assortment of sleeves, thimbles, and stops. Packaged in a steel tool box. 12R364 has aluminum sleeves and zinc-plated steel thimbles. 12R365 has copper sleeves and stainless steel thimbles. Kit 12R376 includes Hand Swaging Tool 12R375 and 6 sets of dies and gauges. Packaged in a plastic case.

Bench Swaging Tool—For shop location and permanent workstations. Fully adjustable. Multicompression jaws. For copper and aluminum only. Includes test gauge.

Chicago Hardware & Fixture Company

Turnbuckles and Swivels

Turnbuckles are made with USA steel for full traceability. Aluminum midget turnbuckles are corrosion-resistant for light-duty applications. Safety snap hooks are forged carbon steel with stainless steel latch, spring, machine screw, and nut; vertical loads are based on a safety factor of 5:1. All swivels are heat-treated and hot-dipped galvanized for corrosion resistance. Drop-forged turnbuckles, except stub ends, meet performance requirements of ASTM F1145, Type 1, Grade 1 Standards for heavy-duty tensioning applications.

Adjustable S-Beam Trolleys

S-beam trolleys are economical, durable, and expandable. Festoon cable trolley runs on various size S-beams (S3 x 5.7, S4 x 7.7, S6 x 12.5).Trolleys roll on 4 steel ball bearing wheels that have a static load capacity of 1000 lb. each; and a rolling capacity of 154 lb. at 262 ft. per minute. Multiple cable saddle configurations provide a variety of cable carrying options for single or dual flat cable or round cable.

16X997 – Coil

16Y047 – Canister

- Packaged in spools, except as noted

ALUMINUM WIRE

- Grade 1100 soft temper
- Max. tensile strength: 15,500 psi

99% aluminum wire is lightweight, matte finish, offers good electrical conductivity, and is fair with corrosion resistance applications.

GALVANIZED ANNEALED WIRE

- Grade 1008-1010 soft temper
- Max. tensile strength: 75,000 psi

Galvanized wire has better corrosion resistance than matte and oil-finished wire.

BLACK ANNEALED WIRE

- Grade 1006-1008 high-carbon wire
- Max. tensile strength: 65,000 psi

Designed for bailing, stove, or pipe wire. Ranges in color from dark gray to brown.

STAINLESS STEEL LOCKWIRE

- Grade 302/304 soft temper
- Min. tensile strength: 75,000 psi

Commonly used as safety-lock wire in food processing and chemical environments.

INCONEL WIRE

- Grade 600 soft temper
- Max. tensile strength: 115,000 psi

Nickel wire is frequently used as a safety-lock wire in harsh environments.

MONEL WIRE

- Grade 400 soft temper
- Max. tensile strength: 85,000 psi

Nickel wire is often used as a safety-lock wire in acidic environments. Provides good corrosion resistance.

Baling Ties and Wire

Painted ties combine the clean handling of a galvanized tie with the ease of tying associated with black annealed ties. Paint coating does not peel or flake. Wire features 65,000 to 70,000 tensile strength with a minimum of 25% elongation.

Storage	Dry	Dry or Wet	Dry or Wet	Dry or Wet
Floats	No	No	No	Yes

CONSTRUCTION

Twisted—Also known as 3-strand. Available in a wide variety of fibers for general purpose uses. Can be easily spliced.

Knit Braid—Braided jacket, usually lightweight and economical. Ideal for applications that require the rope to stretch.

Braid/Solid Braid—Firm, round rope with lock-stitch construction. Maintains shape under load, making it ideal in blocks or pulley applications. Cannot be spliced.

Hollow Braid—Constructed of 8, 12, or 16 strands. Used in marine applications. Can easily be spliced.

Double Braid—Solid braid core covered by a braided jacket. Torque free and nonrotational. High strength, can be easily spliced.

Diamond Braid—Constructed by braiding fibers to form diamond shapes. Rope is often flat or box-like and very easy to splice.

FIBER

Composite—Blend of polyester and polypropylene. Stronger and better resilience to UV rays and other corrosives. Firmer than traditional polyester rope.

Natural Fiber (Cotton, Jute, and Manila)—Knots well and has good abrasion resistance, but not as strong or durable as synthetic fibers. Cotton must be kept dry, and has low resistance to rot, mildew, oils, gas, grease, and chemicals.

Nylon—Excellent shock absorption. It stretches, is rotproof, and resistant to UV rays, oils, gasoline, grease, and nonacidic chemicals.

Polyester—Minimal stretch and high strength. Rotproof and resistant to UV rays, oils, gasoline, grease, and nonacidic chemicals.

Polypropylene—Lightweight, economical fiber, can be made in many colors and floats. Should not be exposed to UV rays or high heat.

SNAPBACK SAFETY WARNING: A dangerous situation occurs if personnel are in line with a rope under tension. Should the rope fail, it may recoil with considerable force. Death may result. Warn people against standing in line with the rope or its bight. To help ropes last longer: AVOID overloading, abrasion, sudden strain, kinks, sharp angles, chemicals, and improper storage. Use correct size rope for job, reverse ends of rope, and keep rope clean.

Rigging Rope

Light-duty polyester solid braid rigging rope is made from economically priced biodegradable fiber yarn, braided into a smooth round rope. Loses no strength when wet.

Twine

Use for a variety of light-duty bundling and binding applications.

Natural Fiber—Including cotton and jute, is biodegradable and has a slightly lower cost. Excellent for parcel shipping, meatpacking and food service, and sewing applications.

Synthetic—Including nylon and polypropylene, offers high resistance to abrasion, rot, mildew, and chemicals. Commonly used in more demanding applications, such as lumberyard binding and bundling, manufacturing, and fishing.

Rescue Rope

STERLING

HTP Static—100% High-Tenacity Polyester (HTP) kernmantle construction gives this rope extremely low stretch and excellent durability, making it ideal for tower construction, raising systems, and industrial safety projects. Polyester also resists moisture and UV degradation. Certified to NFPA 1983:2012.

SuperStatic—High-angle, technical rescue rope designed for rescue system mainlines and belays. 41/59 sheath/core ratio. Ideal for all types of technical rescue, confined space rescue, USAR, and industrial safety applications. 100% nylon, low-stretch kernmantle certified to NFPA 1983:2012.

Floor Protection Film

Temporary Floor Protection Board

Reinforced Kraft Paper

Plasticover™ TRIMACO

Floor and Multisurface Protection

Floor Protection Film—Temporary, self-adhesive film protects multiple surfaces including tile, vinyl, hardwood, VCT, laminates, marble, granite, countertops, and factory-finished hardwood. Applies quickly and removes easily. Can be left in place for up to 60 days.

Reinforced Kraft Paper—Nonadhesive, waterproof, tear-resistant paper can be taped down to protect virtually any surface. Heavy-duty kraft paper is bonded with polyethylene and reinforced threading provides durability for long-term usage.

Temporary Floor Protection Board—Nonadhesive fiber paper board protects against scratches and impact. Recycled content may qualify builder for LEED points.

MAURITZON

STANDARD-DUTY POLYETHYLENE
- Resist UV rays, mildew, and tears
- Rustproof aluminum grommets approximately every 36"

Made from high-density 10 x 10 weave (1000 denier). Lightweight fabric weighs only 3.4 oz. per sq. yd., wet or dry. Seams are heat-sealed with polyethylene rope-lined hems.

Flame-resistant style will not support combustion.

HEAVY-DUTY POLYETHYLENE
- Superior resistance to UV rays, water, mildew, and tears
- Rustproof aluminum grommets approximately every 18"
- Reinforced corners

Made from super-strong 5.4 oz. per sq. yd. heavy-gauge material. Durable 14 x 14 weave (1000 denier).

WATERPROOF VINYL
- Superior resistance to UV rays, tears, and water
- Nickel-plated brass and D-ring grommets approximately every 24"

Lighter than canvas and nonabsorbent. Made from 13 oz. per sq. yd. material and suitable for long-term outdoor use covering trucks, boats, and equipment.

Fire-resistant style will not support combustion.

Heavy-duty models are made from 18 oz. per sq. yd. material for premium resistance to abrasion and punctures.

KEEPER PERFORMANCE ENGINEERED. GOLDLINE® BULK-STRAP SUPPLIER DIVERSITY®

Bungee Cords and Hooks

EPDM Tarp Straps—For heavy-duty strapping jobs. Straps stretch to approximately 1½ times their original length. Extra reinforcement at hook ends. Zinc-plated steel hooks.

Industrial Bungee Cords—Work well in most tarp applications and with heavier loads. Nylon-coated cords have hardened hooks with yellow dichromate finish.

Adjustable Bungee Cord—For light-duty bundling or tie-down assists. Safety tab on polycarbonate hook prevents slipping out of tarp grommets. ¼" dia. Length adjustable up to 36".

Bungee Cord Rolls—Multicolor bungee cords are general purpose. White cord is nylon-wrapped for greater durability

Bungee Hooks—Attach easily to make or repair cords. Includes clamping wire. Adjustable hooks require no tools to install. See hook descriptions for cord sizes.

THE BETTER BUNGEE™

Rope, Hook Ends, and Replacement Hooks

Solid Core Polyurethane Stretch Rope—Industrial strength, high-tech polyurethane stretch rope is a superior replacement to shock cord (no cloth or elastic) will not break, rot, or become brittle and maintains its stretch even under extreme weather conditions. Safely stretches two times its length. Make custom length bungee cords and cargo webs using the adjustable nylon hook ends.

Adjustable Nylon Hook Ends—Patented adjustable hook ends create safer and stronger custom bungee cords. Match hook sizes to rope size. ¼" hook has a 102-lb. break rating, 5⁄16" has a 140-lb. break rating.

Triangular S-Hook Ends—0.188" (3⁄16") galvanized or stainless steel hook with triangular S end, made for safer strap. Gale break rating of 250 lb. Stainless steel break rating of 225 lb.

Rope RATCHET TIE-DOWN

Rope Tie-Downs

Secure a wide variety of loads quickly and easily.

Rope Ratchets—Keep rope locked in place for a firm hold; no webbing or bungee cords required. Thumb-lever provides easy release. Ratchets are made of 33% glass-filled nylon with interior of die-cast zinc and stainless steel springs. Hooks are zinc-plated steel.

Polyurethane Bungee Straps

Industrial strength polyurethane and heavy-duty hook ends make safer, stronger bungee cords and straps. High-tech, lightweight material will not break, rot, or become brittle when exposed to harsh weather elements, oils, or fuels.

Cords—Glass-filled nylon hooks are overmolded into a one-piece cord for superior performance and durability. Max. stretch is two times length. Hook ends have a 180# break rating. Synch cord has loop on one end and hook on the other.

Straps—High-tech industrial strength urethane straps are available with three types of hook ends: S-Hook 2 0.188 (3.16) galvanized steel with a 250# break rating; S-Hook stainless steel with a 225# break rating; or J-Hook fiber-filled nylon overmolded ends (rated at 180#) for nonmarring applications. Two times max. stretch. Straps with slots are adjustable to just about any size and are available with stainless steel or overmolded nylon ends.

BULK-STRAP™ SUPPLIER DIVERSITY®

Custom Strapping, Buckles, and Fittings

CUSTOM STRAPPING

Create custom-length straps with no stitching required.

Nylon—Strong and flexible material has good elasticity and recovery. Absorbs moisture, dries easily, and is mildew- and insect-resistant.

Polypropylene—Material features excellent chemical resistance and low moisture absorption. Floats and is resistant to mildew and abrasion. For lightweight applications.

Polyester—Durable material is quick drying. Resists most chemicals, stretching and shrinking, wrinkles, mildew, and abrasion. For medium- and heavy-duty applications.

BUCKLES AND FITTINGS

Metal or plastic attach without sewing to make finished assemblies.

ANCHOR PLATES

Secure webbing to a solid surface. 1" plates have ¼" bolt hole. 1½" to 2" plates have ⅜" bolt hole. Webbing slots will accommodate 1", 1.5", and 2" webbing, offset at 128°.

PROGRIP CARGO CONTROL

39RH06

Back-Off Technology Cargo Straps

Controlled-release cargo straps allow you to release one tooth at a time. Safe and easy to use, this step release action prevents sudden jerks that might cause a load to fall.

Folding Steel Cargo Bar

Cargo Hoops

Cargo Bars and Decking Beams

Cargo Bars—Hold loads in place.

Folding Steel Cargo Bar—4" square, articulating rubber end pads. 1½" square 14-ga. tubing. Mechanical ratchet will not slip or vibrate. 2-pc. hinged bar folds.

E-Track Decking Beams—E-track bars are used for stocking and cargo control.

Ratchet Load Binder

Lever and Ratchet Load Binders

Ideal for most trucking and marine industry chain binding applications. Drop-forged steel construction. See Grainger.com® for applicable standards.

WARNING: Do not exceed working load limit. Working load limit of an assembly is determined by the component with the lowest working load limit.

Transport Chains and Chain Binders

Binder Chains—Ideal for towing or securing loads to trailers. All have clevis grab hooks, except 1DJV1 has a welded, grab-style hook. Steel construction. Meet National Association of Chain Manufacturers' Standards.

Transport Chains—Gold dichromate color. Meet NACM Standard.

Safety Chains—Tagged with grade and WLL DOT-Approved Grade 70 chain.

Straight Section

90° Curved Section

Light-Duty Rigid-Frame Skate Wheel Conveyors

ASHLAND CONVEYOR PRODUCTS

Conveyors allow users to move flat-bottomed, lightweight loads with reduced effort. Sections connect to build custom conveyor systems. Each section must be supported by compatible conveyor stands, sold separately. Conveyor section load capacity depends on the number and spacing of the support stands. Staggered wheel design.

Aluminum Frame—Lighter than steel for applications with frequent disassembly and reconfiguration of conveyors.

Galvanized Steel Frame—Stronger than aluminum, with better resistance to abrasion and impacts. For assembly lines, shipping departments, and stocking areas.

Note: A minimum of three axles and five wheels should be under the load at all times.

Medium-Duty Extendable Flexible-Frame Skate Wheel Conveyors

CONVEYORS

- Shipped assembled
- 200 lb./ft. max. load, except for 55KR79 and 55KR80 which have 300 lb./ft. max. load

Conveyors have accordion-style, flexible frames that stretch, curve, and contract to change conveyor shape and length. Conveyors collapse for compact storage. Skate wheels help move loads with firm, flat bottoms from one place to another with reduced effort. Adjustable legs can be raised or lowered to change the height of the conveyor from 28½" to 41½", or to adjust the slope. Swivel casters allow the conveyors to be rolled into position. Suitable for loading and unloading trailers, creating temporary assembly lines, and adding length to an existing conveyor.

PIVOTING PACKAGE STOPS

Stops can be raised to prevent items from falling off the end of the conveyor, or lowered to allow items to flow onto other conveyors and surfaces.

ASHLAND CONVEYOR PRODUCTS

Steel and Aluminum Roller Conveyors

Roller conveyors move loads along a downward slope, using gravity to reduce effort required in package handling, warehousing, dock, assembly, or inspection tasks. Rollers provide a stable surface for loads with rimmed or uneven bottoms. Loads can be pushed from side-to-side across the full width of the conveyors. Each section consists of rollers with axles attached to rigid frames. Roller conveyors typically offer more weight capacity than skate wheel conveyors. Sections must be supported by compatible conveyor stands, sold separately. Conveyor section load capacity depends on the number and spacing of the support stands.

Aluminum Frame—Lighter than steel for applications with frequent disassembly and reconfiguration of conveyors.

Steel Frame—Stronger than aluminum, with better resistance to abrasion and impacts.

LIGHT-DUTY

For moving low-weight and low-volume items such as pails and bags. Sections have hooks and pins that connect to create custom conveyor lines.

MEDIUM-DUTY

For moving medium-weight drums, pails, and pallets. Sections have butt plates on the ends that bolt together to create custom conveyor lines.

HEAVY-DUTY

For pallets, drums, and other heavy items. Sections have butt plates on the ends that bolt together to create custom conveyor lines.

EXTRA-HEAVY-DUTY

For very heavy items such as large pallets, castings, sheet metal, and metal bins. Sections have butt plates on the ends that bolt together to create custom conveyor lines.

ASHLAND CONVEYOR PRODUCTS

Telescoping Steel-Frame Roller Conveyors

Frame sections slide in and out to expand for conveying tasks or contract for moving and storage. They are suitable for loading and unloading trailers or adding length to an existing conveyor. Unlike flexible-frame conveyors, roller spacing does not change when telescoping conveyors are expanded or collapsed. Telescoping conveyors have adjustable leg height and can provide a slope that keeps items moving along the rollers. Loads weighing 5 to 40 lb. require a slope of 4" to 6" per 10 ft. For loads over 40 lb., a slope of 2" to 4" per 10 ft. is adequate.

ASHLAND CONVEYOR PRODUCTS

Conveyor Rollers

Replacement rollers support and move bulky items on roller conveyors and material transport stands. They help reduce the effort required to move loads.

Lightweight—Commonly used in unpowered (gravity-flow) conveying applications.

General Purpose—For light-duty and medium-duty unpowered (gravity-flow) conveying tasks in warehousing, package handling, manufacturing, and distribution applications.

Corrosion Resistant—Stainless steel conveyor rollers can withstand frequent washdowns, high humidity, exposure to corrosive chemicals, and other harsh conditions that might corrode steel or aluminum rollers. Suitable for conveying applications in facilities that process food, chemicals, or pharmaceuticals.

Sprocketed—For moving heavy items such as pallets, drums, and bulk containers on heavy-duty chain-drive conveyors. Sprocketed rollers have teeth that engage with the drive chain to prevent slipping in dirty or oily conditions.

High Performance—For high-speed conveying tasks on powered conveyor systems in warehousing, transportation, and sorting operations.

High Durability—Have a higher weight capacity and provide more resistance to impact, shock, and abrasion than general purpose steel rollers. For conveying heavy loads such as pallets, drums, and castings.

Nonmarring—Covered with smooth plastic to prevent damaging delicate surfaces or finishes on conveyed items, such as glass or paint. They are quieter than rollers with metal surfaces, and they also provide better traction.

USDI

Conveyor Roller Bearings

Replace worn or damaged bearings to repair seized rollers and prevent conveyor downtime or malfunction. Sealed bearings prevent dirt and moisture from causing damage and malfunction in wet, humid, dirty, or hot conditions. Close-tolerance bearings fit tighter than general purpose bearings to spin more freely and at higher speeds.

Surface Mount L-Shaped Conveyor Mounting Brackets

ASHLAND CONVEYOR PRODUCTS

Bolt-on, steel construction allows conveyor rollers to be mounted without a conveyor system. L-brackets are commonly used to build custom conveying racks and stands for supporting and moving materials in sawing, machining, and metalworking operations. Mounting hardware sold separately.

VINYL GUARD®

Heat Shrink Conveyor Roller Covers

Tubing shrinks via heat gun to fit tightly over straight and tapered rollers. Protects delicate surfaces and reduces noise and vibration. Resistant to abrasion, chemicals, oils, grease, acids, chlorinated cleansers, moisture, and corrosion. Easy to clean. 49U108 and 49U109 are made from elastomer, which grips conveyed items as they pass over the roller and prevents them from slipping on the conveyor.

Flow Rails

ASHLAND CONVEYOR PRODUCTS

Each straight flow rail has a single row of skate wheels, ball transfers, or rollers to guide cartons, totes, pallets, and other flat-bottomed items in conveying applications. Multiple flow rails can be installed side by side to create a flow rack, and they can also be mounted to surfaces, floors, or walls. Skate wheels attach to channel shapes or angles.

Note: Recommended 3-wheel min. under load.

ASHLAND CONVEYOR PRODUCTS

Ball Transfer Tables

- Steel ball construction
- H-stands sold separately

Ball transfer tables have ball transfers attached to rigid frames. They allow flat-bottomed loads to roll from one place to another, reducing the effort required to move loads. Ball transfers allow loads to move in all directions, and are typically installed at the start and end of conveyor systems, or at points where loads need to change direction.

Note: The length and width of the smallest conveyed item should be at least three times the table's ball spacing dimension, and the heaviest conveyed item must weigh less than the combined capacity of the ball transfers supporting it.

BALL TRANSFER TABLES

Tables attach to compatible medium-duty roller conveyors and stands to allow conveyed items to move in all directions at transition points.

BALL TRANSFER INSERTS

Can replace rollers in light- and medium-duty roller conveyor sections. Inserts are plates with ball transfers attached.

ASHLAND CONVEYOR PRODUCTS

Ball Transfers

Replace existing ball transfers in ball transfer tables, inserts, and stands, or use to create a custom conveying installation. Mount at conveyor entrances, intersections, or exits to reduce the effort required for moving loads in warehousing, package handling, manufacturing, and distribution applications.

Countersunk Flange Style—Each has a flanged mounting plate that installs into a countersunk hole for limited-space applications. They fasten from the front.

Drop-in Style—Designed to press-fit into drilled holes without fasteners. Low profile, for limited-space applications.

Flange Style—Each has a flanged mounting plate that fastens in place from the front.

Internally Threaded Pipe Style—Transfers mount onto externally threaded NPT pipe couplings. Commonly installed on pipe pedestals to position materials for metal-forming machinery such as shears or press breaks.

Threaded Stud Style—Each has a threaded stud that screws into a tapped hole and secures with a nut. They fasten from the back.

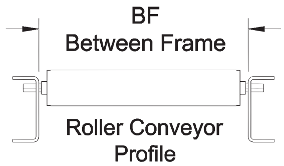
5 9/16 in	6 5/16 in	**38AP32**



Portable Single-Tier

Stationary Multitier

ASHLAND CONVEYOR PRODUCTS

H-Style Conveyor Support Stands

Stands support conveyor sections and can be adjusted to create a level or sloped conveying surface. Pivoting mounting brackets allow sloped installations. Choose an H-stand based on between-frame (BF) dimension and duty rating.

Note: Range of adjusted height is to top of H-stand.

Note: For a stand-alone conveyor, a min. of two supports is required. For two sections of conveyor, a min. of three supports is required (the middle stand supports both sections).

PERMANENT H-STAND

Stands bolt to the floor to provide permanent support for powered or unpowered (gravity-flow) conveyors.

PERMANENT MULTI-TIER

Stands each have two tiers for gravity-flow skate wheel or roller conveyors. Can help create multi-level flow racks. Each level has adjustable height.

PORTABLE SINGLE-TIER

Stands have casters that make skate wheel and roller conveyor sections portable. Brakes prevent the stands from rolling when locked.

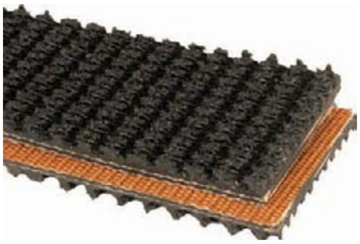
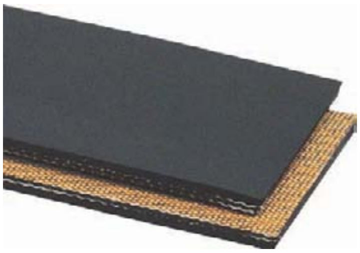
High-Grip



Oil-Resistant



Cleated

Multi-Ply Conveyor Belting

Constructed with an internal layer of strong, woven fabric surrounded by protective top and bottom covers. Replace a worn or damaged conveyor belt to prevent belt malfunction and conveyor downtime. Belts priced by the foot; minimum order quantity of 15 ft. All belts on this page are black; additional color options available on Grainger.com®.

Low-Friction—Coated to reduce friction so items can slide freely when diverted. It can also travel under accumulated items without damaging them.

Light-Duty—Suitable for conveying lightweight packages with intermittent use.

High-Grip—Textured or coated to increase friction between the belt surface and conveyed items. Suitable for moving items up an incline or keeping items from sliding side-to-side on the belt.

Oil-Resistant—Resists absorbing oils from conveyed items or production environments. Suitable for manufacturing facilities and similar applications with oil exposure.

Low-Stretch—Resists stretching and reduces the chance that the belt will move or slip during conveying tasks. Suitable for applications that require proper belt tension as items are conveyed.

Extreme-Temperature—Withstands exposure to very high or very low temperatures. Suitable for conveying very hot or very cold items and for moving items in industrial refrigerators, freezers, or ovens.

Fire-Retardant—Coated to resist ignition when exposed to flames. Suitable for environments with flammable materials, such as grain elevators and wood shops.

Heavy-Duty—Can withstand demanding conveying applications with heavy loads or continuous use.

Cleated—Has raised ridges that grab items more effectively than high-grip belting. Suitable for moving loose items up a steep incline while preventing them from rolling or sliding off the belt edge.

Medium-Duty Slider Bed Belt Conveyors

ASHLAND CONVEYOR PRODUCTS

General-purpose, powered conveyors are suitable for moving light items and items with small or irregularly shaped bottoms. Each has a motor that moves a wide PVC belt over a metal bed. Friction between the belt and surface helps control speed on declining conveyor sections. The belt also keeps items stable, and moves them at a consistent speed and spacing. Commonly used in sorting, packing, inspection, assembly, testing, manufacturing, distribution, and warehouse applications. Units less than 16-ft. long include 2 adjustable-height H-stands; those longer than 16 ft. include 3 stands. Sealed and prelubricated bearings. 4"D steel beds. Powder-coated steel frames.

Note: Field assembly required; units are nonreversing.

FLEXCO

Conveyor Belt Lacing and Lacing Tools

These mechanical fasteners allow conveyor belt installation without having to disassemble the entire system, minimizing downtime. Require tools for application.

Clipper Lacing—Wire-hook lacing provides a strong grip across the width of the belt and won't weaken the belt's internal support layer, to help retain belt integrity. Low profile minimizes noise, helps reduce lacing wear, and provides a smooth surface.

Alligator Lacing—Hammer-on lacing provides uniform tension across the width of the belt. Low-profile design minimizes noise, helps prevent lacing wear and tear, and provides a smooth surface. Use on belts of any width. Requires hammer for simple installation.

Staple-Style Alligator Lacing—Conjoined plates provide a strong connection that minimizes flex and fatigue at the joint. Larger surface area improves abrasion resistance. Use in light- and medium-duty applications.

Bolt-Hinge Lacing—Provides a strong joint that can withstand aggressive belt tensioning, and is flexible enough to travel over small pulleys. Conjoined hinged plates are fastened to the ends of a conveyor belt with bolts that can be removed for belt length adjustment.

Conveyor Belt Tensioners

BRYANT Products, Inc.

Tensioners simplify bearing changes and help ensure proper tracking, with a modular design that adapts to application needs. An adjusting rod is enclosed in a protective telescoping tube that helps prevent freeze-up. As the rod is turned, the tube extends or retracts to adjust belt tension.

Quick-Release 33UL14 has a toggle clamp that allows faster tension and release than manual tensioners. Excellent in applications where conveyor belts are frequently replaced or removed, such as food processing.

Roller Conveyor

ASHLAND CONVEYOR PRODUCTS

Heavy-Duty Chain-Drive Powered Roller Conveyors

For moving heavy items such as pallets, drums, and bulk containers in manufacturing, distribution, and other dirty or oily applications. Each section has a bed of sprocketed rollers that engage with the drive chain to help prevent slipping. Steel frames.

Note: Roller spacing affects the size of the items that can be conveyed on it. The smallest item on the conveyor should be supported by at least three rollers at all times.

Unpowered Extensions—Connect with powered drive sections to create a complete conveyor system.

BESTFLEX

Light-Duty Extendable Flexible-Frame Belt-Drive Powered Roller Conveyors

Conveyors help minimize the effort required to move loads with rimmed or uneven bottoms. Excellent for loading and unloading trailers, creating temporary assembly lines, and adding length to an existing conveyor. The accordion-style aluminum frames can stretch, curve, and contract to change length and shape, or collapse for compact storage. Rollers are self-tracking to ensure that items follow conveyor curves. Locking swivel casters allow units to be rolled into position.

Note: Roller spacing affects the size of the items that can be conveyed on it. The smallest item on the conveyor should be supported by at least 3 rollers at all times.

Tube Magnet
34TA17

Magnetic Separators

High-strength magnets remove metal shavings and contamination from conveyors. They help prevent ferrous particles and parts from contaminating the product, causing damage in machinery downstream, and potentially creating a spark that could ignite explosive materials.

Ceramic magnets capture large ferrous contaminants such as nuts, bolts, or staples.

Rare earth magnets capture fine or weakly magnetic material such as rust or scale.

Grate Magnets—Made up of magnetic tubes arranged in a grid and welded into a frame. They drop into openings on steep-sloped hoppers, odd and irregularly shaped hoppers, floor openings, vertical closed chutes, and ducts. As bulk material falls through the grate during conveying, any ferrous particles and parts stick to the face of the magnetic tubes, removing them from the conveyed material.

Tube Magnets—Can be passed over bulk materials to attract and remove ferrous particles. Multiple tubes can be screwed onto stainless steel tie bars to create custom-configured grates. 1"-dia.

Conveyor Cylinder Brushes

These long, tubular brushes each consist of a strip brush wrapped around a cylindrical metal core. Light-duty brushes have open-wound nylon bristles for lightly cleaning and positioning conveyed items. They are effective in wet or intermittently hot environments. Medium-duty brushes have closely wound polypropylene bristles and are typically mounted under conveyors to clean belts, chains, and other components. They can also clean, debur, sort, or position items. They resist water, chemicals, and oil, and maintain their stiffness when wet.

Conveyor Strip Brushes

TANIS INCORPORATED

These conveyor strip brushes are typically mounted along conveyors to direct and separate items on the conveyor and clean debris from conveyed items and conveyor belts and parts. Also known as metal-backed strip brushes, they have a rigid metal backing with densely compressed bristles that are securely held in a U-shaped metal channel with a retaining wire. Models with stainless steel backing offer additional corrosion resistance. All brushes are installed into a compatible Strip Brush Holder (sold separately on this page) to help maximize contact between the brush and conveyor when the brush is mounted. Strip brushes are typically mounted along conveyors in material handling, packaging, food processing, and can be used for nonconveyor applications such as a creating a barrier at the bottom of a door to keep out air, dust, debris, and other contaminants.

Nylon—Provide good resistance to wear and abrasion and are effective when used in wet or intermittently hot environments. Max. operating temperature: 250°F.

Horsehair—Durable, natural horsehair bristles will not abrade surfaces. Max. operating temperature: 400°F.

Strip Brush Holders

TANIS INCORPORATED

These holders allow compatible strip brushes to be mounted in a variety of orientations in a conveying system. They help maximize contact between the brushes and conveyor as the brushes direct and separate items on the conveyor, support delicate items, and clean debris from conveyed items and conveyor belts and parts. All holders can accept one brush strip, while double track models can accept two. The holder should be compatible with the backing height and width of the strip brush.

Aluminum—The brush's rigid backing slides into the channel in the holder, and the holder is then surface mounted using drilling or welding. Holder is corrosion-resistant anodized aluminum with a clear finish.

Stainless Steel—The brush's rigid backing slides into the channel in the holder, and the holder is then surface mounted using drilling or welding. Holder is suitable for use in high temperatures and corrosive environments.

Industrial PVC Strip Doors

Strip doors reduce air loss at doorways, creating a more comfortable work environment while saving energy costs. Standard smooth strips are the most economical while ribbed PVC materials will reduce scratches and last longer. Cooler/Freezer strips will resist cracking in subfreezing temperatures. These kits include Save-T-Loc® universal mounting hardware and safety orange end strips.

Sliding Bug Screens

- Simple under-header installation

Flexible sliding barriers keep out insects, birds, and dust, while letting in sunlight and fresh air; help improve employee comfort and productivity, as well as facility sanitation. The roller-and-track mechanism can be easily slid open or closed by a single individual. Hook-and-loop fasteners and steel bar-reinforced side seams help seal the sides of the screen. All-weather vinyl-coated polyester construction is UV-resistant.

Flexible Traffic Doors

- Textured vinyl construction with PVC body
- 36"W doors are sold individually, all others are sold in pairs

Designed for heavy-traffic applications, these traditional doors provide maximum opening clearance for wide loads. Replacement for existing doors is fast and easy due to simple construction of a top-mounted gravity hinging system.

▶**Please choose:** Forest Green, Navy, Metallic Gray, Medium Brown, Red, Royal Blue, Chocolate Brown, or Black.

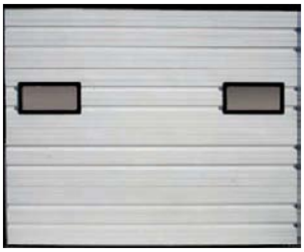
Vertical Lift Garage and Dock Doors



36R638

- U-shaped bottom astragal protects against the elements and provides a positive seal
- Heavy-duty 10-ball commercial rollers
- Hinges are 14-ga., hot-dipped galvanized steel
- Include all hardware needed to install

Noninsulated doors are embossed and ribbed steel. The exterior and interior are prefinished, then finish coated with baked-on polyester primer and acrylic. Insulated doors feature polystyrene insulation bonded between 26-ga. substrate. Provide incredible strength and thermal protection. Flush wood grain embossed panels.

Overhead Door Openers and Control Systems

COMMERCIAL

½ HP, 115V motor for 12 cycles per hour, max. 50 cycles per day.

Hoist-Type Door Openers—Floor-level emergency chain hoist with electric interlock allows manual operation. Adjustable-friction clutch reversal system. Can be right or left mounted. Include wall-mounted, 3-button control station and standard solenoid brake. Prewired to accept sensing devices and optional radio control receiver 3ZRX2 and transmitters 46K657 and 3ZRX1.

Trolley-Type Door Opener—Solid double "L" rail handles heavier doors and allows quick installation. Internal auxiliary reversal system. Wired to accept optional radio control receiver 3ZRX2.

COMMERCIAL ACCESSORIES

Transmitters—Feature rolling code antiburglary technology. 315 MHz. 46K657 controls up to four separate doors and includes two 5-year, 3V lithium batteries. 3ZRX1 controls one door.

Note: 390 MHz frequency transmitters and receivers are available; call 1-800-GRAINGER (472-4643). On Grainger.com®, search for "garage door opener accessories."

INDUSTRIAL

½ HP, 115V continuous-duty motor for 25 cycles per hour, up to 80 to 90 cycles per day. Door closure timer can be set for 5-sec. or 1-min. increments.

Hoist-type door opener 2TRN1 has an emergency chain hoist with electric interlock. 36R922 through 36R924 are manually operated chain hoists. Trolley-type door openers 2TRN3 to 2TRN6 have a low profile.

UNIVERSAL ACCESSORIES

Photo Eyes—Feature a noncontact, infrared door-reversing sensor that provides protection on doors up to 30 ft. wide. Door automatically opens when beam is broken. Include emitter, receiver, mounting brackets, and operator interface. Wall- or floor-mounted. 6XZV7 is water- and dust-tight.

Trailer-Stabilizing Jacks and Notice Sign

Dayton | IRONguard Protecting Your People

Jacks prevent up-ending semitrailers not connected to tractors, level trailers parked on slopes, and prevent landing gear from sinking into soft surfaces. High-strength steel. Flush-type zerk fitting for relubricating Acme screw. With reflective night-visible collar.

GAS-ACTIVATED JACKS

Gas-operated system automatically raises the stand and operator locks in place.

HYDRAULIC JACK

Lift heavy loads using force created by a hydraulic cylinder. The force is created by the pressure in the cylinder chamber.

RATCHET JACKS

Have 8"-dia. wheels.

4W287—Triangular base has 18" sides. Two-way reversible ratchet with 2"-dia. thread screw allows a 12" adjustment range. 8"-dia. swivel head.

3KR77—Extra-wide 6"W x 24"L lifting beam aids trailer support. Two handles assist positioning jack under trailer. Two-way reversible ratchet for adjusting height.

2W878—With easily reversible 2-way ratchet, 2½"-dia. thread screw, and 12" adjustment range. 8"-dia. swivel head, 8"-dia. solid rubber wheels.

SPIN TOP JACKS

Manually turned Acme thread screw raises and lowers jack for fast installation and removal.

2W877—With 10"L lift screw. 14"-dia. dome-shaped base for max. leveling stability. Not made for lifting.

1F144—12" adjustment range. 8"-dia. swivel head and 8"-dia. solid rubber wheels.

NOTICE SIGN

Notifies drivers that OSHA requires use of trailer stabilizer jacks during loading and unloading.

Dockplates, Dockboards, and Container Ramps

BLUFF MANUFACTURING, INC. — HEAVY DUTY HD RAMPS

Aluminum Dockplates—Nonskid tread plate. Zinc-plated handle or hand-holds on each side. Locking legs secure dockplate when in use.

Aluminum Fork Truck Dockboards with Aluminum Curbs—Handle higher load capacities than dockplates. Feature safety curbs. Positive traction treadplate with beveled entrance and exit lip. Legs allow easy fork truck positioning and secure dockboard when in use, for OSHA compliance. When using 3-wheeled fork truck, order dockboard with capacity at least four times the lifting capacity of the fork truck.

Aluminum Fork Truck Dockboards with Steel Curbs—Structural steel safety curbs are bolted to each side of dockboard. When using 3-wheeled fork truck, order dockboard with capacity at least four times the lifting capacity of the fork truck.

Aluminum Hand Truck Dockboards—Use with 2-wheel hand trucks only. Diamond tread surface and beveled edges. Bolted locking legs for OSHA compliance.

Container Ramps—For fast loading and unloading at ground level. Eliminate the need for queuing.

Polyethylene Dockplates—Designed for light-duty applications. Integrated guardrails and handles. Hardware included. Meet OSHA 1910.30(a).

Steel Fork Truck Dockboards with Steel Curbs—Lever lift mechanism raises front edge of dockboard off the ground to allow for one-person operation. Lever automatically falls to rest position as dockboard is lifted. When using 3-wheeled fork truck, select capacity +20% greater than the lifting capacity of the fork truck.

Hand Pump Hydraulic

Mechanical Spring Counterbalance

Electric Hydraulic

Dock Levelers

- Load capacity: 20,000 lb.
- For docks at least 48"H

Permanently attach to dock face. Provide service range of 5" up, 5" down. No concrete recess required. Include 2" x 8" x 18" bumpers and steel bumper boxes. Can be used with Dock Seal 3KR49 or Dock Shelter 3KR50.

Dock Leveler Lift Mechanism	Usable Width	Overall Width	Item No.
Mechanical Spring Counterbalance	66 in	93 in	**5Z151**

Dock Seal

Dock Seal/Shelter Combination

Dock Seals and Seal/Shelter Combinations

Dock seals have 36-oz. nylon-reinforced vinyl facing, mounted and bonded on wolmanized wood. Dock seal/shelter combinations have 18-oz. nylon-reinforced sides and 40-oz. nylon-reinforced top. Seals fasten directly to surface of building wall. Include 24"H yellow guide stripes and installation hardware.

Dock Bumpers

Weather- and abrasion-resistant; protect docks, dock levelers, and shelters from impact damage. Individual sections can be replaced if damaged. Installation Kits 33F680 and 33F681 are sold separately.

LAMINATED DOCK BUMPERS

Prevent impact damage at loading dock. Constructed from same material used in heavy-duty tire cord. Weld to channel or to curb angle with one preset bolt. Mount with anchor bolts in new concrete construction or with lag bolts and shields for existing concrete. Wood dock mount requires lagging. Flush-mounted.

D-SHAPE

Compress on contact, reducing impact force between building and vehicle. Mounting holes on the back of the bumper protect vehicle's finish. 1-piece construction reduces gaps between bumpers.

L- AND T-SHAPE

T-Shape 2MYR8 includes a reflector.

RECTANGULAR

Include a thick molded-in steel bar running the length of each bumper; anchor the rubber to the dock. Mounting fasteners not included.

BUMPER STOP

Draws attention to high-traffic areas. Features a neon yellow caution stripe down its center, recessed to protect it from impact damage.

INSTALLATION KITS

Single Bumper—Includes four concrete anchor bolts (¾" x 4"L) and one ¾" masonry drill bit for installing one laminated dock bumper.

Additional Bumper—Includes four concrete anchor bolts (¾" x 4"L). Does not include masonry drill bit.

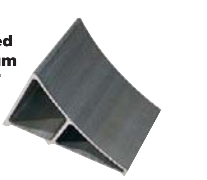
Molded Rubber with Eyebolt 1GUL1



Extruded Aluminum 5A347

General Purpose Wheel Chocks

RUBBER

Molded Rubber—Resist tearing, abrasion, and ozone weathering. 3W666 wedges both sides of wheel with two molded rubber chocks. Order one unit for each wheel. 22XW75 is made of recycled rubber for utility trucks and trailers. 1GUK4 to 1GUK6 feature a grooved surface. 1GUK7 to 1GUK9 are hollow and 3-sided.

Molded Urethane—Rubber pads grip pavement. Width of chock has molded open area for attaching security chain.

Laminated Rubber—Cord-reinforced serrated rubber on steel rods. Feature large handle.

STEEL

Heavy-Duty Steel—Bottom teeth for maximum traction. With easy-grip slot for pickup and positioning. 1GUL3 includes 10-ft. chain.

Formed Steel—Long-life, all-weather chocks have saw tooth bottom. Include hole for attaching security chain and hanger.

ALUMINUM

Extruded Aluminum—Serrated surface grips tire, and triple-edged bottom grips ground.

Rail Car Wheel Chock 22XW90

Monster® Wheel Chocks 21ZF79

Monster® Aviation Wheel Chocks 5NHP9

Specialty Wheel Chocks

Rail Car Wheel Chocks—All-welded steel chocks for securing rail cars for safe loading and unloading. No. 22XW93 is sold as a pair.

Wheel Chocks—Urethane construction made for mining and construction trucks. Will not cause tire damage. Oil- and chemical-resistant. Feature carrying handle.

Aviation Wheel Chocks—Impact-absorbing urethane construction. Oil- and chemical-resistant. Will not rot or splinter. Feature replaceable nylon rope lanyards.

All-Terrain Urethane Wheel Chocks—Oil- and chemical-resistant. For use with utility trucks and trailers. Urethane chocks are designed for fire trucks and all-terrain applications. Feature carrying handle. All-Terrain Urethane chocks comply with NFPA 1901-1909 and meet SAE-J348 Specifications.

Speed Bumps, Cable Ramps, and Mounting Kits

- Rubber products are made from 100% recycled content

Note: This temporary solution is not meant to be left unattended or used on high-speed roads.

Speed Bumps—Use to aggressively slow down traffic close to a stop. Also cover cabling, piping, and have channeled bottom for drainage. Bumps with hardware included allow easy installation and different length requirements. Include 1 center, 2 end modules, and mounting hardware.

Alley Bumps—Multipiece bumps address cut-through traffic in alleyways by drastically slowing vehicle speed. One center and two end modules are included to accommodate different length requirements.

Portable Speed Bump—Protect workers and pedestrians in 15 to 45 mph speed areas by helping to temporarily control traffic flow. Bump conforms to virtually any road surface and can be deployed and retrieved in seconds.

Speed Humps—Use on roadways to moderately slow traffic. Humps alert drivers of pedestrians and hazards ahead.

Cable Ramps—Drop-over ramps are placed over cable and hose lines that run along the ground and they are lightweight. 2GWL7 to 2GWL9 are wider to increase channel height while retaining incline. Aluminum ramps have a serrated surface to increase traction, and they're lightweight for portability. Polyurethane ramps have indents for traction and are weather- and chemical-resistant.

Speed Bump Glue Down Kits—For applications where drilling holes in the mounting surface is not recommended. For 72"L speed bumps order 2 Glue Down Kits 5XPR8.

5AB22

6YG07

Column and Corner Protectors

100% HDPE is resistant to chemicals, rust, stress, and cracks. For indoor and outdoor use. Safety yellow.

Column Protectors—Fit all types of columns. Key-lock minimizes slippage and assists with alignment during installation. Protectors install with two 2" black nylon belts with hook-and-loop fasteners (included) and are stackable. 5AB22 has a slim profile.

Corner Protectors—Install on overhead door frames, corners, vertical columns, or horizontally as machine or rack guards. Protectors install with bolts or nylon straps (not included). Sold in sets of two.

Premium Column Protectors

33RH93 33RJ03 33RJ09

COLUMN PROTECTORS

These protectors are heavy-duty with air vents and deep pockets that deflect impact energy away from columns. LLDPE is semiflexible and stress-crack resistant. Chemical-resistant, nonconductive, waterproof, easy to clean, and removable for maintenance. Easy to install. Straps included. Sizes to fit most columns.

CONCRETE WRAP COLUMN PROTECTORS

Easy-to-install polyurethane foam wrap adds a layer of protection around concrete columns, helping eliminate the constant chipping, painting, and maintenance to concrete columns. Semiflexible and crack-resistant.

COLLISION PROTECTION FOR PARKING STRUCTURE COLUMNS AND WALLS

Easy and attractive way to add a layer of effective of protection around parking structure columns and walls. Made of ARPRO®, a high-tech material specifically engineered to absorb impact. Provides soft, scratch-resistant protection to protect vehicles and columns from collision damage. These modular designs are easily customizable for any size column or wall space.

Ribbed Guard Rails

Combine as a modular system that can be installed, removed, or expanded. ⅛"-thick (11-ga.) galvanized steel for outdoor use. Industrial yellow powder-coat finish for indoor use only.

Bolt-On Guard Rails—Easy to assemble and install. Impact-resistant, 2- and 3-ribbed corrugated design have no sharp edges or corners. Galvanized construction resists corrosion.

Lift-Out Rails—Provide a strong barrier with easy accessibility. They have the same construction and profile as bolt-on rails, yet slide into post saddles for simple assembly. Each rail section includes two post saddles.

Posts—Two post heights come in both in-line and corner configurations for single-row (high) and double-row (high) installation. Posts are made of round-corner, 4" square steel tube with ¼"-thick walls, and are welded to a 10" square, round-corner ⅝"-thick steel base plate. Include hardware, bolts, anchors, washers, and nuts.

Pallets

Aluminum Pallets—Feature three strings across the bottom for increased strength.

Plastic Pallets—Provide two-way entry by pallet truck and four-way entry by fork truck. Maintenance-free and moisture-resistant, will not rot or splinter.

Recycled Pressed Wood Pallets—Nestable design allows stacking. Does not contain any nails or staples. Manufactured from recycled wood materials.

Stackable—Provide high load capacities for handling and shipping heavy products. Stackable for efficient storage.

Nestable—Lightweight and durable for easy handling. Nestable when empty to reduce space and freight cost.

Rackable—Allow products to be stored in a variety of supported or edge rack systems.

Adaptable Pallet

FAST LOCK PALLET

Save floor space by creating custom pallets from 12" to 8-ft. long using interlocking units. EZ Band notch on end of each unit provides a way to cross-band product to the assembled pallet at every 12". Lightweight pallets are ideal for closed loop or returnable system, in-house movement, and shipping of varying-sized items. Units allow for easy storage of supplies that need to be kept off the ground.

Open Head Pails

Use for easy transport and storage of liquids and solids. Compatible lids can be ordered separately.

Plastic pails are lightweight and resist corrosion, impact, and damage from ultraviolet (UV).

Stainless steel pails withstand high temperatures and resist corrosion, rust, and scratches. Ideal for applications where moisture or bacteria growth is a concern, such as food processing, industrial manufacturing, and outdoor environments.

Steel pails withstand extreme temperatures and heavy loads. Suitable for hot/cold liquids, semi-solids, and solids. Commonly used for shipping or storage of non-food items.

Open Head Pails with Lids

Pails come with a compatible lid to keep contents secure and uncontaminated during transport and storage.

Screw-on lids have threads that connect with the pail's rim threading to tightly secure lid.

Snap-on lids squeeze around the pail's rim to make an airtight seal.

Lug covers have tabs around the edge of the rim that push into pails to seal a barrier between the rim and lid. Prevent spills, exposure, and tampering.

Lever lock covers have a horizontal lever attached to the rim that tightens to create a firm seal between the lid and pail.

Closed Head Pails for Liquids

Allow dispensing of liquids through an opening on the top. Tight-fitting lid allows them to hold contents securely, making them a preferred choice for air and overseas shipping of hazardous substances.

Plastic pails are lightweight and corrosion resistant.

Steel pails can withstand extreme temperatures and heavy loads. Suitable for hot/cold liquids, semi-solids, and oils.

Carbon Steel Transport Drums

Lined drums feature a modified phenolic coating that resists corrosion and chemical reactivity. Unlined drums are treated with a mild rust inhibitor.

Open-Head—Removable covers are EPDM-gasketed with either a UN-qualified lever lock or bolt. No tools, torque, or ring gap measurements are required for lever lock ring.

Closed-Head—Drum lids are permanently secured and include 2" and 3/4" steel plugs and flanges with Buna gaskets.

Salvage/Overpack—Use open drums for transporting leaking or damaged containers. Covers are EPDM-gasketed and secured with lever lock ring closures or bolt. Yellow drums with red cover feature "Salvage Drum" logo.

Polyethylene Transport Drums

2GTZ1 2GTZ3

High-density polyethylene (HDPE) is compatible with a wide range of chemicals. Open-head drums feature lever lock ring closure. Closed-head drums have two top fittings, a 2" NPT, and a 2" buttress fitting, except 15-gal. drums have 2" NPT, and ¾" NPT. 19H055, 19H056, and 2GTZ3 have double handles.

Drum Inserts and Liners

- LDPE construction

INSERTS

- Vacuum-formed
- Seamless

Inserts are designed to withstand tough applications such as mixing and pumping; won't crack or tear. Contoured lip prevents leakage between insert and drum wall.

DRUM LINERS

Meet FDA requirements.

Drum Faucets and Drum Safety Vents

FM Approved, except 1XPX8. 5A501 is FM Approved for viscous liquids only, and 5A502 is FM Approved for nonviscous liquids only.

DRUM FAUCETS

Brass Adjustable, Stainless Steel Adjustable, and Brass Rigid—Self-closing. Use with oils up to 30W, noncorrosive flammables, and nonflammables. For use with drum in horizontal position. 5A504 has an internal flame arrestor and adjustable feature that allows the nozzle to be positioned after being threaded into drum. 5A503 has an external flame arrestor.

Economy Zinc Rigid—Self-closing with padlock holes. Cannot be used with chlorinated solvents. Brass color. 5A502 has a flame arrestor.

Brass Gate Valve—Self-closing wide mouth opening. Knife-style, spring-activated PTFE blade has positive shutoff when 4½"W handle is released. Use with viscous noncorrosive liquids heavier than 30W motor oil. Use with drums in horizontal position.

Polypropylene Fiberglass Reinforced—Allows drums with 2" plug to be emptied or filled from a horizontal position. Locking ring connects faucet to drum handle, unscrews plug for tapping or filling.

DRUM SAFETY VENTS

Horizontal—Fusible emergency relief plug melts at 135°F. Brass bung vent and a flame-arresting baffle; max. content flow of 220 cfm at 20 psi.

Vertical—Provides manual vacuum relief. Internal flash arrestor.

Drum Cover Accessories

3AM06

2AV35

Safety Drum Funnel—Fits into 2" drum bung. Accommodates padlock, not included.

Drum Level Gauge—Special plated fitting threads into ¾" NPT drum bung and has a female ¾" NPT provision to fit most faucets. Not for use with chlorinated solvents, high-concentrated acids, or alkalis.

Polyethylene Pop-Up Gauge—Indicator warns when nearing capacity. Screw into ¾" opening of a vertical drum.

Drum Lock—Solid brass with ½" zinc-plated steel lockarm, predrilled with a hole for a padlock, not included. Fits both 2" and ¾" standard dia. drum threads.

Drum Plug Locking Device—Locking device prevents access to the material contained in your drums. Simply slide the two halves of the locking device around the bung flange, slip the joining bar through the halves, and insert a padlock (sold separately) through the end hole of the bar. Sold in a set of two 2" plugs; fits plastic drums with raised bung flanges.

For Horizontal Metal

Drum Heaters

- Dielectric tested at 1250V for 115V drum heaters and at 1500V for 230V

Mount below drum contents for freeze protection, viscosity control, melting, or keeping elevated temperatures. Nickel alloy heating element and electrically grounded, insulated screen. 115V units have 6-ft. cord set with 3-prong molded plug; 230V have a pigtail end. UL Recognized and CSA Certified.

Note: Actual temperature of the contents is affected by thermostat setting, heater wattage, type of drum contents, ambient temperature, and other system characteristics. Multiple heaters may be required for some applications.

For Vertical Metal

For Poly

FOR VERTICAL METAL

Wraparound heaters connect with a spring-and-clip device. Control range: 50° to 400°F. Temperature control stem rotates 310°. All have adjustable thermostats, except for 3CDA1.

FOR HORIZONTAL METAL

Reusable heater can be used while drum is in cradle. Control range: 50° to 400°F.

FOR POLY

Control range: 50° to 160°F, plus over temperature control.

Drum Blankets and Pipe Heaters

Drum Blanket Heater

Silicone Rubber Pipe Heater

DRUM BLANKET HEATERS

Heaters fit 55-gal. drums. For 3JJJ4, control range is 50° to 160°F. For 3JJJ2 and 3JJJ6, control range is 50° to 450°F. 3CDC4 has aluminized cloth exterior with 1" fiberglass insulation. Easy to install with hook-and-loop fasteners. Control range is 50° to 400°F.

SILICONE RUBBER PIPE HEATERS

- Control range: 40° to 60°F

Reusable heaters thaw and keep metal pipes from freezing. Fit dia. from ½" to 1½". Preset thermostat. Install with hook-and-loop fastener straps. Not for plastic pipes.

Silicone Rubber Flexible Heater

SILICONE RUBBER FLEXIBLE HEATERS

- Operate to 400°F
- Resistance tolerance: ±10%

Install with RTV (Dow 732 or equal) adhesive. Include 12" PTFE insulated leads. UL Recognized and CSA Certified.

Polyimide Flexible Heater

POLYIMIDE FLEXIBLE HEATER

- Operating temp.: -70° to 390°F
- Resistance tolerance: ±10%
- Max. thickness: 0.10", except in lead exit area

Low-profile, low-watt density Kapton® heater. PTFE insulated leads. Easy to install with RTV (Dow 732 or equal) adhesive.

Drum and Tank Mixers

- Shipped unassembled
- 115 to 230V, 1-Phase

Feature TEFC electric motor or air motor and include 316 stainless steel shaft with propeller.

Economy Open Drum Mixers—Mount directly to tanks or on rails with 1⅞" opening adjustable clamp. Adjustable bracket. 4"-dia., 3-blade fixed-propeller. 32V133 and 32V134 include junction box.

Bung-Entering Drum Mixers—For use with 55-gal. or smaller closed-head drums. Enter 2" bung opening with 2-blade folding propeller.

Bung-Entering Intermediate Bulk Container (IBC) Mixers—For use on 275- to 550-gal. drums. 9" propeller folds to pass through 2" coupling. 32V148 provides a metallic 2" coupling by mounting directly to plastic cap of poly IBCs.

Gear-Drive Tank Mixers—Cast-aluminum, handle up to 5000 gal. with viscosities up to 15,000 cps. Clutch-free with 3-blade square-pitch marine propellers. Index marks for angle and radial adjustment.

Direct-Drive Tank Mixers—Clamp to tank rim. Adjustable motor speed, utilizes standard shafting to extend propeller to 48".

- Air-driven

Laboratory Mixer—Clamp can be used to make angular and radial adjustments. Shaft for use with tanks up to 50 gal.

Laboratory Mixer With Stand—Features four shafts. Adjustable height with hand knob. Includes cast-aluminum base with 36" mast. Base bolts to work surface.

- Air-driven

Handheld Air Mixer—Air control valve allows low-speed mixing and easy speed adjustment. Multiblade cage impeller protects blades. Cast-iron aluminum pistol grip. For 5- and 10-gal. open containers.

- Air-driven

Paint Supply Mixers—32V131 is for use with 5-gal. HVLP spray packages. 32V132 is for use with any 55-gal. drum cover. Max. torque of 32V131 is 6.5 in.-lb. (at 650 rpm); max. torque of 32V132 is 26.1 in-lb. (at 350 rpm). Removable shafts for use with lids and containers.

WESTWARD®

Cross-Brace Drum Dollies

Cross-brace drum dollies have an X-shaped deck that lets liquids pass through the deck and allows drum spigots to be accessed while the drums are on the dollies. They are lighter than solid-deck dollies.

Dollies with a support ring prevent drums from sliding off.

Heavy-duty cross-brace drum dollies have a strong, welded square frame and can carry heavier drums than other styles of drum dollies.

Multi-tier cross-brace drum dollies have three tiers. The inner tier can support a 5-gal. drum, the middle tier can support a 30-gal. drum, and the outer tier can support a 55-gal. drum.

Support
34NK67

WESTWARD® GUARDAIR CORPORATION LINCOLN

Open-Deck Drum Dollies

Open-deck drum dollies consist of a steel support ring with a large open space at the center. Debris falls through the dollies, and the support ring has a raised edge that keeps drums from sliding off. Open-deck dollies weigh less and are easier to carry than solid-deck drum dollies. They can be hung when not in use.

Dollies with clamping supports have a band clamp that can be tightened to hold drums securely on the dollies, making them suitable for moving smaller drums.

Easy-Load Drum Dolly

This dolly has a large platform that sits low to the ground and slides under a drum to load it onto the dolly. It provides more support for drums and is less likely to tip than other styles of drum dollies. The dolly has a steel frame with rubber casters. It also has a T-handle that pivots out for pulling the dolly, locks in an upright position for pushing the dolly, and folds to save space when not in use.

Ergonomic Tilt-Back Drum Truck 34D647

Ergonomic Tilt-Back Dispensing Drum Truck 34D665

Ergonomic Tilt-Back Corrosion-Resistant Truck 34D654

Dayton

Drum Hand Trucks

A curved frame cradles a drum as it's being moved with the trucks. These hand trucks have prongs that slide under the drum to support it when it is leaned back, and they allow heavy drums to be moved without having to lift them. They also come with a strap or chime hook for securing the drum to the trucks. All feature a prong nose plate and a dual handle design.

Ergonomic tilt-back trucks have two swivel casters mounted on a rear frame extension. The casters support the trucks when they are tilted back, which reduces the physical effort it takes to keep the trucks upright when moving heavy drums.

Dispensing trucks can be laid down horizontally to allow the contents of a drum to be dispensed while the drum is secured to the trucks. The frame extension also supports the drum and keeps it elevated off the ground during dispensing.

Aluminum-frame drum hand trucks are lighter than steel-frame drum hand trucks and resist rusting when exposed to water.

Drum Lifters

VERTICAL DRUM LIFTERS

- Ship assembled

Move drums to a different location automatically. Align on drum chime using grip pads. Use with overhead hoist or crane. Crane lift hook engages lifter and grab hooks. Orange enamel finish.

ECONOMY DRUM LIFTERS

Lock pin provides safe transportation for drums by preventing them from opening. 1½"-dia. lifting eye is mounted on top of four ¼" x 1" hot-rolled steel supports.

SALVAGE DRUM LIFTERS

- Ship assembled

Orange enamel lifter places a 55-gal. drum into an 85-gal. steel or poly salvage/overpack drum using one moving part.

VERTICAL DRUM LIFTERS/ DISPENSERS

- Ship assembled

Yellow lifter requires just one-person to transport and pour from open- and closed-head drums. Fiber Drum Adapter No. 4W966 sold separately.

Manual 12R538

Control provides 360°, low-level pouring and dumping. Holds drum vertically or horizontally during transit with positive tilt lock on drum saddle.

Geared 12R541

Features 5½-ft. control chain to lock drum in position. Drums that are less full are easier to tilt. Pour from remote heights.

ECONOMY OVERHEAD DRUM LIFTER

The three removable arms have either a drum faucet wrench, a removable top-ring wrench, or a built-in bung nut wrench. Drums can be lifted, transported, or lowered. Does not include required overhead lifting device.

OVERHEAD MOUNT LIFTERS

Drums can be lifted by arm return spring on scissor arms. 21-ft. L x 9-ft. W x 16"H for 55-gal. 2-ft. 19¼"L x 9-ft. W x 15½"H for 30-gal. Use with 6XDR6 and 6XDR7, sold separately.

HOIST-MOUNTED DRUM LIFTER

When lowered, lifter automatically engages drum rim. Stabilizing arm reduces damage to drums. 3-pt. drum contact. Orange enamel finish.

Dayton

Automatic Fork Truck Drum Lifters

Units feature heavy-duty steel construction and can lift drums easily and quickly without hydraulic or electric connections. Simply slip drum onto forks and tighten hand screws. Attach or hang lifter on hook from an overhead hoist or crane.

SINGLE-DRUM

Single-jaw can be used with steel, plastic, or fiber drums.

DOUBLE-DRUM

For light-gauge steel, removable lid, plastic, and fiber drums with standard top chime. Double-jaw engages the drum in two places, approximately 7" apart, for even weight distribution.

Fork-Mounted Drum Handling Equipment

Designed for transporting and lifting closed-head drums.

DRUM GRABS

Hand-tightened lock screws secure grabs to forks. Bar jaws are made of steel. All-welded construction. No tools necessary to adjust drum grabs.

Note: 2-drum models should only be used with two same-sized drums.

Steel Drum Models—For closed-head drums.

Poly Drum Model—Use with drums with at least ⅜" top lip (chime).

AUTO-GRIP

For steel drums only. Mechanical grip is gravity-actuated for heavy-duty applications. For various size overpack drums, spring- and cam-actuated rubber-lined jaws can be manually adjusted. Adjustable distance between forks.

ROUNDED-BOTTOM

21VG55 is used for egg-shaped plastic drums. Low drum attachment point. 21VG47 is used for steel, plastic, and fiber closed-head drums with a top lip. High drum attachment point requires at least $^{3}/_{16}$" drum top lip.

Scan. Order. Done.
Details on page A1.

Shelf and Utility Cart Selection Guide

MATERIAL

- **Metal:** Metal shelf and utility carts are more rugged and typically can hold heavier loads than plastic shelf and utility carts.
- **Plastic:** Plastic shelf and utility carts are lighter and provide more resistance to dents, corrosion, and water damage than metal shelf and utility carts.

HANDLES

- **(2) Handles:** Front and rear handles allow cart to be pushed from either side when maneuvering in tight spaces.
- **Ergonomic Handle:** Provides comfortable grip.
- **Flat Handle:** Low-profile handle stays out of the way.
- **Raised Handle:** Provides comfortable hand placement and push height.
- **U-Shaped Handles:** Offer secure grip when climbing ladders on vertical-access carts.

SHELVES

- **Adjustable Shelf:** Shelf can be raised or lowered to accommodate items of different sizes.
- **Compartmented Shelf:** Deep compartments keep containers of chemicals stable and capture spills.
- **Deep-Lipped Shelf:** Tall lip contains spills and better protects against items sliding off the shelf than a shorter lip.
- **Fixed Shelf:** Shelf cannot be moved.
- **Flush Shelf:** Flush sides let items slide onto or off of the shelf.
- **Lipped Shelf:** Short lip stops items from sliding off shelf, and heavy items don't need to be lifted far to clear the lip.
- **Perforated Shelf:** Small openings on shelf surface let liquid and debris fall through, which helps keep the shelf clean.
- **Removable Shelf:** Shelf can be removed for cleaning or to accommodate tall items.
- **Shelf with Lipped Guards:** Tall guards run along the length and width of the shelf to prevent items from sliding off it.
- **Single-Side Flush Shelf:** One flush side lets items slide onto or off of the shelf, and three lipped sides stop items from falling off the shelf.

Adaptable-Design Utility Carts with Deep Lipped Plastic Shelves

Adaptable-design utility carts can be reconfigured for different tasks. The carts' ergonomic handle can be repositioned to improve operator comfort. A flip-up shelf provides a flat work surface without having to rearrange items on the top shelf. Tool-holding slots, snap hooks, and other storage features keep items organized on the carts. V-notch holds pipe or conduit during cutting. The carts' shelves have a tall lip that contains spills and stops items from sliding off the shelves. All have two locking swivel casters and two rigid casters. Assembly required.

Load Capacity	Shelf Length	Shelf Width	Overall Length	Overall Width	Overall Height	Distance Between Shelves	Shelf Color	Item No.
500 lb	44 in	17 in	46 ½ in	18 in	36 in	20 in	Black	**406R89**

AKRO-MILS

Utility Carts with Flip-Gate Flush Plastic Shelves

4YT95

The shelves on these carts have hinged sides that flip up to create a lip that stops items from falling off them or flip down to create a flush surface that lets items slide onto or off of the shelves during loading or unloading. The carts' I-shaped support posts provide unobstructed access to the bottom shelf. All have two swivel casters with brake and 2 rigid casters.

Load Capacity	Shelf Length	Shelf Width	Overall Length	Overall Width	Overall Height	Item No.
400 lb	28 in	17 in	42 in	19 in	34 in	**5YM99**
	32 in	22 in	46 in	24 in	34 in	**4YT95**

Nestable Utility Carts with Perforated Lipped Plastic Shelves

6WZK8

These utility carts nest together to save space when storing the carts. The carts' perforated plastic shelves let liquids, dirt, and debris fall through them, which helps keep the shelves clean when the carts are used in dirty or wet areas. The shelves have a short lip that stops items from sliding off them. All have two swivel and two rigid casters.

Load Capacity	Shelf Length	Shelf Width	Overall Length	Overall Width	Overall Height	Distance Between Shelves	Item No.
600 lb	37 in	22 in	40 in	26 ½ in	44 in	18 in	**6WZK8**

Convertible Utility Carts with Flush Plastic Shelf and Platform

Rubbermaid Commercial Products

The top shelf on this cart folds down to convert it to a solid-back platform truck so it can carry items that would be too large to fit on it when the top shelf is in place. The shelf and platform are flush, which lets items slide onto or off of them during loading and unloading. The platform has a 250-lb. capacity. The cart has four swivel casters, two of which are locking. Ships assembled.

Structural Foam Plastic Mobile Cabinet Workbenches

Mobile cabinet workbenches provide tool storage and a flat work space. Made from structural foam plastic, which will not rust, dent, or chip. Models with lockable drawers feature ball bearing full-extension slides. Some assembly required, except for 4UR44.

250-LB. CAPACITY

Five metal storage drawers. Pegboard side panels provide hanging storage. Locking bar keeps contents secure. Built-in cord wrap. Four 4" nonmarking casters (2 swivel, 2 rigid).

330-LB. CAPACITY

Multiple compartmentalized boxes and slide-out trays. Molded compartments on handle provide extra storage. Built-in cord wrap. Four 5" nonmarking casters (2 locking swivel, 2 rigid).

500-LB. CAPACITY

Locking cabinet with shelves or four locking drawers. Includes 3-outlet surge-suppressor power strip with 10 ft. cord. Four 5" nonmarking casters (2 locking swivel, two rigid).

750-LB. CAPACITY

Locking cabinet and four locking drawers. Includes 3-outlet surge-suppressor power strip with 10-ft. cord. Four 5" casters (2 locking swivel, 2 rigid).

Chemical-Resistant Utility Carts with Plastic Shelves

With Compartmented Plastic Shelves 9NKX9

Made from chemical-resistant materials that withstand exposure to acids and corrosives. All have two swivel and two rigid casters (6GJY8 has locking casters), two shelves, and a flat handle. **Antimicrobial** shelves have been treated with an antimicrobial compound to prevent the growth of odor- and stain-causing bacteria, mold, and mildew.

Corrosion-Resistant Metal Shelf and Utility Carts

Stainless steel carts resist rusting when used in environments where they will be exposed to frequent cleaning, washdown, or other corrosive materials. They are used in commercial kitchens, food-service facilities, laboratories, medical facilities, cleanrooms, manufacturing plants, marine areas, and similar areas.

Easy-Access Metal Shelf and Utility Carts

Easy-access metal shelf and utility carts have central pillars that support the top shelf at the front and back of the carts rather than the corners. This lets users load and unload items on the carts' bottom shelf more easily than they could on a cart with four corner supports. The carts have a flush top shelf and lipped bottom shelves.

Load Capacity	Shelf Length	Shelf Width	Overall Length	Overall Width	Overall Height	Distance Between Shelves	Item No.

16C236

Metal Shelf and Utility Carts with Ventilated Walls

Metal mesh walls surround the top shelf on these carts to provide maximum protection against items falling off the shelf while the carts are moving. The mesh walls also allow air to flow through them for ventilation and let users see items on the shelf. The carts have a lipped bottom shelf.

Load Capacity	Shelf Length	Shelf Width	Overall Length	Overall Width	Overall Height	Distance Between Shelves	Item No.

Jamco carts

Low-Profile Metal Shelf and Utility Carts

The top shelf on these carts is set at a lower height than other styles of metal shelf and utility carts. This reduces how far bulky or heavy items must be lifted when loading them onto the top shelf. **Easy access and load** carts have two rear corner posts and a front central pillar that support the carts' top shelf and reduce obstructions when moving items onto or off of the carts. They also have flush tube shelves that let items slide onto or off of the shelves and allow dirt and debris to fall through the spaces between the tubes.

Lipped Shelves w/ Flat Handle 49Y480

Order-Picking Metal Shelf and Utility Carts

The flat surface near the handle of these carts holds documents for note-taking, inventory, and similar tasks. Order-picking utility carts are used in settings such as manufacturing plants, stock rooms, warehouses, and distribution centers.

Metal Shelf and Utility Carts for Instruments

The shock-absorbing casters and cushioned shelf matting on these carts absorb shock and vibration, which helps protect instruments and delicate, vibration-sensitive equipment on the carts from damage when moving them in laboratories, testing facilities, and similar areas. The matting also has a nonslip surface that stops items from sliding on the shelves and colliding with each other. Also known as instrument carts. **Low-profile** carts have a top shelf that is set at a lower height than other carts to reduce how far bulky or heavy items must be lifted when loading them onto the top shelf.

Vertical-Access Metal Shelf and Utility Carts

The built-in ladder on these carts can be used for reaching high areas in warehouses, stock rooms, and similar locations. Also known as stock-picker trucks or ladder trucks, vertical-access carts save workers from having to carry or move a separate ladder for their work. The ladder has a spring-loaded mechanism that prevents the cart or ladder from moving when a worker is on the ladder. This mechanism also raises the ladder and allows the cart to roll when the ladder is not in use.

Wire Shelf and Utility Carts

Wire shelves let dust and debris fall through and away from them, which helps keep them clean. Air can circulate through the shelves for ventilation, and users can see through the shelves to view their contents. All carts have four swivel casters, except as noted. **Heavy-duty** shelves are supported by square corner posts and can hold more weight than shelves that are supported with round corner posts.

Corrosion-Resistant Wire Shelf and Utility Carts

These carts are made from stainless steel or a combination of stainless steel and chrome. They resist rusting when used in areas where they will be exposed to frequent cleaning, washdown, or other corrosive materials. The carts have wire shelves with a shallow lip and do not require objects to be lifted very far to put them onto or take them off of the shelves. The shelves' height can be adjusted in 1" increments to accommodate different sizes of items. All have 4 swivel casters, except as noted.

Wire Shelf and Utility Cart Covers

Covers fit over carts to protect their contents from dust and other airborne particles. They also conceal the carts' contents to maintain an attractive appearance and deter theft or tampering. **Hook-and-loop** closure fastens and unfastens quickly. **Zipper** closure is more secure than hook-and-loop closure. **Blue nylon** covers are made from waterproof, fire-retardant vinyl-coated nylon fabric, which resists tearing, mildew, and odors. **White vinyl** covers resist tears and are antimicrobial, which means they inhibit the growth of bacteria and other organisms that can cause odors and stains.

Wire Shelf and Utility Carts with Angled Shelves

1EVG6

Angled wire shelves make it easier to see items on the shelves than on flat shelves. Gravity moves items at the back of the shelves forward when items at the front of the shelves are removed. The shelves have a short lip on one side and a tall lip on the other side that prevent items from falling off. The shelves can be reversed to put either the short or tall lip at the front. Shelf height can be adjusted in 1" increments to fit different sizes of items. All have four shelves and four swivel casters (two of the casters have brakes).

Wire Shelf and Utility Cart with Removable Basket Shelves

This cart has two removable wire baskets that sit on the cart's shelves and hold loose items. The cart's shelves have a short lip that stops the baskets from sliding off. A hanger rod holds clothing or other hanging items. Shelf height can be adjusted in 1" increments to accommodate different sizes of items. Cart has two swivel and two rigid casters.

Wire Security Carts

Wire security carts are rolling wire cages with doors that lock for secure storage. They are lighter and allow users to see items on the carts more easily than welded mesh security carts. The wire mesh walls and doors let air circulate through the carts and allow dirt and dust to fall through them, which helps keep them clean.

Single-Side-Access Mesh-Wall Metal Stock Trucks

Mesh walls enclose three sides of the shelves on these stock trucks to keep items from falling off the shelves. The shelves can be loaded on the one side that does not have a wall. Mesh walls can retain large and small items. They allow air to circulate through the stock truck and let users see items on the shelves.

Standard-Base

Optional Caster Kit

Self-Dumping Steel Hoppers

Dayton

- Red powder-coat finish on hopper, black base

HOPPERS

Automatically dump loads when locking latch is released, then return to locked position. Constructed with precision robotic weld; base is formed steel. Safety chain secures hopper to fork truck, while cable enables dumping from fork truck seat.

Low-Profile

Feature a 90° dump angle and half-length fork entry. Hoppers return to locked position when lowered to ground.

Front-Release

Bumper dumps hopper a minimum of 70° when activated. Full-length fork entry. Predrilled for caster kit.

OPTIONAL CASTER KITS

Casters are field installable with hardware included. Include 2 rigid and 2 swivel casters. Intended for use on front-release hoppers only.

Drop-Gate & Raised-Platform Box Trucks

These box trucks have features that reduce effort when loading and unloading the trucks. All have two swivel casters and two rigid casters, except as noted. **Drop-gate** trucks have one side wall that folds down halfway to reduce how far items have to be lifted to get them over the wall. **Open-sided** trucks do not have a wall on one side of their container, which lets users slide heavy objects into or out of the container. **Raised-platform** trucks have a platform that elevates the trucks' container to reduce bending and straining when reaching into the container.

Basket Trucks

Basket trucks have soft fabric liners that keep items from falling out of the trucks as they're moving. The liners may be permanently attached to the carts' frame, or they may be removable to allow for cleaning and replacement. Also called laundry or mail hampers, these lightweight carts can carry laundry, sports equipment, packages, and other bulk materials. All have a wood base. **Canvas** liners resist abrasion but are prone to mold and mildew if exposed to dampness or moisture. **Vinyl** liners are stronger than canvas liners. They resist mold, mildew, and tears and withstand exposure to UV rays. Vinyl liners are also flame-retardant, but other parts of these basket trucks may not be.

General Purpose Steel-Deck Platform Trucks

Platform trucks with a steel deck provide good strength for transporting a wide variety of materials. They are commonly used for moving raw materials, packages, tools, and equipment in warehouses, factories, loading docks, stock rooms, and mail rooms. All have two swivel and two rigid casters, except as noted.

16D330

13X486

Narrow Steel-Deck Platform Trucks

These platform trucks have a long, narrow steel deck with tall handles at the ends. Also called U-boat platform trucks, they are used for moving tall stacks of packaged goods and other boxed items. The trucks can pivot 360° when maneuvering in tight spaces such as aisles in warehouses, supermarkets, retail stores, and stock rooms. All have four swivel and two rigid casters, except as noted.

High-Capacity Steel-Deck Platform Trucks

High-capacity steel-deck platform trucks have two large-diameter, rigid, axle-mounted wheels that let the trucks bear heavy loads and start rolling more easily when loaded than other steel-deck platform trucks. They also have two swivel casters that allow them to maneuver around curves and obstacles. Suitable for moving molds, dies, metal sheets and coils, and other heavy equipment in industrial locations such as manufacturing plants, warehouses, and construction sites.

High-Maneuverability Steel-Deck Platform Trucks

High-maneuverability steel-deck platform trucks have a caster configuration that lets them make tighter turns and navigate more easily in warehouse aisles and similar tight spaces than other styles of platform trucks. Carts with a **diamond** caster/wheel configuration have two swivel casters and two rigid casters. Carts with a **6-wheel** caster/wheel configuration have four swivel casters and two rigid casters and provide more stability than carts with fewer casters.

Steel-Deck Platform Trucks with Compact Folding Handles

The handles on these platform trucks fold down to save space when the trucks are not in use. These trucks are used in applications where they will be taken to different job sites or where there is minimal space for storing the carts. All have two swivel casters and two rigid casters.

Towable Steel-Deck Platform Trucks

Towable platform trucks have a drawbar and hitch and can be attached to towing equipment or connected to other towable platform trucks. They also have a handle and can be manually pushed or pulled, and the handle can be removed to make room for oversized objects. Suitable for industrial applications where items need to be picked with a platform truck and then moved to another area using powered towing equipment. All have four swivel casters and two rigid casters.

Narrow Truck w/ Smooth Surface & Tall Handles 22NP38

Aluminum-Deck Platform Trucks

Aluminum-deck platform trucks resist corrosion and are lighter than platform trucks with stainless-steel or steel decks. **Compact folding handles** collapse to save space when storing the trucks. **Extendable decks** can be pulled out to allow the trucks to carry large items. **Narrow decks** can maneuver in aisles and other tight spaces. **Tall handles** prevent tall stacks of packaged goods and other boxed items from falling off the trucks as they're moving.

Narrow Truck w/ Tall Handles 4VMD1

General Purpose Wooden-Deck Platform Trucks

Wooden-deck platform trucks make less noise and are less likely to damage delicate materials and finishes on products carried on the trucks than metal-deck platform trucks. **General purpose** trucks are suitable for a wide range of applications. They have two swivel and two rigid casters unless noted otherwise. **Narrow tall-handle** trucks are used for moving tall stacks of packaged goods and other boxed items. They have a combination of two rigid casters and four swivel casters and can pivot 360° when maneuvering in warehouse aisles and other tight spaces.

High-Strength Stainless-Steel-Deck Platform Trucks

2TUH3

Platform trucks with a stainless-steel deck are stronger and more corrosion-resistant than aluminum-deck platform trucks, and they have a polished finish that eases cleanup. Suitable for labs, medical facilities, food- and beverage-manufacturing plants, and other areas where the trucks will be cleaned and washed down often. All have two swivel and two rigid casters.

Plastic-Deck Platform Trucks with Compact Folding Handles

2TUT6

The handles on these platform trucks fold down to save space when the trucks are not in use. These trucks are used in applications where they will be taken to different job sites or where there is minimal space for storing the carts. All have a solid deck with ribbed surface as well as two swivel casters and two rigid casters.

Steel-Deck Wagon Trucks

Wagon trucks are typically pulled instead of pushed, and they have a front-mounted handle that lets users guide heavy loads and maneuver them around corners. **Lipped** deck has a lipped edge that stops items from sliding off it. **Flush** deck lets heavy items slide onto or off of the deck to reduce effort during loading and unloading. **Flow-through** deck has openings that let debris and liquid fall through it to keep the trucks clean when used in dirty or wet areas. **Towable** trucks have a T-bar handle with a ring and can be manually pushed or connected to towing equipment for occasional low-speed towing applications. All of these trucks are constructed of 12-ga. steel and all ship assembled, except 26Y475.

12X315

Wagon Trucks with Flow-Through High-Volume Side-Panel Metal Deck

- Overall height, with sides: 21 ½ in (12X312); 26 in (12X313); 24 in (12X315)

The perforated metal deck on these wagon trucks has openings that let debris and liquid fall through it, which helps keep the wagons clean when used in dirty or wet areas. The wagons' side walls stop loads from falling off and can be folded down or removed to reduce straining and lifting when loading or unloading heavy items. Trucks ship unassembled.

Bins sold separately, available on Grainger.com

Wire-Spool Dispensing Cart

This cart has spindles that hold spools of wire and allow quick access for replacing spools. Wire guides under the cart's work surface hold wire ends for dispensing and cutting. The cart has louvered panels for attaching bins, shelves, and other optional accessories that hold items that are not stored on spools. Shipped assembled. 1200-lb. load capacity. Comes with two swivel and two rigid casters.

Two-Wheel Wire-Dispensing Carts

15V950

These carts have two semipneumatic wheels and can be tilted and rolled like a hand truck. They have multiple spindles that hold wire and other materials stored on reels or spools. The spindles can be removed when replacing spools and reels. Wire guides keep the ends of wires accessible and organized for dispensing.

Panel Trucks

The frame on these trucks supports long, thin panels or sheets. Also known as drywall carts, these trucks are used to store or move items such as drywall, plywood, glass panels, and partitions. The trucks' flush platform lets items slide onto and off of the carts during loading and unloading. All have two swivel and two rigid casters, unless noted otherwise. **A-frame** and **sloped-frame** trucks allow panels to lean toward the trucks' center to keep them balanced during transport. Sloped-frame trucks can be loaded from one side. A-frame trucks can be loaded from two sides. **Single-height vertical** trucks keep panels oriented at 90° to the trucks' deck and are all the same height. **Adjustable rails** can be repositioned or removed to make room for items of different sizes and save space when storing the trucks. **Fixed rails** uprights cannot be moved. **Nonmarring rails** have a vinyl coating that helps prevent damage to delicate finishes or surfaces.

V-Groove Cradle-Style Bar and Pipe Truck

V-shaped cradle holds large sizes or bundles of long materials and prevents round items from rolling off the truck. Also known as a bar and pipe dolly and big-wheel cradle truck, this truck has two large pneumatic wheels that can roll over rough terrain or flooring. The truck's T-handle is used to push the truck and control its movement, and it is offset so the operator walks along-side the truck instead of behind it.

Dayton®

Table Carts

Vertical divider rails span the length of these carts to support round and rectangular tables that are being trans-ported on the carts. The rails can be removed to reduce effort during loading and unloading. The carts' frames have been coated with smooth vinyl to prevent damage to tables on the carts.

Shopping Carts and Cart Corrals

WIRE SHOPPING & PLATFORM CARTS

Two-tier cart has two vertically stacked wire baskets that can hold groceries and other items. Compact size to navigate crowded aisles and tight spaces. Made from powder-coated steel. **Platform carts** have a flat wire deck that holds large or bulky items. Made from zinc-plated steel.

CART CORRALS

Galvanized steel enclosures keep shopping carts organized and contained when not in use. Help prevent loss or damage to carts by providing a place for customers to return empty carts. No tools required for assembly.

Dayton

General Purpose Pallet Jacks

Manual jacks with fixed-width forks are for use in warehouses, loading docks, manufacturing, and other industrial settings.

Fast lift can raise empty stacks of pallets and other light loads faster than other types of manual pallet jacks. Loads that are heavier than the pallet jacks' maximum fast-lift weight capacity are raised at a slower rate.

Four-way forks can fit into standard openings on the front and back of the pallets as well as low-entry cutouts on the pallets' side stringers, allowing them to enter pallets from all four sides.

Pallet Jack Accessories

Wheel stops prevent pallet jacks from moving as they are being transported or stored. Help prevent damage to doors, walls, and other surfaces. 1XFD7 has a magnetic back for securing to pallet truck for storage.

Storage caddy attaches to pallet jacks and has molded compartments, pockets, and holders for storing beverages, tools, pens, pencils, and clipboards. Large rear compartment can serve as a wastebasket.

Table top converts compatible powered-lift/manual-push high-lift pallet jacks into mobile lift tables. The work surface attachments rest on top of the pallet jacks' forks to provide a solid surface for work tasks.

Special-Application Manual Pallet Jacks

Adjustable-width jack allows operators to change the width across the forks to enter openings on pallets of different sizes. Ideal for applications where one jack is used to move pallets of various sizes.

All-terrain jacks have large pneumatic tires, tubular steel frames, and outriggers that absorb shock and impact and keep the jacks stable as they roll over rough terrain or uneven floors. The width across the forks is adjustable to allow the forks to enter openings on pallets of different sizes.

Load-retaining jacks have steel back supports attached to the frame that stabilize boxes, crates, totes, and other stacked materials to prevent them from shifting as the jacks move.

Confined space jacks have a foot pump that controls a hydraulic pump to raise, hold, or lower their forks. Ideal for crowded docks, manufacturing floors, narrow aisles, trailers, and other tight areas where there is not enough room to fully pull back the handle.

Quiet-operation jacks use sound-deadening materials, quiet-roll wheels and load rollers, and specially designed bushings in the pump assembly to limit the noise that is created to less than 60dB. For use in areas where noise levels must be strictly controlled.

Manual-Lift/Powered-Drive Pallet Jack

Propelled by an electric motor to reduce the physical effort required to move loaded jack over long distances or up inclined surfaces. The handle must be manually operated to raise, lower, or hold forks. More compact, lightweight, and easier to maneuver than fully powered pallet jacks. Motor is powered by a rechargeable battery. Drive controls and a battery-charge indicator are located on the tiller handle for quick access.

Load Capacity	Fork Size L	Fork Size W	Width Across Forks	Width Between Forks	Overall LxWxH	Item No.

Dayton

Powered Pallet Jacks

An electric motor both propels the pallet jacks and raises and lowers their forks. Reduces the physical effort required to operate and move loads over long distances, or up inclined surfaces. Electric drive and lift mechanisms, variable forward/reverse speeds, and push-button operation require minimal operator effort. Motor is battery powered (battery included).

High-Lift Pallet Jacks

- Steel frame

Manual jacks have a foot pedal or handle that operators pump to activate the hydraulic pump and lift the forks.

Powered-lift/manual-push jacks can lift loads faster with less physical effort. An electric motor activates a hydraulic pump to lift and lower the forks and keep them positioned at any height within their travel range. Motor is powered by a rechargeable battery and controlled with a push button. Jacks must be pushed or pulled by hand.

Dayton SOUTHWORTH

Container Tilters

Raise and tilt bulk bins, totes, gaylords, crates, and containers on skids or pallets to allow operators to easily access the contents. Forks have a 90-degree range of motion and can position loads at any angle within that range.

Manual tilter requires operators to pump the handle to activate the hydraulic pump and lift and tilt the forks.

Powered-lift/manual-push tilters can raise and tilt loads faster with less physical effort. Motor is powered by a rechargeable battery and controlled with a push button. Tilters must be pushed or pulled by hand.

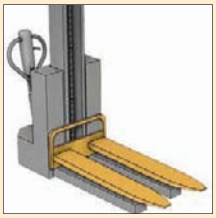
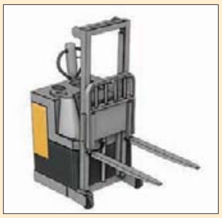
Stackers Information





Straddle Stackers

Outrigger legs positioned outside of forks for stability.

- Typically lighter and more compact than counterbalanced stackers
- Can maneuver in aisles and other tight spaces
- Forks can completely reach the ground, which allows them to lift any type of pallet or skid as long as there is sufficient clearance between it and the stackers' legs

Fork-Over Stackers

Outrigger legs positioned directly underneath forks for stability.

- More compact than straddle stackers and counterbalanced stackers
- Can maneuver in aisles and other tight spaces
- Can only lift open-bottom pallets, skids, or containers

Counterbalanced Stackers

Don't require outrigger legs to stabilize them.

- More weight behind their forks
- Can get closer to loads than fork-over and straddle stackers
- Can lift closed-bottom and open-bottom pallets and skids and place them in areas where stackers with projecting legs could not fit

Powered Stackers

An electric motor both propels the stackers and raises and lowers their forks, reducing the physical effort required to operate them and travel over long distances, inclined surfaces, sloped floors or ramps. Motor is powered by a rechargeable battery (included).

Manual Platform Lifts

Suitable for intermittent use and applications where loads will be moved and lifted over short distances. Compact footprint can maneuver in tight spaces such as aisles, loading docks, and store rooms. Can also be used as adjustable-height work tables and for feeding materials into machines.

Manual platform lift trucks have the outrigger legs positioned directly underneath the platform.

Manual platform lift trucks/stackers have a removable platform and adjustable-width forks. The platform is used for moving and raising loads that are not stored on pallets or skids, and the forks are used for moving and raising loads that are stored on pallets and skids.

Manual hand-truck-style platform lifts have two large rear wheels and are tilted back and rolled to move loads for short distances. The nose of the platform sits on the ground when the trucks are upright, for easy loading of items onto the platform.

Portable manual platform lift trucks have a handle and additional set of wheels mounted to the top of the frame that allow them to be tilted back and loaded into and out of vehicles when empty. The outrigger legs are positioned directly underneath the platform.

Easy-Transfer Table
2MPP5

SOUTHWORTH making work faster, safer, and easier · Dayton · BAILEIGH INDUSTRIAL

Manual Mobile Scissor-Lift Tables

- Corrosion-resistant carts are made of stainless steel; all others are steel
- Hydraulic foot pump lift control
- Dual scissor types are designed for higher-lift applications

A scissor-style support frame allows the platform to be raised or lowered to a wider range of heights than post-lift tables. The platform sits close to the ground when fully lowered, for easier loading of heavy items.

Corrosion-resistant tables resist rusting when exposed to high humidity, moisture, frequent cleaning, and chemicals. Wheels have polyurethane treads that resist exposure to chemicals and moisture and won't mark floors.

Easy-transfer tables have platforms with ball transfers for easy loading of flat-bottomed items onto or off of the platform. A side lever raises or lowers the ball transfers. When transfers are raised, items can slide on the platform. When transfers are lowered, items cannot slide on the platform, keeping them stable as the table is moved.

Quiet & Precise
Linear Actuator
2RDN3

Powered-Lift/Manual-Push Mobile Scissor-Lift Tables

- Push button lift control

Raise loads faster and with less physical effort than manual lift tables. Scissor-style support frame lets the platform be raised or lowered to a wider range of heights than post-lift tables. Platform sits close to the ground when fully lowered, for easier loading of heavy items. Tables have brakes or floor locks that can be engaged to prevent them from moving unexpectedly. An electric motor activates the hydraulic lifting mechanism to raise the platform. Motor is powered by a rechargeable battery and controlled with a push button. Must be pushed or pulled manually.

Quiet and Precise tables have a linear actuator that raises or lowers the platform more quickly, quietly, and accurately than tables with hydraulic or hand-crank lifting mechanisms. Used in areas where noise must be kept to a minimum, such as high-tech manufacturing, retail stores, offices, and medical facilities. Battery-powered actuator is controlled with a push button.

Manual Mobile Post-Lift Tables

- Steel platform

Offer more open space below the platform to use for transferring and positioning dies and other large, heavy parts. Floor locks prevent tables from moving unexpectedly.

Foot pump control tables have a hydraulic lifting mechanism.

Precise-positioning tables have a hand crank to give users more precise control over the position of the platform. Hand-crank lifting mechanism will not lose accuracy over time.

Material Lifts

Use telescoping masts to lift objects and position them in high places. Wheeled vehicles have steel bases that can fold up when not in use. Flat pallet forks (4YZ71) are required to lift pallets.

Heavy-duty manual material lifts have large-diameter solid-rubber-tread rear wheels that allow them to roll over rough terrain and uneven ground.

High-stability material lifts have built-in levelling jacks on their outrigger legs that level and stabilize the lifts. Used to raise and position lighting and sound rigs, scenery, and other equipment in theaters and live-performance venues. Also used for construction or contracting applications that require maximum stability when lifting equipment.

Compact air-powered material lifts have a telescoping mast and platform that are raised and lowered with a pneumatic piston. Piston can be powered by an optional refillable C02 tank or other compressed-air source, and is controlled with a pistol-grip handle. Compact footprint.

Fork Truck Work Platforms and Accessories

- 1000-lb. capacity
- Powder-coat finish

Use platforms to lift personnel along with light tools and equipment, allowing work and inspections to be safely performed on elevated equipment. Include 42" railing, 4" toe guard, safety strap, and lock.

NOTE: OSHA requirement; before platform is purchased contact the manufacturer of the fork lift before using the platform, as the load label affixed to the forklift truck will need to accommodate the platform load.

DAYTON

Feature autoclosing entry door with lanyard attachment rail. Double-Door models have 2 autoclosing entry doors, allowing access from both sides of platform.

BALLYMORE

Heavy-duty forklifts feature 60"H screen that shields operator from the forklift mast. Rugged steel construction with a nonskid platform. Convenient 2" x 7" fork pockets are mounted on 29" centers. 4" swivel casters on base permit easy positioning. Ship flat in box for easy assembly or order assembled.

ACCESSORIES

Sliding Tool Tray—¾" lip keeps tools and parts from sliding off.

Caldwell

Fork Truck Booms

- 7½"W x 2½"H usable fork pockets
- Include restraining chain with grab hook

Provide extra reach to lift and move heavy items safely.

Telescoping booms extend to a maximum horizontal reach of 12 ft. Feature alternate hook positions and a boom locking T-pin.

Pivoting booms have all the features of a telescoping boom, and can also be adjusted vertically in five increments up to 40º.

Reach Over boom is for use when clearance is a factor. Features swivel hooks with hook latches and multiple hook positions.

Precision Lifting booms are compact, versatile units that turn a standard forklift truck into a portable crane. Hook travels approximately 20 ft. Can be adjusted horizontally and vertically with easy toggle button control. Feature self-contained 12VDC power supply and 100 Ah battery with charger.

Pallet Pullers

3KR81

2A093

Pull pallet to the rear of a smooth truck floor for forklift access. 2¾"H heads are self-cleaning and unaffected by wood particles, paint, or grease. ¼" proof coil chain included. Steel construction.

Note: Not to be used for lifting.

Single Scissor Action—Allow for wider jaw opening. Overall closed length: 19½".

Double Scissor Action—1-pc. curved heads have integral spurs for gripping pallet stringers.

Fork Truck Fork Extensions

- Fit onto forks up to 2" thick
- Pkg. of 2

Include steel retaining strap and pin to prevent extensions from sliding off forks. Welded steel construction.

Note: See OSHA 29 CFR 1910.178(a)(4-5) and ASME/ANSI B.56.1-1992 (7.35) for application guidelines.

Disc Turntables

26W563

- Rotate pallets 360°
- Steel construction

Benchtop turntables allow workers to quickly gain access to all sides of the item being worked on. Plates rotate smoothly on ball bearings and include a serrated rubber top cover.

Manual turntables allow efficient loading and unloading of both pallet trucks and forklifts. Safety detent lock prevents the carousel from rotating when not in use.

Hand Truck Information

FEATURES

Easy-load hand trucks have nose plates with bevels or other features that help them slide under loads.

Easy-load and tilt hand trucks have foot kicks that let users push the bottom of the trucks forward as they tilt the trucks back, which makes it easier to start loaded trucks rolling. They also have nose plates with bevels or other features that help them slide under loads.

Ergonomic tilt-back hand trucks have two casters mounted on a rear frame extension that help support the hand trucks when tilted back.

Extended folding nose hand trucks have an extension that increases the length of their nose plate and folds up to save space when not in use.

Foot assist hand trucks have foot kicks that let users push the bottom of the trucks forward as they tilt the trucks back, which makes it easier to start loaded trucks rolling.

Load protectors prevent a hand truck's wheels from rubbing against items on the truck and damaging them.

Modular hand trucks allow users to replace parts of the hand trucks as they become worn or damaged.

Narrow hand trucks have a slim profile and can maneuver better in tight spaces than wider hand trucks.

Stair climbers help the trucks roll smoothly over stairs and curbs.

Welded hand trucks feature welded construction and are not modular.

Wheel fenders cover the front of the hand trucks' wheels to prevent damage to items on the trucks.

MATERIALS

Steel hand trucks are the standard option and are suitable for a wide range of applications.

Aluminum hand trucks weigh less than steel or stainless steel hand trucks and will not rust when used in damp or wet environments.

Nylon hand trucks are made from glass-filled nylon. They weigh less than aluminum or steel hand trucks and will not rust when used in damp or wet environments.

Stainless steel hand trucks will not rust when exposed to water, cleaning chemicals, and other corrosives.

General Purpose Hand Trucks

Feature steel frames and nose plates. Suitable for moving heavy loads in a wide range of tasks.

ACCESSORIES

Hand Truck Nose Plate is for replacement or addition to existing hand truck.

Hand Truck Nose Plate Extensions can be used to increase the length and/or width of the existing noseplate to hold larger or bulkier items.

1AGW3

Powered 2-Position Aluminum Convertible Hand Trucks

Battery-powered motor reduces effort when moving heavy loads. Lowering the motor throttle activates a braking mechanism that slows the trucks on ramps and inclines, and the trucks stop rolling when the throttle is at zero. Can be used as an upright two-wheel hand truck or a horizontal four-wheel platform truck. Include rechargeable battery pack and charger.

MAGLINER®

Folding Hand Trucks

Collapse to save space when stored or transported. Can be placed in a vehicle trunk, utility closet, or similar location between uses.

Telescoping hand trucks have a handle that retracts to save space when trucks are not in use.

Heavy-duty hand truck has a higher load capacity and is used for package delivery and other applications with heavy items.

Luggage hand trucks have deep nose plates that can support luggage or other bulky items.

Cylinder Hand Trucks

Frames are shaped to accommodate specific sizes and quantities of cylinders. Used for moving cylinders in medical, laboratory, food-processing, manufacturing, and construction applications.

Standard cylinder hand trucks have a steel frame and nose plate and come with a chain or strap to secure cylinders to the trucks.

Magnetic-hold cylinder hand truck has strong magnets that hold gas cylinders securely in place. Allows cylinders to be quickly loaded and unloaded.

Ergonomic tilt-back cylinder hand trucks can rest on all four wheels when they are tilted back.

Welding Cylinder Hand Trucks

Used to transport oxygen and acetylene gas cylinders used in welding applications.

Firewall welding cylinder hand trucks have a steel firewall that forms a barrier between cylinders on the trucks and helps prevent fires or explosions. It also protects cylinders from damage during transfer and storage. May be used to store cylinders for long periods of time (more than 24 hours).

Ergonomic tilt-back welding cylinder hand truck and **welding cylinder hand trucks** may be used for storing cylinders for short periods of time (less than 24 hours).

Ergonomic Tilt-Back Corrosion-Resistant Truck 34D654

Steel-Frame Pail Truck 9MK73

Pail and Drum Hand Trucks

Designed for moving large, heavy containers such as pails or drums.

Powered hand trucks have a battery-powered motor that reduces effort when moving loaded trucks.

Knock-down hand trucks are sold unassembled and cost less to ship.

Ergonomic tilt-back hand trucks have two small wheels mounted on a frame extension behind the two primary wheels. The rear wheels support the trucks when tilted back, reducing the physical effort required when moving heavy drums.

Dispensing hand trucks can be laid down horizontally to allow the contents of a drum to be dispensed while the drum is secured to the trucks.

Machinery and Equipment Movers

Movers have forks or noseplates that slide under heavy equipment such as furniture, crates, and machinery. Lifting mechanism reduces physical effort when raising equipment off the floor. Sold in pairs and must be used in pairs. Each mover requires one operator. 13V407, 13V408, 13V411, and 13V412 include load-securing straps.

Mechanical-lift movers have mechanical lift mechanism with hand pump lift control.

Hydraulic-lift movers require less physical effort to operate than mechanical-lift movers. Note: Sold in pairs and must be used in pairs.

Details on page A1.

Dolly Material Information

Aluminum dollies resist corrosion and are lighter than steel dollies.

Fiberwood dollies weigh less than wood dollies. They are less noisy and less likely to damage delicate materials or surface finishes than metal dollies.

Plastic dollies are lighter, more resistant to dents, and easier to clean than metal or wood dollies.

Steel dollies are more resistant to cracks and scratches than aluminum, wood, or plastic dollies.

Wood dollies make less noise and are less likely to damage delicate materials or surface finishes than metal dollies.

Lift-and-Roll Desk Dollies

Used to raise and move desks that have file cabinets or drawers on both sides and legs underneath. Allow desks to be moved without emptying the drawers or removing items from the top surface. Steering handle can be removed for loading, unloading, or storage.

ACCESSORIES

Table-lift attachments fit underneath the center of the top surface of the desk to support computer desks and other types of desks that do not have file cabinets or drawers on the sides.

Single-pedestal attachments allow the dollies to move desks that have drawers on only one side.

Machine Rollers

Rollers are placed under industrial machinery and other heavy equipment to move them.

Steering bars connect to a single machine roller to improve operator control when maneuvering large loads in tight areas.

Turning bars connect three machine rollers together to provide increased weight capacity and stability when maneuvering turns compared to individual rollers.

Caster Selection Guide

Swivel Caster: Caster raceway capable of rotating 360°.

Rigid Caster: Fixed caster without a raceway, that can roll forward or backward, but restricted from swiveling 360˚.

Kingpinless Caster: Swivel caster constructed without a kingpin, provides a superior raceway for shock conditions.

Bolt Hole Caster: Stemless caster where a standard bolt is inserted into the hole and bolted to the equipment.

Pneumatic Caster: Air-filled wheels, designed for low-speed manually moved applications, providing a cushioned ride, shock absorption, and quiet operation.

Semipneumatic Caster: Extra-thick, solid, soft rubber tire has no air and eliminates the risk of a flat tire. Designed to reduce the vibration and shock caused by floor surfaces which are not smooth.

Solid Rubber Wheel Caster: Designed for high-capacity applications, featuring a solid tire construction.

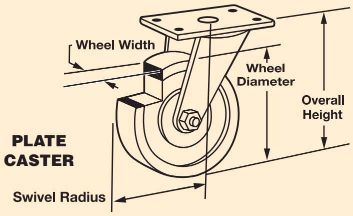
Brake: Prevents movement of the caster wheel. Not designed to stop moving equipment, nor intended for use on ramps or inclines.

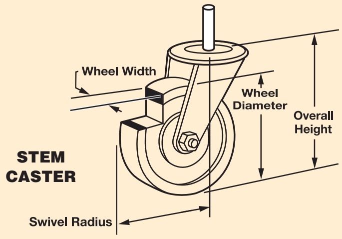
4-Position Directional Lock: Locks the swivel of the caster to a rigid position, for straight line travel.

Total Lock: Simultaneously locks both the swivel and wheel of the caster to hold equipment in place.

Flat-Free Wheel: Solid, super elastic solid rubber tire provides shock-absorption and load handling characteristics similar to a pneumatic tire with the benefit of never going flat.

Wheel Size & Overall Height





Wheel Material Guide

Cast Iron: High-capacity and abrasion-resistant for easy rolling and long service life on concrete.

Ductile Iron: Superior resistance to breakage, cracking, and chipping for long service life in the most severe of applications.

Forged Steel: Indestructible in normal applications and long service life. Used where floor protection is a secondary consideration, or for use on steel plates.

Glass-Filled Nylon: Will not chip, absorb water, or breakdown in caustic environments.

Neoprene: High resistance from oil and chemicals while providing sufficient cushioning to substantially lower or eliminate shock, vibration, and noise levels.

Nylon: Withstands solvents, corrosive environments, and temperature extremes.

Phenolic: Highly resistant to oil, grease, gasoline, and mild acids. Recommended for use on smooth concrete. Not recommended for wet applications or use over rough surfaces.

Polyolefin: Lightweight, one-piece solid sanitary design suited for use in wet and corrosive applications.

Polypropylene: Resists absorption and withstands most chemicals and solvents.

Polyurethane: Easy-rolling wheels, cushion loads, protect floors, and offer superior chemical resistance.

Rubber: Long-wearing wheel provides floor protection and quiet operation.

Stainless Steel: Strong and durable design, ideal for use in a wet, corrosive, or sanitary environments.

Steel: Provides strength and shock resistance with long service life and economy for use in rough service conditions.

Thermoplastic Rubber (TPR): Chemical- and water-resistant, absorbs shock and protects floors, while providing easy rollability.

Stem Types

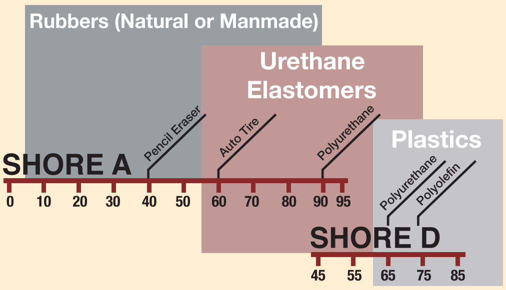
Wheel/Tread Hardness Rating

Measures the hardness of the wheel material—the higher the number, the harder the material. The preferred method is using either the Shore A or Shore D scale.



Load Rating

Load Rating is the maximum weight (lb.) each caster can support individually. To determine the appropriate rating for your application, divide the total weight of the load by the number of casters that will support it. It is recommended that you utilize a safety factor and multiply your load capacity by 1.33. It is important to choose a caster with a capacity that exceeds, rather than meets, load requirements.

$$\text{Load Rating} = \frac{\text{Load Capacity} \times 1.33}{\text{No. of Wheels}}$$

Light-Duty Standard Plate Casters

Install onto carts, dollies, food-service equipment, business machines, store fixtures, and similar equipment that will be moved manually at moderate speeds. Casters have zinc-plated steel frames and are suitable for transporting relatively light loads along smooth, flat surfaces in offices, retail stores, schools, government buildings, and other settings where they won't encounter shock loading.

Light-Duty Standard Plate Casters for Furniture

Swivel casters mount onto chairs, furniture, and other office equipment that will be moved manually at moderate speeds. Casters have a decorative frame finish that enhances the look of the furniture or equipment. Suitable for transporting light loads along smooth, flat surfaces in offices and other areas where they won't encounter shock loading.

Low-Profile and Easy-Turn Standard Plate Casters

Low-profile casters install onto equipment that needs to stay close to the ground to maximize its stability while rolling. **Easy-turn** casters each have two wheels mounted on one axle, which reduces friction between the floor and the wheels and allows the casters to swivel more easily than single-wheel casters. Light-duty and medium-duty casters have steel frames and are used on carts, business machines, and other equipment that will be moved manually at moderate speeds along smooth, flat surfaces in areas where the casters won't encounter shock loading.

Debris-Resistant Standard Plate Casters

Casters have thread guards that stop debris from getting into the casters' axles and damaging or contaminating them, extending the casters' life when used in dusty or dirty environments. Mount onto carts, dollies, tables, storage racks, and other equipment that will be moved manually at moderate speeds. Suitable for transporting loads along smooth, flat surfaces in areas where they won't encounter shock loading, such as laundry rooms, textile factories, offices, retail stores, schools, and government buildings. **Light-duty** casters are also known as institutional casters. **Medium-duty** casters can typically bear more weight and withstand more industrial conditions than light-duty casters.

Corrosion-Resistant Standard Plate Casters

Casters have stainless steel frames that resist rusting and withstand exposure to corrosives like water or cleaning chemicals used in food-service facilities, pharmaceutical plants, laboratories, cleanrooms, hospital waste areas, marine environments, and similar settings. Mount onto carts, dollies, tables, racks, and other equipment that will be moved manually at moderate speeds. Suitable for transporting loads along smooth, flat surfaces in areas where they won't encounter shock loading. **Light-duty** casters are also called institutional casters. **Medium-duty** casters can typically bear more weight and withstand more industrial conditions than light-duty casters.

Heat-Resistant Standard Plate Casters

Casters have hard nylon wheels and can withstand continuous exposure to dry heat up to 480°F. Used in areas such as bakeries, laboratories, light manufacturing facilities, pharmaceutical plants, and electronics parts testing sites. Casters have zinc-plated steel frames and mount onto racks and other equipment that will be moved manually at moderate speeds. These swivel casters can rotate up to 360°, allowing equipment to change directions while rolling.

Heavy-Duty Standard Plate Casters

Casters have zinc-plated welded steel frames and a stronger kingpin than light-duty or medium-duty standard plate casters. Withstand heavy loads and frequent use and are mounted onto racks, utility trucks, production jigs, fixtures, and other heavy equipment used in industrial settings where the casters will be rolling along irregular or rough surfaces and may encounter shock loading.

Extra Heavy-Duty Standard Plate Casters

Casters have forged steel frames and forged or welded steel kingpins and can bear heavy loads. Can tolerate more frequent use and withstand more shock and impact from rolling over rough or uneven ground than light-duty, medium-duty, and heavy-duty standard plate casters. Install onto the bottom of dumpsters, trailer frames, die carts, and other heavy equipment used in industrial areas such as manufacturing plants, construction sites, and assembly plants.

Super-Duty Standard Plate Casters

Casters have forged steel frames and forged steel kingpins and can bear very heavy loads. Can tolerate more frequent use and withstand more shock and impact from rolling over rough or uneven ground than light-duty, medium-duty, heavy-duty, and extra-heavy-duty standard plate casters. Mount onto die carts and other heavy equipment used in shipbuilding sites, aerospace plants, automotive factories, steel mills, heavy equipment manufacturers, and other industrial operations.

Standard Plate Caster Kits

Kits contain parts for replacing worn or damaged casters or adding new casters to equipment. Include two swivel plate casters and two rigid plate casters that are used together to allow the equipment to both maneuver around curves and obstacles and maintain a straight course while rolling. Each kit's load rating is the sum of the load ratings for all the casters in the kit. All casters have roller bearings suitable for moving heavy loads. **NSF-listed** standard plate caster kit satisfies the National Sanitation Foundation's (NSF) rigorous testing requirements for casters that are used in environments where they will be exposed to frequent washdowns, oils, or chemicals.

Kingpinless Plate Casters

Kingpinless casters do not use a kingpin to hold the caster together. Casters distribute weight more evenly, roll more smoothly, tolerate higher speeds, and can better withstand impacts and shock forces than standard plate casters. Suitable for industrial applications where they will be rolling on rough or uneven surfaces. **Light-duty triangular-mount** casters have a triangular mounting plate and can be installed in areas where a caster with a square mounting plate would not fit. **Medium-duty** casters have zinc-plated steel frames and are suitable for pushing and lightly towing carts and trucks in assembly lines, metal fabrication, and waste- and scrap-disposal applications. **Heavy-duty** casters have zinc-plated or powder-coated steel frames and are suitable for pushing and towing carts, trucks, and equipment in heavy manufacturing plants and automotive assembly lines. **Extra heavy-duty** casters have thick steel frames and are suitable for pushing and towing carts, dollies, trailers, heavy machinery, storage tanks, gantry cranes, and other equipment in heavy industrial operations. **Super-duty** casters are suitable for pushing or towing equipment such as gantry cranes, storage tanks, and large machinery in automotive and aerospace manufacturing, shipbuilding, and airport ground support operations. **Easy-swivel extended-lead** casters take less effort to start rolling, provide better tracking, and create less chatter (wobble) than plate casters with standard-length leads. **Easy-turn** casters each have two wheels mounted on a single axle, which reduces the friction between the floor and the wheels and allows them to swivel more easily than single-wheel casters. **Corrosion-resistant** casters have stainless-steel frames that resist rusting when used in areas where they will be exposed to water, cleaning chemicals, and other corrosives.

NSF-Listed Sanitary Plate Casters

Casters satisfy the National Sanitation Foundation's (NSF) rigorous testing requirements for casters that are used in environments where sanitary conditions must be maintained. Mount onto carts, prep tables, food-service equipment, racks, and similar items that will be exposed to frequent washdowns, oils, or chemicals. **Light-duty** casters have zinc-plated or nickel-plated steel frames and are suitable for transporting relatively light loads over smooth, flat surfaces. **Medium-duty** casters have thick steel frames and can bear heavier loads, tolerate more frequent use, and withstand more shock and impact than light-duty casters. Suitable for transporting moderately heavy to heavy loads over smooth, flat surfaces. **Corrosion-resistant** casters have stainless-steel frames that resist rusting when exposed to water, cleaning chemicals, and other corrosives. **Heat-resistant** casters have nylon wheels that can withstand exposure to high temperatures up to 550°F. **Debris-resistant long-swivel-life** casters have a dust cap that stops debris from entering the casters' swivel raceways and preventing the caster from swiveling.

Quiet-Roll Medical Plate Casters

Casters have precision ball bearings that provide smooth rolling and minimize noise that can disturb patients in medical settings. Thread guards keep debris from getting into the casters' axles and damaging them. Mount onto equipment used in hospitals, rehabilitation centers, pharmacies, laboratories, and similar medical facilities. **Antimicrobial corrosion- and debris-resistant** casters are made from stainless steel and resist corrosion when exposed to water and chemicals. The casters' wheels are impregnated with an antimicrobial compound that prevents odor-causing, damaging microbes from growing on them. Suitable for use where high standards of cleanliness must be maintained and equipment will be washed down frequently. **General purpose** casters are suitable for a wide range of applications in hospitals and other medical facilities. **High-performance** casters have precision ball bearings and provide smoother, quieter rolling than other types of medical plate casters. Nylon frames resist chemicals and corrosion and weigh less than metal frames. Suitable for use on equipment that will be moved frequently and may be exposed to chemicals. **Low-profile easy-turn** casters are used on patient lifts and other equipment that must stay low to the ground to maximize its stability. Casters have two wheels mounted on a single axle, which reduces friction between the floor and the wheels and allows the casters to swivel more easily than single-wheel casters.

Maintenance-Free Plate Casters

RWM ALBION®

Casters have sealed precision ball bearings in their swivel raceways and wheels that do not need to be routinely greased, which reduces time spent on maintenance and helps extend the casters' life. Casters roll quietly and require minimal force to start and keep them rolling. **Medium-duty** casters have zinc-plated steel frames and are used on carts, racks, and similar equipment that will be carrying moderately heavy to heavy loads over flat, smooth surfaces. **Shock-absorbing** casters have spoked wheels that absorb and distribute shock to prevent damage to the caster and minimize noise while rolling. **Heavy-duty** casters have zinc-plated steel frames and can bear heavier loads, tolerate more frequent use, and withstand more shock and impact than medium-duty casters. Suitable for carts, trucks, towline fixtures, and other equipment that will be pushed manually or towed by powered equipment in manufacturing, aerospace and automotive assembly, warehouses, and similar industrial applications.

Medium-Duty Swivel Caster 3G203

HAMILTON®

Shock-Absorbing Plate Casters

Casters have spring-loaded suspensions that absorb shock and vibration when rolling over obstacles or rough terrain, and help prevent damage to equipment as well as any shock- or vibration-sensitive cargo that is being transported. Suspensions can be adjusted to achieve the smoothest ride possible. **Quiet-roll** casters provide smooth, quiet rolling in areas where noise levels are a concern. **Medium-duty** casters are used on carts, trucks, racks, and trolleys that will be moving moderately heavy loads in manufacturing plants, laboratories, and computer and networking rooms. **Heavy-duty** casters can withstand heavier loads and more frequent use than medium-duty casters. Used on racks, trolleys, and fixtures in manufacturing plants, computer and networking rooms, sound and lighting applications, and other industrial settings. **Extra-heavy-duty** casters can bear very heavy loads and withstand more shock and impact than heavy-duty casters. Used on airport ground-support equipment, assembly line dollies, and production equipment in manufacturing plants and other industrial environments.

Pneumatic-Wheel Plate Casters

Casters have air-filled wheels that absorb shock and vibration and reduce noise as they roll. Suitable for moving fragile or vibration-sensitive loads on equipment that is traveling over rough or uneven surfaces in indoor and outdoor areas. All swivel casters have a double-ball bearing raceway. Casters with a brake have an over-the-wheel strap brake. **Medium-duty** casters are used on carts, trucks, and equipment in warehouses, transportation facilities, lawn and garden centers, and hospitality sites. **Extra-heavy-duty** casters bear heavier loads, withstand rougher terrain, and absorb more shock and impact than medium-duty casters. Used on heavy carts, trucks, and equipment in towing applications, such as aerospace ground support, airport baggage trolleys, and manufacturing and maintenance operations.

Leveling Plate Casters

Used on equipment that will be moved often but must stay stationary when in use. Each caster has a leveling pad that can be raised to allow it to roll and lowered to prevent it from rolling, and a thumbwheel adjusts the pad's height to level the equipment. All are swivel casters that can rotate 360°, and have impact-resistant nylon wheels. **General purpose** casters are used on furniture and equipment in high-automation manufacturing, medical, retail, and laboratory settings. **High-adjustability extended-stem** casters have long leveling stems and can be adjusted to a greater range of heights than other leveling plate casters to accommodate very uneven floors or raise furniture or equipment high off the ground in areas such as food-processing plants, medical settings, pharmaceutical facilities, packaging and conveying operations, and laboratories. **Quick-engage pedal-style** casters have a foot pedal that users step on to quickly start or stop the casters from rolling. Used on reconfigurable machinery and production lines in heavy manufacturing and industrial applications.

Note: For safety, working load cap. for 4-caster installations should not exceed 2 x individual caster load rating. Example: Working load cap. is 1100 lb. for 4 of 24WK16 (load rating is 550 lb. each).

HAMILTON®

Track-Wheel Plate Casters

Casters have wheels that fit into compatible steel tracks or rails. Mount to containers, racks, carts, and other equipment and provide precise control over movement and alignment when moving the equipment between two locations, such as from one machine to another, into and out of an oven, or between points on an assembly line. All swivel casters have double-ball hardened raceways. **V-groove** have wheels with a V-shaped tread that mates with a compatible angle-iron track. They have flat edges and can roll on flat surfaces. **Single-flange** have wheels with one flange that guides them along a flat track or rail. They create less friction between the wheel and the track or rail than dual-flange track-wheel casters. **Dual-flange** have wheels with two flanges that guide them along a flat track or rail. They maintain their alignment better than single-flange track wheels in applications with impact loads, debris, or obstructions.

Inverted-Mount Plate Casters

Casters are installed with their wheels pointing up to create a low-friction surface for moving bulky and heavy loads. Groups of these casters are mounted in floor recesses in dock areas, airport cargo-loading areas, or aircraft to reduce the effort it takes to move and manuever large cargo containers on the floor. Can also be mounted on conveyors or portable dollies and fixtures that are used for handling large containers to provide multidirectional movement in transition, infeed, or outfeed sections. All are swivel casters and can rotate 360°, and have precision ball bearings. **5VF59** has a foot guard that prevents toes and feet from slipping into the caster's mounting recesses and causing falls or injuries.

General Purpose Swivel w/Brake 490W37

Extended-Stem 400K80

Threaded Stem Casters

Stem casters screw into a hole, bracket, insert, or socket and are typically used to add casters on equipment where there is not enough room to attach a plate caster's mounting plate. All are swivel casters and can rotate 360°. **General purpose** casters are used on carts, furniture, storage cabinets, storage bins, display stands, appliances, retail fixtures, and other equipment in a wide variety of settings. **Extended-stem casters** are used on ladders, platforms, and similar equipment in areas such as warehouses, stockrooms, and loading docks. Extra-long threaded stem with a spring-loaded assembly allows equipment to lower to keep it stationary when in use, and raises the equipment when not in use so it can roll.

Maintenance-Free Expanding Stem Casters

Expanding stem casters can be installed into structural tubing with a range of diameters and don't need to be secured with bolts or pins. A knurled nut can be tightened to expand the rubber sleeve on the caster's stem until it is large enough to firmly grip the inside of the tubing. Casters have sealed precision ball bearings that do not need to be routinely greased, which minimizes maintenance and extends casters' life. Lightweight nylon frames resist chemicals and corrosion, and thread guards prevent dirt and debris from entering the casters and damaging them. Suitable for carts, racks, and equipment in medical facilities, pharmacies, laboratories, food-service areas, and other areas where equipment will be moved frequently and may be exposed to water, chemicals, and debris. All are swivel casters that can rotate 360°, and have a thermoplastic rubber tread.

Ball Wheel 19YX24

Single Wheel 19YX28

Grip-Neck Stem Casters

Install into a specially designed socket that grips the stem head for a secure hold. Used on office furniture, cabinetry, retail displays, and other light-duty equipment made from wood or metal tubing that have these special sockets. **Ball-wheel** casters have a spherical wheel covered by a hood that hides dirt and scuffs. **Single-wheel** casters each have one wheel.

Friction-Ring Stem Casters

Caster stem presses into an appropriately sized hole or socket in tubes, pipes, wood, or brackets on furniture and equipment. A spring ring at the end of the stem expands to hold the caster in place once it's installed. Require minimal or no tools for installation. Suitable for applications where casters need to be replaced frequently. All are swivel casters that can rotate 360°. **General purpose** are for use on carts, furniture, storage cabinets, storage bins, display stands, retail fixtures, and other equipment in a wide variety of settings. **Wall-protecting** have rubber rings that protect walls and other surfaces from damage if the casters collide with them.

Bolt-In Stem Casters

Casters have a round or square stem that fits into structural framing made of metal tubing or angle iron. Caster is held in place with a bolt or pin that is installed into cross-drilled mounting holes in the framing and the caster's stem. **Round stem** fit into round metal tubing on light-duty scaffolding, work platforms, workbenches, and tables. **Square stem** fit into square or octagonal metal tubing or angle iron on carts, racks, and similar equipment.

For information on selecting casters, see page 1191.

Swivel Caster w/Brake 26Y501

Low-Profile Easy-Turn Stem Casters

Used on equipment that must be kept low to the ground to maximize its stability while rolling, such as business machines, vending machines, store fixtures, lab equipment, refrigeration units, dollies, and server cabinets. Eash caster has two small wheels mounted on one axle, which reduces friction between the floor and the wheels and allows the casters to swivel more easily than single-wheel casters. All are swivel casters and can rotate 360°.

Furniture Stem Casters

BEVCO

Install on chairs, carts, fixtures, and similar items in offices, retail settings, and other areas where they won't be exposed to heavy loads, chemicals, liquids, or high temperatures. Soft tread casters are less likely to damage hard tile or wood floors than hard tread casters, and hard tread casters won't grab or snag carpets.

NSF-Listed Sanitary Stem Casters

Casters satisfy the National Sanitation Foundation's (NSF) rigorous testing requirements for use in environments where sanitary conditions must be maintained. Mount on carts, prep tables, food-service equipment, racks, and similar items that will be exposed to frequent washdowns, oils, or chemicals. All are swivel casters and can rotate 360°.

Corrosion- and Debris-Resistant Stem Casters

Antimicrobial casters have wheels that are impregnated with an antimicrobial compound that prevents damaging or odor-causing microbes from growing on them. **Corrosion-resistant** casters will not rust or corrode in environments when exposed to water or cleaning chemicals. **Debris-resistant** casters have a thread guard that stops debris from getting inside the caster and damaging or contaminating it. Suitable for racks, carts, and other equipment that will be used in areas where the casters will be exposed to dirt or frequent washdowns, such as laundry rooms, textile factories, food-service facilities, restaurants, offices, government buildings, and schools. All are swivel casters and can rotate 360°.

Medical Stem Casters

Casters roll quietly and smoothly to minimize noise that can disturb patients. Use on beds, gurneys, IV poles, maintenance carts, food-service equipment, and other items in areas such as hospitals, rehabilitation centers, and laboratories. All are swivel casters and can rotate 360°. **Antimicrobial** casters have wheels that are impregnated with an antimicrobial compound that stops damaging or odor-causing microbes from growing on them. **Corrosion-resistant** casters will not rust or corrode when exposed to water or cleaning chemicals. **Debris-resistant** casters have a thread guard that keeps debris from getting inside the casters and damaging or contaminating them. **Maintenance-free** casters have sealed precision ball bearings that do not need to be routinely greased. **Single-wheel** casters each have one wheel. **Twin-wheel** casters each have two wheels that let them swivel and start rolling more easily than single-wheel casters.

Side-Mount Casters

Casters have vertical mounting plates that attach to the sides of gates, doors, fences, and other heavy equipment that won't support a traditional plate or stem caster. Spring-loaded suspension absorbs shocks to provide a smooth ride even when the casters are rolling on uneven surfaces. All have rubber tread.

Corrosion-Resistant Swivel 22N037

Bolt-Hole Casters

Casters have an open hole that provides versatility when mounting the casters to carts, furniture, storage cabinets, racks, and other equipment. Can be installed in tubing using compatible expanding mounting stems that get larger as they're tightened to keep the caster firmly in place, or installed in wood using a lag bolt. **Low-profile** casters are used on equipment that must stay low to the ground to keep it stable while rolling. **Easy-turn** casters each have two wheels, which reduces friction between the floor and the wheels and allows them to swivel more easily than single-wheel casters. **Heavy-duty long-swivel-life** casters have a sealed swivel mechanism that prevents dust and dirt from entering the caster. Thick steel frames can bear heavier loads, tolerate more frequent use, and withstand more shock and impact than other types of bolt-hole casters. **General purpose** casters are suitable for a wide variety of uses, including light-duty to medium-duty maintenance, contracting, janitorial, manufacturing, warehousing, and transportation applications. **Corrosion-resistant** casters have stainless steel frames that withstand frequent washdowns or exposure to chemicals.

Polyolefin Tread Wheels

Wheels with hard polyolefin treads will not mark or chip floor surfaces. Lightweight, corrosion-resistant wheels can withstand impacts and exposure to water, oils, and chemicals. Nonabsorbent and can be steam cleaned. Not suitable for prolonged exposure to heat or cold.

1UBN8

Phenolic Tread Wheels

Wheels with hard phenolic treads resist oils, grease, gasoline, and mild acids and can handle heavy loads without damaging floors. For use in dry environments with smooth, hard flooring such as concrete. 1UBN6 to 1UBN8 are laminated phenolic.

Rubber Tread Wheels

Wheels with rubber treads are suitable for most types of flooring. **Soft** treads offer more cushioning and better floor protection than hard treads. **Hard** treads provide more weight capacity, better abrasion resistance, and easier rolling than soft treads. **Nonmarking** treads will not leave marks on floors.

Aluminum wheel cores are lighter and more rust- and corrosion-resistant than iron cores. **Plastic, nylon,** and **polyurethane** wheel cores are lighter and more corrosion-resistant than metal cores. **Iron** wheel cores typically have high load capacities but must be used in dry environments. **Rubber** wheel cores have a rubber tread and core that are molded as a single piece, eliminating the risk of the tread and core separating during use.

Polyurethane Tread on Plastic Core Wheels

Wheels have plastic cores, which weigh less and are more corrosion resistant than metal cores. Withstand exposure to water. Polyurethane treads resist abrasion and chemicals, roll quietly, and will not mark floors. **Glass-filled nylon** cores will not chip, absorb water, or break down in caustic environments. **Nylon** cores withstand exposure to solvents, corrosive environments, and extreme temperatures. **Polyurethane** cores provide excellent chemical resistance. **Rubber** cores absorb shock and resist impact.

Polyurethane Tread on Metal Core Wheels

Wheels have metal cores and typically provide higher weight capacities than wheels with plastic cores. Polyurethane treads resist abrasion and chemicals, roll quietly, and will not mark floors. **Aluminum** cores are lighter and more resistant to rust and corrosion than iron or steel cores. **Iron** cores provide good wear resistance and must be used in dry environments to avoid rusting. **Steel** cores provide more wear resistance and have higher load capacities than iron or aluminum wheel cores. For use in dry environments.

Nylon Tread Wheels

Wheels are hard, lightweight, and will not mark floors. Withstand exposure to solvents, corrosive environments, and temperature extremes; not recommended for heavily acidic or basic environments. Can be steam cleaned and will not chunk or separate. **Ergonomic** wheels roll smoothly and provide very low resistance to rolling and swiveling. **Heat-resistant** wheels are made from reinforced nylon and withstand exposure to very high temperatures. **Wheels for pallet jacks** are sized to fit pallet jacks and can carry heavy loads for their size.

Metal Tread Wheels

Wheels offer high weight capacities and withstand shock, abrasion, impact, rough use, and exposure to temperature extremes. Suitable for moving heavy loads over rough terrain. Tread and core are made from the same material. **Iron** wheels withstand exposure to corrosive chemicals, grease, and oils better than steel. **Steel** wheels can bear heavier loads than iron wheels. **Heat-resistant** wheels have double-shielded maintenance-free bearings and an enamel coating that allow the wheels to withstand exposure to very high temperatures.

Antimicrobial Wheels

Wheels are impregnated with an antimicrobial compound that stops damaging, odor-causing microbes from growing on them. Lightweight, corrosion-resistant plastic core. **Polyurethane** treads will not mark floors and are more resistant to abrasion and chemicals than rubber treads. **Rubber** treads are suitable for most floor types. **Thermoplastic rubber** treads withstand exposure to chemicals and water and will not damage floors.

20PM11

Conductive Rubber Tread Wheels

Wheels have a lightweight, corrosion-resistant plastic core and conductive rubber tread that disperses static electricity by letting it flow to the ground. Use on carts in medical settings, laboratories, computer rooms, cleanrooms, electronics manufacturing facilities, and other areas where static electricity buildup is a concern. Dissipate static electricity buildup that can damage equipment on carts, injure people who touch the carts, or cause sparks that can ignite flammable vapors near carts. Wheels have precision ball bearings and will not mark floors.

V-Groove and Flanged Track Wheels

Track wheels fit into compatible steel tracks or rails and provide precise control over movement and alignment when installed on containers, racks, and other equipment that will be moving between two locations, such as from one machine to another, into and out of an oven, or between points on an assembly line. **V-groove** wheels have a V-shaped tread that mates with a compatible angle-iron track. Edges are flat and can roll on flat surfaces. **Single-flange** wheels have one flange that guides the wheels along a flat track or rail. Create less friction between the wheel and the track or rail than dual-flange wheels. **Dual-flange** wheels have two flanges that guide the wheels along a flat track or rail. Maintain alignment better than single-flange wheels in applications with impact loads, debris, or obstructions.

Tread Type Information

TREAD TYPE

Tread refers to the part of a wheel that makes contact with a surface when rolling. Wheel treads may be smooth, or they may have ridges, bumps, or other features that provide maneuverability or traction.

Ribbed—Provides good contact on many surfaces.

Sawtooth—Provides traction and maneuverability on turf and grass.

Diamond—Offers two-way traction on soft ground or snow.

Centipede—Keeps wheels from slipping.

Smooth—Allows wheels to roll on tacky surfaces such as tar or asphalt.

Knobby—Offers traction on soft ground or snow.

Turf—Provides traction and helps prevents damage when rolling on lawns and other soft surfaces.

HUB TYPE

Center-mount hubs have equal clearance on all sides of the hub.

Offset hubs provide extra clearance between the wheel and the equipment it is mounted on.

Pneumatic Wheels

MARASTAR

Wheels are filled with air to cushion loads against shock and vibration. Provide a quieter, more cushioned ride than semipneumatic and flat-free wheels but require maintenance to keep them filled to the correct pressure. Can be punctured and are recommended for areas without sharp debris.

Semipneumatic Wheels

Wheels have a thick rubber wall with a nonpressurized air pocket in the center that cushions loads against shock and vibration. Will not go flat if punctured and can be used in areas that may contain sharp debris. Lighter than flat-free wheels, and require less maintenance than pneumatic wheels.

Flat-Free Wheels

Polyurethane foam wheels absorb more shock and provide a more cushioned ride than semipneumatic wheels. Do not require air pressure checks and will not go flat if punctured. Suitable for rolling over rough or uneven terrain in areas with sharp debris.

Heavy-Duty Adjustable-Height and Low-Profile Floor Locks

Locks have cast steel or stainless steel bodies and provide more strength and abrasion resistance than general purpose floor locks. **Adjustable-height** locks allow users to change the height of the locks' friction pads so they can be used with casters in a range of heights. Allows users to compensate for wear on the pads to maintain proper locking and unlocking action. **Low-profile** locks help ensure sufficient clearance when used on low-profile carts.

Spring Hanger Vibration Isolators

MASON INDUSTRIES

Steel springs reduce vibration transmission 2 to 6 times better than neoprene, as performance improves with larger deflections. LDS (Low Dynamic Stiffness) rubber cups under the springs and a projecting rubber bushing prevent sound transmission.

2-Pc. Center-Bonded Mounts

Isolate unwanted noise, vibration, and shock in all directions, including rebound direction. Easily installed through a supporting structure mounting hole. Neoprene elastomer effectively resists flame, gasoline, oil, natural aging, abrasion, and weather. Zinc-plated steel snubbing washer included.

Warning: Not suitable for exposures over 165°F.

Adjustable Jack Mounts/Vibration Isolators

Neoprene provides better equipment stability. Nitrile provides greater vibration damping.

Low-Profile—Provide low-profile leveling and isolation with attachment stud and hardware.

Higher-Floor Inclination—Automatically compensate for floor unevenness up to 4°. Include 2 nuts and 2 washers.

Internally Leveled—Provide up to 1" height adjustment. Include 1 nut and 1 washer.

Nitrile Low-Profile 15D910

Cylindrical Vibration Isolators

Isolators are compression-mounted to control noise, vibration, and shock. 50 durometer, natural rubber pads are chemically bonded to steel with superior abrasion resistance and high tensile strength. Grade 5 screws are clear, zinc-plated.

Note: Not for wall- or ceiling-suspended installations. Not suitable for excess exposure to oil, grease, and solvents, or temps. over 150°F.

Vibration Isolation Pads

MASON INDUSTRIES

Pads protect equipment from shaking and are designed for use when machines are bolted to the floor.

NEOPRENE

Pad modules are easy to cut to size. Self-gasketing waffle pattern helps contain spills and improves suction and grip.

Mini Super W Pads—Provide 1/16" max. deflection.

Super W Pads—Provide ⅛" max. deflection.

NEOPRENE AND STEEL

For concentrated loads such as heavy machines with small legs or formed sheet metal legs without a bottom surface.

Type A—Have a cemented steel plate between a bottom super waffle pad and top ¼" friction pad.

Type B—Have a ¾"-dia. center hole for bolting, no top friction pad. Includes ¾" neoprene isolation washer cemented to a steel washer.

NEOPRENE AND CORK

2 honeycombed neoprene sheets are adhered to a dense, granulated cork core.

NITRILE PADS

Oil-resistant pads are great for applications with constant exposure to oil, grease, or gasoline.

Vibration Isolation Pads

Profile neoprene provides best isolation; flat neoprene provides better equipment stability. Nitrile provides greater vibration damping.

Precut Pad Packs—Provide 4 points of support. Include 4 primary pads and 4 shim pads. Use metal shim between pad surfaces to compensate different heights of equipment.

Elastomer Sheets—Reduce noise and vibration of equipment. Use whole or cut sheets to custom sizes.

Boltless Leveling Mounts

Level-It™—Choose from steel, nonskid steel, stainless steel, and Delrin® base. See Grainger.com® for additional leveling mounts.

PolyMount™—Polyglass-filled nylon base is corrosion-resistant. Lag holes allow permanent floor mounting. For washdown applications. See Grainger.com® for additional leveling mounts.

Choose the Right Shelving

DUTY RATING

Light-Duty

- Hold lightweight supplies in offices or industrial areas where the shelving units would not be subject to impacts or abuse.

Medium-Duty

- Generally are sturdier and can hold heavier items than light-duty shelving units.
- Suitable for storing tools, equipment, and supplies in industrial settings.

Heavy-Duty

- Sturdier and can hold heavier items than light-duty or medium-duty open metal shelving units.
- Used in industrial facilities for storing heavy tools, equipment, and supplies.

Extra-Heavy-Duty

- Bolt together and provide more strength and rigidity than open metal shelving units with lower duty levels.
- Hold dies, fixtures, jigs, and other very heavy equipment.

SHELVING STYLE

Open units do not have back or side panels, so items on their shelves can be seen from all sides.

Closed units have back and side panels that prevent items from falling off their shelves.

SHELVING CONFIGURATION

Starter indicates the shelving unit can be used as a standalone unit, or it can be expanded with one or more add-on shelving units to create a multi-unit system.

Add-On indicates the shelving unit can attach to compatible starter or add-on units to build a multi-unit system. Each add-on unit shares posts with the unit it connects to, which saves space compared to placing multiple standalone units side by side.

Standalone indicates the shelving unit cannot be expanded with add-on shelving units, but multiple standalone units can be placed side-by-side, if desired.

6-Shelf Closed

5-Shelf Open

tennsco Storage Made Easy

Light-Duty Standalone Metal Shelving

- 250-lb. capacity per shelf (based on evenly distributed loads)
- Gray solid shelves adjust in 1" increments
- 72" overall height
- 16-ga. posts; 22-ga. shelves

Include braces that bolt to the posts to stabilize them and help prevent swaying. Clips anchor and support the shelves on their posts, and the clips can be moved to adjust the height of the shelves on the posts.

Overall Width	Overall Depth	OPEN Item No.	CLOSED Item No.

Open Starter Unit

Closed Add-On Unit

Hallowell

Antimicrobial Medium-Duty Metal Shelving

- Solid shelves adjust on 1½" centers
- 84" overall height
- 14-ga. posts; 22-ga. shelves
- Light gray antimicrobial powder-coated finish

Antimicrobial finish stops damaging, odor-causing bacteria, mold, and mildew from growing. Helps keep the shelving clean for schools, hospitals, and other areas that must maintain high standards of cleanliness. Clips anchor and support the shelves on their posts, and the clips can be moved to adjust the height of the shelves on the posts.

DENIOS THE HAZMAT PRO®

Spill-Containment Medium-Duty Open Metal Shelving

- 84" overall height
- 16-ga. posts and shelves

Lipped solid shelves contain spills or leaks to help prevent contamination of items or surfaces below them, making these units suitable for storing small containers of liquids in industrial areas. Include braces that bolt to their posts to stabilize them and help prevent swaying. Clips anchor and support the shelves on their posts, and the clips can be moved to adjust the height of the shelves on the posts.

Heavy-Duty H-Post Metal Shelving

Hallowell

- 14-ga. posts
- Shelves adjust in 1½" increments
- Powder-coated finish

High-capacity H-posts allow use of full shelf width and are common between adjoining units to reduce cost, and assembly and installation time. Shelves are box-formed at front and back with triple-flanged sides for added strength. Included compression shelf clips add to overall unit capacity.

Open shelving includes sway braces and closed shelving includes 18-ga. side, and 24-ga. back panels for enhanced stability.

Heavy-Duty Open and Closed Shelving

Hallowell

- 14-ga. posts; 18-ga. shelves

Shelves are box-formed at front and rear, with triple-flanged sides and welded corners for maximum strength. Beaded front post allows use of full shelf width. Angle back posts bolt together when adding units; quick, easy assembly.

ACCESSORIES FOR CLOSED SHELVING

Vertical Shelf Dividers—Clip into shelves using nylon fasteners to provide additional organization.

Double Swinging Doors—Create cabinet-like storage. Include chrome-finish handle with built-in cylinder key lock for 3-pt. positive locking.

Closed Base Strips—Close the gap between floor and bottom shelf to prevent dirt and debris from accumulating under shelving.

STANDALONE SHELVING

- Intermediate shelves adjust in 1½" increments
- Steel shelves, gray powder-coated finish

Durable shelving provides adjustable storage with access from all four sides. Top and bottom shelves are triple-flanged on all sides and bolted for maximum strength and stability. Units include four angle posts.

EQUIPTO

Heavy-Duty V-Stud Metal Shelving

- 84" overall height
- 14-ga. posts and 18-ga. shelves

V-stud shelf reinforcements offer more protection against shelf deflection (or sagging) than standard shelf clips when heavy items are placed on the shelves. Include braces that bolt to the posts to stabilize them and help prevent swaying. V-stud shelf reinforcements anchor and support the shelves on their posts, and the studs can be moved to adjust the height of the shelves on the posts.

1XEC2

Vestil

Corrosion-Resistant Open Metal Shelving

- 72"H units with 4 shelves
- 18-ga. posts and shelves

Units resist rusting when used in kitchens, laboratories, and other environments where they will get damp or wet. Include posts and shelves and are not enclosed with back or side panels, so items stored on the shelves can be viewed from all sides. Freestanding units provide space for organizing and staging tools, supplies, and inventory. Efficiently utilize vertical space in work areas and storage areas without having to mount shelving to a wall.

Overall Width	Overall Depth	Load Capacity per Shelf *	Item No.

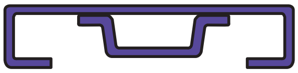
	24 in	600 lb	**1XEC5**

** Based on evenly distributed loads.*



Each shelf has an additional channel-formed stiffener welded to the underside of the shelf to prevent flexing under heavy loads.

Hallowell edsal StrongHold DURHAM MFG Est. 1922

Extra-Heavy-Duty Bolted Metal Shelving

- Shelves adjust in 1" increments
- 14-ga. steel shelves, gray powder-coated finish
- 5 shelf levels

Standalone units bolt together and provide more strength and rigidity than open metal shelving units with lower duty levels. Able to hold dies, fixtures, jigs, and other very heavy equipment. Sturdy posts provide a frame for the shelves which bolt onto the posts.

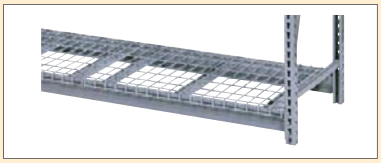
Boltless & Bulk Rack Decking Options

NO DECKING
Allows for customization of decking based on need.

PARTICLEBOARD DECKING
Economical choice for heavy load storage. Durable, smooth solid surface. Meets or exceeds ANSI-M2 standards.

LAMINATE DECKING
Laminate surface bonded to particleboard core provides a smooth finished surface that is easy to clean and moisture-resistant.

WIRE DECKING
Wire-mesh design allows a clear view of inventory and prevents accumulation of dirt, oil, and debris. It also maximizes the efficiency of sprinkler systems and allows better air circulation and light penetration.



RIBBED-STEEL DECKING
Provides extra strength and rigidity for heavy load storage. Ribs create a space to grab packages easily without pinching fingers.

ADDITIONAL DECKING
Bulk Storage and Boltless Storage Racks are available with or without decking. Additional decking can be ordered separately on Grainger.com®.

ADDITIONAL SHELF LEVELS
Additional shelves increase the available volume of storage while reducing the customer cost per square foot of storage.

BEAM PROFILE
Angle: A common L-shaped beam profile that provides good load carrying capability across different duty ratings depending on material gauge.
Channel: C-shaped profiles provide the greatest load carrying capacities for heavy and extra-heavy duty shelving depending on material gauge.
Low Profile: Light- & medium-duty beam profile with low overall height that maximizes vertical storage space access.
Z-Beam: Z-shaped profile balances strength and height to provide greater load capacity than low profile beams, but provides greater vertical storage space than angled beams and the ability to flush mount decking.

Medium-Duty Boltless Shelving

Medium-duty units are generally sturdier and can hold heavier items than light-duty units. Boltless shelving beams have rivets that fit into holes on the posts to connect them, and the beams are tapped in place with a rubber mallet to ensure a tight fit. Compatible with shelving components from the same manufacturer.

tennsco Storage Made Easy

Heavy-Duty Boltless Shelving

- 3 shelves
- Gray 14-ga. steel shelves

Generally sturdier and can hold heavier items than light-duty and medium-duty shelving units. The decking installs over the shelving units' beams to distribute the weight of items placed on the decking across the beams.

tennsco Storage Made Easy | Hallowell

Extra Heavy-Duty Boltless Shelving

- Standalone units
- 5 shelves
- 14-ga. posts and shelves

Extra heavy-duty units are generally sturdier and can hold heavier items than shelving units with lower duty levels. Used for storing dies, fixtures, jigs, and other heavy equipment. The decking installs over the shelving units' beams to distribute the weight of items placed on the decking across the beams.

Sandusky | tennsco Storage Made Easy

Split-Post Configurable Boltless Metal Shelving

Compact "Z" shaped beam design with recessed step protects particleboard deck from chipping, prevents splinters, and increases usable storage height and load capacity.

Particleboard Decking 1VG39

- Medium duty
- Shelves adjust in 1½" increments

Two-piece posts allow each unit to be assembled vertically to create a tall shelving unit or horizontally to create a short shelving unit that can double as a workbench. Compatible with shelving components from the same manufacturer.

Particleboard decking provides a smooth, solid surface that prevents items from falling through the shelving

Steel decking features a perforated surface that allows air to circulate through it for ventilation.

tennsco Storage Made Easy

Archival Boltless Metal Shelving

Units have multiple shelf levels that are sized to hold archive boxes for organized storage of files, documents, and similar items in offices, universities, and other institutions that handle large volumes of paperwork. No bolts or special tools are required to assemble, making them easier to put together than standard metal shelving units. Compatible with shelving components from the same manufacturer.

Medium-duty shelving units are used for general storage of archive boxes. Particleboard decking provides a smooth, solid surface that prevents items from falling through the shelving and will not mar or snag boxes. The decking installs over the shelving units' beams to distribute the weight of items placed on the decking across the beams.

Heavy-duty box-rail shelving units are sturdier and can hold heavier items than medium-duty shelving units. Instead of decking, they have box rails that install front-to-back between the beams on each of their shelf levels. The rails create channels that support archive boxes on the shelf levels and allow the boxes to slide in and out of the shelving.

tennsco Storage Made Easy

Heavy-Duty Metal Bulk Racks

- 3 shelf levels
- Gray electro-coated finish
- Adjustable in 2" increments

Allow clear and convenient access from the front or rear. Include welded footplates for floor mounting. Upright assemblies are prewelded for strength and will support up to 17,000 lb. based on 24" shelf centers. Racks include front-to-back supports: 2 per shelf level on 48" and 60"W beams, 3 per level on 72"W beams, and 4 per level on 96"W beams. Available with or without decking. Easy to assemble. No tools required.

Starter w/Ribbed Decking 7B505 (Shown with supplies, not included.)

Medium-Duty Fixed Open Shelf 8V343

Heavy-Duty Fixed Open Shelf 20VA80

Welded Metal Shelving

All or most parts of these shelving units are welded together, so they require minimal assembly and provide more stability than comparable standard metal shelving units or boltless metal shelving units. They stand on a floor and provide multiple shelf levels for organizing and staging supplies and inventory.

METRO
We put space to work.

Stationary Wire Shelving

Units assemble without tools and use two-piece split sleeves to anchor the shelves in place on their shelving posts. The shelves can be removed and the sleeves can be repositioned to raise or lower the shelves on the posts.

For Dry Use - A smooth, chrome finish prevents dust and debris from sticking. They may rust if exposed to moisture, so they are for use in dry storage areas such as stock rooms, garages, and retail stores.

For Wet & Dry Use - Black epoxy finish helps protect units from rust when used in damp or humid environments such as food service areas.

					FOR DRY USE			FOR WET & DRY USE

Light-Duty Wire Shelving

Assemble without tools and use two-piece split sleeves to anchor their shelves in place on posts. The shelves can be removed and the sleeves can be repositioned to raise or lower the shelves on the posts.

For Dry Use - Feature a smooth, chrome finish that prevents dust and debris from sticking. Suitable for storing lightweight items. They may rust if exposed to moisture, so they are for use in dry storage areas such as office supply rooms and retail stores.

For Wet & Dry Use - A black epoxy finish helps protect from rust when used in damp or humid environments such as food service areas.

QUANTUM™ STORAGE SYSTEMS

Antimicrobial Wire Shelving

- For wet and dry use
- 4 shelves

Epoxy finish contains an antimicrobial additive that prevents the growth of damaging, odor-causing mold, mildew, and bacteria and helps keep the units clean. Epoxy finish also protects from rust when used in damp or humid environments such as food service areas and coolers. Units assemble without tools and use two-piece split sleeves to anchor their shelves in place on their shelving posts. The shelves can be removed and the sleeves can be repositioned to raise or lower the shelves on the posts.

INSTOCK

Corrosion-Resistant Wire Shelving

- For harsh environments
- 4 shelves

Stainless steel units resist corrosion and rust when used in areas with frequent exposure to water or cleaning chemicals, such as kitchens and laboratories. Units assemble without tools and use two-piece split sleeves to anchor their shelves in place on their shelving posts. The shelves can be removed and the sleeves can be repositioned to raise or lower the shelves on the posts.

Quick-Adjust Wire Shelving

- For dry use
- 4 shelves
- Constructed of stainless steel

Levers on shelves can be released to allow the height of the shelves to be changed without removing the shelves from the posts. Smooth, chrome finish prevents dust and debris from sticking. They may rust if exposed to moisture, so they are for use in dry storage areas such as stock rooms, garages, and retail stores. Assemble without tools and use two-piece split sleeves to anchor their shelves in place on the shelving posts. The shelves can be raised off the sleeves and the sleeves can be repositioned to raise or lower the shelves on the posts.

Release lever to adjust shelf height

9T502

Top track kit with 2 end units and 3 mobile units

Top-Track Wire Shelving

- Chrome finish

Takes up less floor space than standard wire shelving with the same number of shelving units. Consists of two stationary end shelving units, one or more mobile middle shelving units, and a track that joins all the units at the top. The middle units can slide along the track to open up an aisle between any two units. The overhead track does not impede the movement of carts and other equipment through the aisle. Items can be seen through the wire shelving, air can pass through the shelving for ventilation, and water can flow through the shelving if fire sprinklers are activated. Debris falls through the shelving, which helps keep it clean. Top-track wire shelving provides multiple levels of storage for organizing and staging tools, supplies, and inventory. Efficiently utilizes vertical space in storage areas without having to mount shelving to a wall.

Track Kits—Include track sections for installing an overhead track in a top-track wire shelving system. The track attaches to support rails on each stationary end unit in the shelving system. It sits above the middle units, which can slide along the track to open up an aisle space between any two units in the shelving system. Aluminum construction.

Shelf Kits—Include 2 fixed and 3 adjustable wire shelves that install onto shelving posts in a top-track wire shelving system. ¼" lip height. NSF approved. Steel construction.

Post Kits—Include posts and hardware for building top-track shelving units and connecting them to the top track. Steel construction.

Wire Shelves for Wire Shelving

- Steel construction, except corrosion-resistant are constructed of 304 stainless steel

Use to replace the shelves on an existing wire shelving unit, expand an existing unit, or build a new unit.

Quick-Adjust shelves allow adjustment of shelf height without removing the shelf from the post.

Antimicrobial shelves have an epoxy finish with an antimicrobial additive that prevents damaging, odor-causing mold, mildew, and bacteria from growing and helps keep them clean.

Gravity-Flow shelves are angled so the back of the shelf is higher than the front of the shelf.

Press-Fit Stationary Plastic Shelving

Plastic shelving units weigh less than metal shelving units and will not rust. The parts of the shelving units are pressed together to connect. No tools are required for assembly, although a rubber mallet can be used to ensure a tight connection. Compact shelving units have a narrow footprint and take up less floor space than other styles.

Containment Trays—Spill trays install on top of shelves on compatible high-durability stationary plastic shelving units to prevent spilled liquids or leaks from dripping through the shelves and contaminating items stored on the shelves below the trays.

Quick-Adjust Antimicrobial Stationary Plastic Shelving

- 62" overall height
- 4 shelves adjust on 1" increments
- 800 lb. shelf capacity (based on evenly distributed loads)

Quick-adjust units have levers on their shelves that can be released to reposition the shelves without removing them from the posts or disturbing other shelves on the unit. The posts and shelf decks have been treated with an antimicrobial additive that prevents damaging, odor-causing mold, mildew, and bacteria from growing on them and helps keep them clean. Each shelf has a plastic deck that lifts out and can be placed in a dishwasher, making these shelves easier to clean and sanitize than standard plastic shelves. Assemble without tools and use corner wedges to anchor the shelves in place on the posts. Ideal for use in kitchens, medical facilities, and other areas where high standards of cleanliness must be maintained. NSF Listed.

Wall-Mount Wire Shelving Kits

- Shelves adjust in 1" increments
- Meet NSF standards

Keep floor areas clear and allow air to circulate to provide ventilation. Openings allow dirt and debris to fall through the shelving to help keep it clean. Suitable for use in dry environments such as garages, stock rooms, and retail stores.

ADVANCE TABCO NEWAGE INDUSTRIAL

Metal Wall-Mount Shelving

Solid surface will not let small items, dust, or debris fall through.

Steel provides good strength. **Stainless steel** resists rust and corrosion when used in damp or humid areas such as kitchens or freezers. Shelves are recommended for dry storage. **Aluminum** is lighter than steel or stainless steel shelving and resists rust and corrosion when used in damp or wet areas such as kitchens.

Pallet Rack Information

PALLET RACK CONSTRUCTION

Bolted

Lynx®

Teardrop

PALLET RACK STYLE

Roll-Formed

Structural

In order to choose the correct pallet rack, first determine the measurements of the largest load that will be stored and the weight of the heaviest load. This will help determine the load capacity and number of levels required. The vertical distance between the beams on a pallet rack impacts the rack's load capacity. As the vertical spacing between the beams increases, the rack's load capacity decreases.

Upright frames and beams can then be ordered to complete the pallet rack. Bays can be strung together by ordering the proper number of beams and one additional upright for each bay added. After the pallet rack is assembled, pallet rack decking can be used to help secure loads. Accessories can also be added as needed.

Before selecting a pallet rack, please be sure to check local ordinances for building code and seismic requirements, which may reduce the capacities listed or require factory modifications.

ACCESSORIES

Crossbars/Beam Ties
Span the distance between beams to stabilize loads.

Wall Spacers
Connect racks to walls for added stability.

Row Spacers
Connect and evenly space two rows of rack back to back.

Rack and Frame Protectors
Reduce impact damage from vehicular traffic.

Starter with Decking
- 2 Frames
- 4 Beams
- 4 Decks

Teardrop Roll-Formed Pallet Rack Units

HUSKY RACK & WIRE™

- Fully-welded, steel teardrop frame design with 14-ga. uprights
- Rack Manufacturer's Institute (RMI) Certified
- Boltless assembly

Fully configured rack units include frames, beams, and choice of decking or no decking.

HUSKY RACK & WIRE™

Teardrop Roll-Formed Pallet Rack Components

- Fully-welded, steel teardrop frame design
- Boltless assembly
- Choose frames, beams, and wire decking separately for custom configurations

Upright Frames—Feature teardrop punch pattern every 2". Horizontally and diagonally braced frames create a strong, stable system. Standard prepunched footplates make anchoring easy. Corrosion-resistant, green polyurethane finish.

Beams—Beams feature a safety clip which cannot be sprung or removed without first removing the beam; no special tools required. An audible click or simple glance confirms the lock is engaged. Corrosion-resistant, orange polyurethane finish.

Teardrop Roll-Formed Pallet Rack Components

STEEL KING BUILT TO DELIVER

- Boltless assembly
- Seismic components are available online, see Grainger.com®

Closed tubular columns and braces generate 250% greater durability against fork truck damage.

Upright Frames—Multiple offset anchor holes provide flexibility in anchor placement. Footpad with nesting ridge provides easy shim nesting, and flush footpad to column base evenly disperses load weight. Vista green powder-coat finish.

Beams—Teardrop and rivet design with heavy-duty connection plates allows easy installation and greater connection integrity. Auto-engaging safety clip resists beam disengagement and provides an audible click when secured. Poppy orange powder-coat finish.

STEEL KING BUILT TO DELIVER

Bolted Structural Channel Pallet Rack Components

- Fully welded steel construction
- Powder-coat finish resists chips and chemicals

Upright Frames—Hot-rolled structural channel columns are specially punched for 2" beam adjustability. Full horizontal and diagonal bracing increases frame strength. 7-ga. baseplate welded to column disperses floor load and increases stability. Multiple anchor holes allow easy floor mounting. Precaution Blue color.

Beams—Made with high-strength structural steel (50,000 psi min.) for superior rigidity and durability. Feature 2-bolt beam connections and 7-ga. wraparound connector plate to help square rack into position and create a tighter connection. Yellow color.

Cross bars are sold separately.

Pallet Rack Decking

Pallet rack decking installs onto compatible pallet rack beams to distribute the weight of items placed on the decking across the beams. This decking is used for building or upgrading pallet racks that provide organized storage for palletized loads or large containers in warehouses, distribution centers, and other storage facilities.

Wire Decking - Waterfall edge wraps over the top and outer face of pallet rack step beams and keeps the decking in place on the beams. Air can circulate through wire decking to provide ventilation for items that are stored on it, and water can pass through the decking if sprinkler systems are activated.

Solid Decking - Dust, debris, and small items cannot fall through solid decking, which helps prevent product loss or contamination of items below the decking.

STANDARD-CHANNEL WIRE DECKING

Stronger than flare-channel decking but can only be installed on step beams because its U-shaped channel rests inside the step.

SPILL-CONTROL SUMP-INSERT DECKING

Installs onto pallet rack step beams and catches spills, leaks, or melting products. Features a leak-tight spill-containment sump covered by a steel grating that supports items on the decking. It is often used on pallet racks where containers of liquids or packages of frozen products are stored.

INVERTED-CHANNEL WIRE DECKING

This pallet rack decking has an inverted channel that dirt and debris cannot accumulate in. Inverted-channel decking is stronger than flare-channel decking. It can only be installed on step beams because the inverted U-shaped channel rests inside the step.

FLARE-CHANNEL WIRE DECKING

Can be installed on any type of pallet rack beam, including step beams, structural channel beams, and box beams.

Pallet Rack Enclosure Kits

WireCrafters

- Constructed of gray 10-ga. powder-coated steel

Create an enclosure that controls access to pallet racks' contents, help prevent theft of high-value inventory on the racks, and stop items from falling off the racks. The kits include back and side panels that attach directly to the pallet rack. They also include an overhead door track and sliding front doors with lugs that accept a padlock for locking the doors. Wire mesh allows visibility and air circulation.

3 Shelving Bays

Collision Sentry Warning Device

Infrared motion detectors alert forklift drivers and pedestrians to movement in dangerous blind corner intersections. Highly visible LEDs flash and an audible alarm is issued when a collision is imminent. Volume is adjustable. Portable and compact device snaps onto racking for immediate deployment. Runs on D batteries (included) and features a low-battery indicator.

Overall Depth	Overall Width	Color	Item No.
3 ½ in	6 ½ in	Yellow	**437T14**

Rack Sentry Pallet Rack Protectors

Attach protectors to rack uprights to create a highly visible protective layer that withstands abuse from forklift collisions. Flexible EVA construction absorbs impact and then quickly returns to shape. Install directly onto uprights eliminating the need for drilling into and putting additional stress on the floor.

HUSKY RACK & WIRE

WireCrafters

Pallet Rack Guards and Mounting Clips

- Constructed of powder-coated steel

Guards install onto pallet rack uprights to stop items from falling off the back of the racks. Also known as aisle shields, rack guards do not need to be tensioned like netting. They are made of wire mesh, so users can see through them to view the racks' contents, air can circulate through them for ventilation, and water can pass through them if sprinkler systems are activated.

SUPERSCAN

Shelving and Pallet Rack Identification

Magnetic Label Rolls, Write-On/Wipe-Off—Custom labels that can be easily erased and reused. Clear vinyl topcoat can be used with any standard wet- or dry-erase marker.

Magnetic C-Channel Cardholders—Allow for quick changes in ID cards. Easily repositioned.

Slip 'N Stik Label Holder Kit—Print signs using the high-visibility yellow laser/inkjet paper provided. Snap into pallet rack assembly holes and snap out to relocate. Holds any sign up to ⅛" thick. Kit includes 10 holders and twelve 11" x 8½" sheets of laser/inkjet paper.

Superscan Label Holders—Special matte finish for accurate bar code scanning. Laser/inkjet-ready inserts are easy to print, insert, and remove.

Cantilever Racks

JARKE

Kits come with all the necessary parts for assembling cantilever racks, which have arms that extend from their frames to create multiple storage levels. Also known as pipe storage racks and cantilever shelving, cantilever racks hold long materials such as tubing and pipe in maintenance departments, tool rooms, machine shops, and storage areas. Starter units can be used on their own as standalone racks. Add-on units can be connected to existing starter units or add-on units to create multi-unit cantilever rack systems, and they cannot be used on their own as standalone racks.

Components such as uprights, braces, arms, and stop sockets can be purchased to repair, upgrade, or add onto existing cantilever racks.

METRO We put space to work. SPC INDUSTRIAL

Plastic Dunnage Racks

- Constructed of black high-density polyethylene
- 12"H leg posts
- Snap together for easy assembly

Plastic dunnage racks weigh less than metal racks and will not rust when used in areas where the racks will get wet.

Grid Top—Flow-through design permits scrap and liquids to fall or drain below. Antimicrobial models feature Microban® antimicrobial product protection.

Solid Top—Boxes can slide on and off without catching corners or damaging containers.

Open-Deck Base

Wood-Deck

STEEL KING BUILT TO DELIVER

Stack Racks

- Steel construction

Stack rack bases support loads with uneven or irregularly shaped bottoms, such as bags or tires. Compatible posts fit into the bases to support additional rack levels and protect items on the racks from being crushed when stacking multiple racks vertically. Forklifts can pick up the racks from any side. **Open-deck bases** have cross stringers that support loads with firm, flat bottoms. The large open spaces between the cross stringers allow air to circulate through the deck for ventilation. **Wood-deck bases** have wood planks that sit on top of cross stringers, which support the planks when loads are placed on the deck.

Modular 4-Post Stack Racks

Four-post racks each consist of four posts that are welded to a base, and they do not require assembly. The top of the racks' posts insert into sockets on additional bases to create a multilevel storage system. The posts protect items on the racks from being crushed when stacking multiple racks vertically. Multiple racks can also be placed side-by-side to accommodate pipe, tubing, extrusions, and other long items.

Flow Cell Gravity Flow Racks

UNEX

- Blue racks with 14-ga. shelves & 12-ga. posts
- Boltless racks have a 3000-lb. capacity per shelf; bolt-together racks have a 1000-lb. capacity per shelf

Stationary flow racks are suitable for areas where they will not be moved often. The racks have multiple storage levels with skate wheels, rollers, or decking that allow items at the back of the racks to glide forward as items at the front of the racks are removed. Choose racks that bolt together for assembly or boltless flow racks do not require bolts or special tools to assemble.

3 Shelves	72 in	96 in	72 in	**46KG04**	—	—	—

Roller Track - Rows of rollers provide a stable surface for moving loads with rimmed or uneven bottoms, such as kegs, pallets, and bags. Each level has a flat, flush front edge, making these flow racks suitable for conveying full cases and other unopened items.

Skate Wheel Track - Closely spaced rows of skate wheels allow boxes, totes, and other loads with firm, flat bottoms to glide on the racks. Skate wheel tracks spread the weight of conveyed items across a wider area than skate wheel rails, and they can support items in a range of sizes. Each level has a flat, flush front edge, making these flow racks suitable for conveying full cases and other unopened items.

Knuckled Racks - Each level has a sloped front edge that presents items at the front of the rack at a downward angle, making these flow racks suitable for applications where workers need to reach into open containers on the racks to pick items directly from the containers.

Flow Rack Workstations - A worktable provides a flat surface for performing inspection, assembly, and other work tasks on items picked from the rack. The racks also have a return lane underneath the worktable for returning empty containers.

SSI SCHÄFER

Solid-Deck Boltless Stationary Flow Racks

- 20-ga. shelves with 22-ga. posts
- 550-lb. capacity per shelf

Solid decking prevents small parts from falling through the shelves and will not snag items on the shelves. It also stops dirt and debris from falling through the shelves and contaminating items on lower levels. Boltless flow racks do not require bolts or special tools to assemble.

Flat decks are not tilted, so items at the back of the racks' shelves will not put weight on items at the front of the shelves if multiple items are lined up in a row, which helps prevent damage if there are heavy or compressible items on the shelves.

Tilted decking allows gravity to move items at the back of the racks forward as items at the front of the racks are picked.

tennsco Storage Made Easy

Tire Racks

- 2000-lb. capacity per shelf
- Gray powder coated finish

Tire racks hold tires and keep them off the floor and organized during storage. The racks provide efficient use of vertical space when storing tires in auto repair shops, car manufacturing facilities, and tire retail stores. These racks have vertical uprights and horizontal beams that connect to the uprights to create storage levels on the racks. The beams have rivets that fit into holes on the uprights, and the racks assemble without tools or bolts. **Double-sided racks** each consist of two single-sided racks that are joined with tie beams to create a double-sided rack that holds tires on both sides. Standalone racks cannot be expanded with add-on units, but multiple units can be placed side-by-side, if desired.

HUSKY RACK & WIRE Hallowell

Heavy-Duty Reel & Spool Racks

Steel rack frames with axle brackets accept compatible spindles or rods that hold reels and spools of material on the racks. The position of the axle brackets can be changed to accommodate different sizes of spools and reels. These racks hold multiple reels and spools and keep them organized and accessible. Starter units can be used on their own as standalone racks. Add-on units can be connected to existing starter units or add-on units to expand them, and they cannot be used on their own as standalone racks.

Gas Cylinder Racks

Floor-standing racks keep gas cylinders organized and secure during storage. They are used in hospitals, manufacturing plants, and other locations where gas cylinders are used.

Horizontal gas cylinder racks have a frame with beams and crossbars that form shelving levels for holding propane cylinders in a horizontal position. Also known as propane cages, the racks have a door that can be locked to control access to the cylinders.

Vertical gas cylinder racks keep gas cylinders upright and secure during storage. They have vertical uprights that support the cylinders and keep them organized in rows. They also have chains that keep the cylinders secure inside the racks. The racks stand on a floor.

Locker General Information

Standard Lockers are suitable for schools, fitness facilities, office break rooms, and other areas where they are unlikely to be exposed to impacts or other hazards. Typically constructed of steel, but also available in plastic and wood.

- **Wardrobe lockers** have a large vertical storage area for hanging apparel or long items
- **Combination lockers** have a bar or hooks for hanging clothing or long items, and shelves that provide flat storage for items that do not need to hang
- **Box lockers** have small compartments to hold personal items

Industrial Lockers are heavy-duty and more durable than standard lockers, making them suitable for personal storage in factories, machine shops, garages, and other areas where they may be exposed to impacts or other hazards.

Security Cages and Bulk Storage Lockers have large compartments to hold large or bulky items and equipment, and are commonly used in industrial or commercial settings such as factories, warehouses, condos, apartments, and offices. They have metal mesh walls and doors to allow air to circulate throughout the enclosure, preventing buildup of moisture or fumes. Contents are clearly visible from all sides.

Athletic and Tactical Gear Lockers have large storage compartments that hold bulky protective gear, uniforms, and other equipment. They provide personal storage in settings such as sporting facilities, firehouses, police stations, and military training facilities.

Mobile-Device Lockers are sized to hold and secure personal electronic devices. Typically installed in offices, hotels, and other public facilities.

Door Types:

- **Solid doors** fully conceal contents
- **Louvered doors** have slots to allow some airflow to reduce moisture and odor buildup
- **Ventilated doors** are perforated to allow optimal airflow and some visibility to contents
- **Clearview doors** allow full visibility to contents

Hallowell

Slope-Top Louvered Metal Lockers

- 78"H overall
- 24-ga. steel body
- 16-ga. frames
- 16-ga. louvered doors on wardrobe lockers, 18-ga. on box lockers
- Continuous piano hinge
- Powder-coated finish

Lockers have a sloped top that prevents dust from accumulating and discourages using the locker top for storage. Include master keyed combination padlocks and closed locker base. Padlocks with 3-number combinations for maximum security are included for each door. 6-tier models include aluminum strike plates to prevent padlocks from marring door finish.

▶**Please choose:** Tan, Dark Gray, Marine Blue

Hallowell | tennsco Storage Made Easy

Quiet-Close Metal Wardrobe Lockers

- Durable steel construction
- 16-ga. frames
- 16-ga. reinforced doors
- Powder-coated finish

Lockers feature door stiffeners and rubber bumpers to minimize noise when opening and closing. Include padlock hasp and number plate.

Solid doors have flushed door design with recessed handle, continuous piano hinge, and 6"H legs.

Louvered doors allow air circulation. Polymer locker latches help facilitate quiet operation. Recessed locker handles.

Hallowell LYON®

Antimicrobial Steel Wardrobe Lockers

- 24-ga. solid body
- 16-ga. doors and frames
- Recessed handles with padlock hasps
- Light gray color

Lockers are treated with a special finish to prevent the growth of bacteria, mold, mildew, and other microbes. Ideal for hospitals and healthcare facilities.

Louvered doors allow air to circulate. 6"H legs.

Slope-top with solid doors prevent items from being stored on top of the locker. 4"H closed base.

Hallowell

Clearview Metal Lockers

- 78"H overall
- 6"H legs
- 24-ga. solid body
- Tan powder-coated finish

See-through door panels allow clear visibility of contents to aid in inventory control, loss prevention, and security. Number plates included.

Lockers with Electronic Keypad have a battery-powered lock that requires a 4-digit code for entry. Can be set to day-use or permanent-use mode. Low battery indicator with mechanical master key override. Master and sub-master codes allow 2 levels of management security.

Box lockers have a clear, injection-molded polycarbonate door.

Wardrobe lockers feature two clear polycarbonate inserts per door.

Plastic Wardrobe Lockers

- Durable HDPE construction
- Matte finish
- Include padlock hasps

Resist dents, scratches, and impacts and will not rust. Easy to clean and never require painting. Louvered doors allow air to circulate, reducing moisture and odor buildup inside the locker.

Z Lockers have both a tall vertical space for hanging coats or jackets, and a shorter horizontal space for personal items in each locker compartment.

Expanded Metal

Wire Mesh
(4) shelves, (2) units wide

LITTLE GIANT · Jamco Products · FOLDING GUARD

Security Cages

- Powder-coated finish
- Assembled

Keep large or bulky items and equipment secure in warehouses, factories, and industrial settings. Metal mesh walls and doors allow air to circulate throughout the cage, preventing buildup of moisture or fumes. Contents are clearly visible from all sides.

Expanded metal cages have smaller mesh openings and provide more rigidity than wire mesh. Padlock hasp included.

Wire mesh cages have larger mesh openings to provide more airflow and visibility than expanded mesh, and include a keyed lock.

Single-Tier Starter
Wire Mesh

Bulk Storage Lockers

Hallowell · FOLDING GUARD

- Steel frame construction
- Include padlock hasp
- 90"H

Use for secure storage of large or bulky items in condos, apartments, offices, and other facilities. Metal mesh panels and doors allow air to circulate throughout the locker, preventing buildup of moisture or fumes. Contents are clearly visible from all sides.

Starter units consist of 2 side panels and one door panel with 1 or 2 doors.

Add-on units consist of one side panel and one door panel and are attached to existing units.

Search for "Locker Accessories" on Grainger.com to find top panels, back panels, and shelves to customize your enclosure.

Expanded metal lockers have smaller mesh openings for a more rigid enclosure.

Wire mesh lockers are made with galvanized welded wire and have larger mesh openings to provide better airflow and visibility.

Athletic and Tactical Gear Lockers

- Rugged steel construction

Lockers have large storage compartments that hold bulky protective gear, uniforms, and other equipment. Suitable for personal storage in sporting facilities, firehouses, police stations, and military training facilities.

Open-front ventilated lockers provide easy access and visibility to all items. Ventilated sides.

Modular solid lockers have louvered back panels that accept hooks and other compatible accessories to customize the storage space. Solid doors. Include padlock hasp.

Ventilated lockers have metal mesh door panels. Include padlock hasp.

Mobile-Device Lockers

- Powder-coated finish
- Units are assembled; unassembled units available on Grainger.com

Sized to hold and secure personal electronic devices. Typically installed in offices, hotels, and other public facilities.

Surface-mount lockers can be mounted on a wall or flat surface. Multiple tiers of individual lockers are arranged vertically.

Wiring-ready full-height lockers have built-in channels with knockouts in each locker allowing wire to be run so lockers can serve as charging stations. Multiple tiers of individual lockers securely hold laptops and small electronic devices.

Electronic Keypad locks are battery-operated with a 4-digit code required for access. Can be set to day-use or permanent-use mode. Low battery indicator with mechanical master key override.

Keyed locks come with master keys to access all compartments.

Combination locks are built-in and can be set to a fixed combination or combination can be reset after each use.

Choosing the Right Strength Storage Cabinet

DUTY RATINGS

Light-Duty
- 22-24 ga.
- Suitable for holding and storing lightweight supplies and equipment in offices or areas where the units are unlikely to be subjected to impact or abuse

Medium-Duty
- 20-24 ga.
- Suitable for storing tools, equipment, and supplies in commercial or industrial settings not generally exposed to rough use

Heavy-Duty
- 16-18 ga.
- For use in industrial facilities for storing heavy tools, equipment, and supplies

Extra-Heavy Duty
- 12-14 ga.
- Bolt together to provide more strength and rigidity
- For use in industrial facilities to hold dies, fixtures, jigs, and other very heavy equipment

Super-Duty
- 12 ga.
- Provide the most strength and rigidity
- For use in industrial facilities to hold heavy tools, fixtures, jigs, and other very heavy equipment

COMMERCIAL CABINETS

Metal cabinets are suitable for offices, apartment buildings, schools, and other areas where they are not likely to be exposed to impacts or other hazards. Typically have light- to medium-duty ratings.

INDUSTRIAL CABINETS

Metal cabinets are fully welded and suitable for warehouses, machine shops, plants, and other areas where they may be exposed to impacts, hazards, or rough conditions. Typically have heavy- to super-duty ratings.

BASE TYPES

Frame Base - Cabinet sits directly on floor or flat surface.

Legs - Raise cabinet above floor level, allowing access beneath the cabinet.

Leveling Base - Integrated levelers compensate for uneven floors to help keep cabinet stable.

Solid Doors
9CUH6

Clearview Doors
K3853
(Contents not included.)

Commercial Stationary Shelf Cabinets

- Assembled
- Adjustable shelves

Metal cabinets have multiple shelves to provide storage and keep supplies and equipment organized. Suitable for offices, apartment buildings, schools, and other commercial areas.

Cabinets with leveling base have integrated levelers that compensate for uneven floors.

Solid doors provide security and conceal contents.

Ventilated doors allow air to circulate and prevent buildup of moisture and fumes. Hallowell cabinets have metal-mesh door panes. Tennsco cabinet has diamond-shaped perforations in the door panels.

Clearview doors have see-through panes that allow visibility to contents.

DURHAM MFG Est. 1922 StrongHold

Industrial Stationary Shelf Cabinets

- Assembled
- Adjustable shelves
- Swing handle
- Durham cabinets are gray with a powder-coated finish
- StrongHold cabinets are dark gray with a baked enamel finish
- Padlock hasps except as noted

Metal cabinets have multiple shelves to provide storage and keep supplies and equipment organized. Fully welded and suitable for warehouses, machine shops, plants, and other industrial areas.

Solid doors provide security and conceal contents.

Clearview doors have see-through panes that allow visibility to contents.

Ventilated doors have diamond-shaped perforations on the door panels to allow air to circulate and prevent buildup of moisture and fumes.

Ventilated Door 34A458

Hallowell

Antimicrobial Commercial Stationary Shelf Cabinets

- 4 adjustable shelves
- Keyed lock
- Light gray
- Frame base

Cabinets are treated to prevent the growth of mold, mildew, and other microbes, which helps keep the cabinets clean.

Ventilated doors have metal-mesh door panes which allow air to circulate and prevent buildup of moisture and fumes. Contents are visible to aid in loss prevention and inventory management.

Clearview doors have see-through panes which allow full visiblity to contents.

Solid doors conceal contents.

Hallowell Jamco Products StrongHold

Corrosion-Resistant Industrial Stationary Shelf Cabinets

- Adjustable shelves
- Assembled
- **Include padlock hasp, unless indicated.**

Cabinets resist rusting when used in areas exposed to moisture or high humidity. Suitable for warehouses, machine shops, plants, and other industrial areas. Hallowell cabinets are galvannealed steel. Jamco and StrongHold cabinets are stainless steel.

Solid doors conceal contents.

Clearview doors have see-through panes which allow full visiblity to contents.

Ventilated doors are perforated to allow air to circulate and prevent buildup of moisture and fumes.

Industrial Shelf Cabinets with Pegboards

410Y42

- Adjustable shelves
- Gray powder-coated finish
- Assembled

Metal stationary cabinets have multiple shelves for storage, as well as interior pegboards that accept hooks and other accessories to create custom storage and easy access for a variety of items. Sturdy cabinets are fully welded and assembled and are suitable for warehouses, machine shops, plants, and other areas where cabinets may be exposed to impacts and other hazards.

Extra-heavy duty cabinet has ventilated metal-mesh door panes which allow air to circulate and prevent buildup of moisture and fumes. Contents are visible to aid in loss prevention and inventory management. **Super duty** cabinets have solid doors that hide the contents of cabinets when closed.

Outdoor Industrial Shelf Cabinets

- Adjustable shelves
- Padlock hasp locks
- Swing handle
- 12 ga. steel construction
- 6"H leg base

Cabinets have a gasketed seal on the door frame to keep dirt and water out. Sloped top prevents dirt and water from collecting on surface. Cabinets are fully welded and assembled. Suitable for areas that may be exposed to weather or other harsh conditions. Cabinets with vented doors have filtered vents that allow air circulation while keeping out moisture and dust.

Tight Clearance Industrial Shelf Cabinets

- Adjustable shelves
- Assembled

Steel cabinets have doors that require less clearance to open than standard cabinet doors, making them ideal for tight spaces. Cabinets are fully welded and assembled.

Extra-heavy duty cabinets have a space-saving design with bifold doors and fold-down handles. Powder-coated finish.

Super duty cabinets have a roll-up door with a built-in lock to keep items secure. Legs are 6"H. Baked enamel finish.

Mobile Shelf Cabinets

Hallowell · tennsco Storage Made Easy · Sandusky · StrongHold

- Adjustable shelves
- Commercial cabinets have 4 swivel casters
- Industrial cabinets have 2 rigid and 2 swivel casters
- Cabinets with drawers have 7 drawers

Casters allow cabinets to be easily moved to any area needed. Ideal for facilities where supplies are used in multiple locations or floor plans frequently change. Shelves provide flat storage and keep items organized. **Solid** doors hide the contents of cabinets when closed. **Ventilated** doors allow air to circulate to prevent buildup of moisture and fumes. **Clearview** doors have clear panels that allow visibility to contents of the cabinet.

Antimicrobial cabinets are treated to prevent the growth of mold, mildew, and other microbes.

Antimicrobial, Ventilated Door
34A429

Open-Front Cabinet
K3938

Stationary Wardrobe Cabinets

- 1 adjustable shelf
- Swing handle
- Commercial cabinets have a keyed lock
- Industrial cabinets have a padlock hasp

Cabinets have a horizontal rod for hanging coats, uniforms, and other apparel. Full width shelf above the rod provides storage for hats or other items. Cabinets with leveling base have integrated levelers to compensate for uneven floors.

Antimicrobial cabinets are treated to prevent the growth of mold, mildew, and other microbes, helping to keep cabinets clean.

Open front cabinets have no doors, allowing full visibility and easy access to all stored items.

Solid doors provide security and conceal contents.

Clearview doors have see-through panes that allow visibility to contents.

Ventilated doors allow air to circulate and prevent buildup of moisture and fumes. Hallowell cabinets have metal-mesh door panes. StrongHold cabinets have perforated door, side, and back panels for maximum air circulation.

Stationary Combination Cabinets

- Adjustable shelves

Cabinets have a horizontal rod for hanging coats, uniforms, and other apparel as well as multiple shelves, or a combination of shelves and drawers to provide flexible storage options.

Corrosion-resistant cabinets are galvanneal steel and resist rusting when used in areas exposed to moisture or high humidity.

Solid doors provide security and conceal contents.

Ventilated doors have metal-mesh panes to allow air to circulate and prevent buildup of moisture and fumes.

Clearview doors have see-through panes that allow visibility to contents.

Commercial Cabinet K4848

Jobsite Industrial Cabinet 40V906 (Contents not included.)

Stationary Janitorial Cabinets

- Assembled

Sturdy cabinets hold brooms, mops, pails, and other cleaning supplies to keep them organized and readily accessible for use.

Commercial cabinets are 24-ga. steel with a powder coated finish.

Corrosion-resistant cabinets are polished stainless steel and resist rusting when used in areas exposed to moisture and high humidity.

Industrial extra-heavy duty cabinet is fully ventilated with 14-ga. metal mesh door and sides. Offers full visibility to contents and allows air to circulate to prevent buildup of moisture and fumes.

Industrial super duty cabinets are 12-ga. steel with a baked enamel finish.

Jobsite cabinets have a combination of 3 shelves and 2 drawers for storage.

Mobile Industrial Janitorial Cabinet

- Adjustable shelves
- 2 rigid and 2 swivel casters
- 12-ga. steel frame
- Padlock hasp lock
- Assembled

Cabinet rolls easily from one location to another, to take cleaning supplies wherever they are needed. See-through clearview door panes and sides allow users full visibility to contents to aid in loss prevention and inventory management. Full height compartment provides storage for mops, brooms, brushes, and other long items. Shelves hold cleaning supplies, smaller tools, and equipment.

Access-Control Shift Cabinets

- Padlock hasp locks
- Assembled
- Adjustable shelves
- Leg base
- Solid doors with swing handle, except as noted

Shift cabinets have multiple compartments that lock individually to limit access to contents. Used to partition supplies and equipment for specific worker shifts in factories or warehouses. Also used to control employee access in retail stores, offices, and other shared workspaces.

Shelf-style cabinets are available with multiple shelves or with both shelves and drawers to provide flexible storage options. 16A404 has 2 upper doors with clear panels that allow visibility to contents.

Janitorial cabinets can hold brooms, mops, pails and other cleaning supplies.

Corrosion-resistant cabinets are stainless steel and resist rusting in areas exposed to moisture or high humidity.

Combination wardrobe cabinets have a horizontal rod for hanging uniforms, coats, or apparel as well as shelves or both shelves and drawers to hold smaller items.

Stackable Wall-Mount Cabinet 1ANU5

Sandusky · Hallowell · DURHAM MFG Est. 1922 · Jamco Products · GMI Greene Manufacturing, Inc.

Metal Wall-Mount Cabinets

- Keyed lock except as noted

Can be installed above workstations, desks, sinks, and other areas to keep tools and supplies organized and close to where they are used, while keeping floor space clear.

Clearview cabinets have see-through door panes allowing visibility to contents.

Stackable cabinets have holes on the top and bottom for fastening cabinets together, allowing multiple cabinets to be securely stacked when placed on a benchtop or similar surface. Individual cabinets can also be wall mounted.

Corrosion-resistant cabinets are stainless steel and resist rusting in areas exposed to moisture or high humidity.

Drawer Cabinets

- Assembled

Drawers keep small or loose items contained and organized. Used for shared storage in a wide range of facilities, such as warehouses, factories, schools, hospitals, and retail stores.

Cabinets with individually locking drawers allow controlled access to stored items.

Locking door cabinets have a solid door that accepts a padlock, but individual drawers do not lock.

Open-access cabinets do not lock and provide quick accessibility to all contents.

Metal Small-Parts Drawer Cabinets

- Powder-coated finish
- Metal frames and drawers
- Stackable, except for 4HU99

Hold and store small parts to keep them separate and organized. Drawers extend fully to allow access and visibility to items at the back. Provide shared storage in garages, workshops, electronics manufacturing and repair, and other applications where small parts are frequently used.

Modular cabinets can be stacked on top of other compatible drawer cabinets to provide high-density storage.

Cabinets with base are raised off the floor, allowing access beneath the cabinets for cleaning.

Revolving storage rack provides convenient access to all sides of storage bins.

Specialty Storage Units

- All-steel construction
- Gray powder-coated finish

ROD WIRE SPOOL RACKS

Removable, plated-steel rods store and dispense spools of wire. Easy-to-assemble units can be counter-, wall-, or vehicle-mounted. Racks accommodate spools up to 10" dia.

THREADED ROD RACK

Vertical rack has holes to hold up to 18 rods and keep them upright and ready for use.

WIRE SPOOL STORAGE CABINET

Accommodates 24 3½" spools. Features 16 grommets to guide wires and a box with 21 compartments for storing smaller components. Open front for easy access to wire.

HYDRAULIC HOSE CABINETS

Vertical compartments hold coiled hoses to keep them organized and ready for use. Open front allows users to see contents at a glance. 49H244 holds a single hose; 49H245 holds 2 hoses; 49H246 holds 3 hoses.

ROD STORAGE RACK

6 horizontal compartments hold welding rods to keep them organized and ready for use.

Customizable Compartmented-Box Cabinet K4856

Small Compartmented-Box Cabinet Base Extra Drawer

DURHAM MFG
Est. 1922

Compartmented-Box Cabinets

- Gray powder-coated finish
- Prime cold-rolled steel
- Stackable

Large Compartmented-Box Cabinets—4 steel drawers, each with a hinged steel top, steel pull handle, closure latch, and molded styrene tray. Each compartment has a scooped bottom for easy access. Drawers ride on full-suspension slides fixed within the cabinet and can be easily removed.

- Drawers measure 3 in x 18 in x 12 in inside

Customizable Compartmented-Box Cabinets—Sliding drawers are empty allowing users to choose any compatible drawer/insert for custom configuration. Drawer stops prevent unintentional pull-out. Cabinets can be stacked and bolted together, or bolted to a rigid surface, such as optional base, for added stability.

Compartment Drawers—Adjustable compartment boxes include plastic dividers that can be removed or rearranged to create various compartment sizes. Drawer inserts are polypropylene and fit inside compatible empty drawers.

Stationary Medical Supply Cabinets

Designed to hold supplies, medications, and other healthcare items to keep them organized and accessible. Used for shared storage in settings such as hospitals, doctor's offices, clinics, and nursing homes.

Antimicrobial cabinets have sturdy polymer construction and are treated to prevent the growth of mold, mildew, and other microbes. 6EJJ7 and 6EJJ8 have keyed locks.

Catheter cabinets use hooks, slides, and shelves to hold catheters and keep them organized. Slides extend to allow catheters to be easily viewed for inventory control. Doors have keyed locks.

Corrosion-resistant cabinets are stainless steel and resist rusting when used in areas exposed to moisture or high humidity. Full-height cabinet 460K32 has adjustable shelves and clear see-through door panes to allow visibility of contents. Counter-height cabinet 460K47 has pull-handle drawers.

Wall-Mount Medical Supply Cabinets

Can be mounted to a wall to keep floor space clear or installed above workstations, desks, sinks, and other areas to keep stored items close to where they are needed. Designed to hold supplies, medications, and other healthcare items. Used for shared storage in settings such as hospitals, doctor's offices, clinics, and nursing homes.

Corrosion-resistant cabinet is stainless steel to resist rusting in damp or humid areas. Clearview door panes allow visibility to contents.

Compact cabinets are designed for use in tight spaces. 53XJF44 has a fold-down door. 53JX45 has a right-hinge door with a window to view contents. 53JX46 has a solid door.

High security cabinets provide additional security to help prevent theft or loss of medications and other controlled substances. Doors have double locks or electronic keypad locks.

Antimicrobial cabinets have sturdy polymer construction and are treated to prevent the growth of mold, mildew, and other microbes. Will not rust when used in damp or humid areas. 24X105 has a single left-hinge door. 24X107 has a roll-up door for tight spaces. 24X106 has 2 center-closing doors.

Mobile Medical Supply Cabinets

- Taupe

Cabinets have 4 swivel casters enabling them to be easily rolled to any location needed. Sturdy polymer construction with an antimicrobial treatment to prevent the growth of mold, mildew, and other microbes.

Catheter cabinets use hooks, slides, and shelves to hold catheters and keep them organized. Slides extend to allow catheters to be easily viewed for inventory control. Doors have keyed locks.

Hanging Hook Cabinets

- Assembled
- Gray with baked enamel finish
- Padlock hasp
- Solid doors
- 6"H leg base

Super-duty cabinets are constructed of 12-ga. steel and have interior hooks or pegs to hang hard hats, tools, and other equipment. Commonly used for shared storage in shops, garages, and other industrial areas.

Adjustable hook cabinet comes with 52 hooks on the back wall and door interiors. Hooks can be moved as needed. Each hook can hold up to 30 lbs.

Non-adjustable peg cabinet has 24 welded hanger pegs on the back wall. Each peg can hold up to 26 lbs.

Pegboard Panels & Strips

These pegboard panels have round or square holes and mount to a wall. They accept a wide range of hooks, bins, shelves, toolholders, and other accessories. Square holes and can typically support more weight than round-hole pegboard panels. Narrow pegboard strips mount to a wall and take up less space than pegboard panels. Multiple panels can be mounted next to each other to expand the storage area. Kits include an assortment of hooks and other accessories that mount to the pegboard panels to create a storage system.

Round-Hole Pegboard Swing Panels

- Hold a large amount of tools and parts
- Mount multiple panels side-by-side for easy access
- Designed to pivot at the wall mounting

Swing panels mount to wall brackets that allow the panels to swing open and closed. Items can be stored and accessed on both sides of the panels, which allows these pegboards to hold more items than standard wall-mount pegboard panels. The swing panels have round holes that accept hooks, toolholders, and other accessories. Multiple panels can be mounted next to each other to expand the storage area. Include wall mounting bracket and hardware.

Square-Hole Pegboard Floor Racks

TRESTON

Blue panels are held in a freestanding frame and do not need to be mounted to a wall. Items can be stored and accessed on both sides of the panels, which allows these pegboard racks to hold more items than standard wall-mount pegboard panels. Square-hole pegboard can typically support more weight than round-hole pegboard. These racks accept a wide range of hooks, bins, shelves, toolholders, and other accessories that are compatible with square-hole pegboard.

A-Frame Mobile Pegboard Racks

A-frame mobile pegboard racks consist of pegboard panels in a freestanding A-shaped frame. Also known as pegboard trucks, they can be rolled for cleaning and repositioning. Items can be stored and accessed on both sides of the racks. These racks accept a wide range of hooks, bins, shelves, toolholders, and other accessories that are compatible with the shape of the holes on the pegboard.

Round Hole Pegboard Hook Assortment G0587

Pegboard Accessories

- Round and slotted accessories are for 1" hole spacing; square accessories are for 1½" hole spacing

These hooks, bins, and toolholders attach to pegboard and are used in various combinations to create pegboard storage systems for organizing and displaying small parts, tools, and merchandise. The accessories can be reconfigured or replaced as storage needs change.

Round-Hole Plastic Bin Kits and Shelf Tray—Yellow molded bins include mounting clips. Clips remain securely fastened to the board; bins are removable.

Slatwall Merchandiser Racks

These freestanding racks have slatwall on all sides and do not need to be mounted to a wall. Items can be stored and accessed on all sides of the racks, which allows for high-density display of merchandise in a compact footprint. These racks accept a wide range of hooks, shelves, and other accessories that are compatible with slatwall. They are used for organizing and displaying merchandise in retail stores. Constructed of medium-density fiberboard and melamine.

Mobile Wire Grid Tool-Storage Rack 48GE61

Wire Shelf 8YF09

WESTWARD® METRO®

Wire Grid Panels, Racks & Accessories

- Hooks and shelves sold separately for customization

Mobile wire grid tool-storage rack consists of a wire grid panel on a mobile base. The racks can roll when they need to be brought to different areas in a facility or moved for cleaning or repositioning. These racks are used in garages, tool cribs, nurseries, and garden centers for storing tools with long handles, such as shovels. Includes 10 movable hooks.

Wire grid panels mount to a wall for efficient use of vertical space in kitchens, laboratories, supply closets, janitor's closets, and storage rooms while keeping floor spaces clear. Multiple panels can be mounted next to each other to expand the storage area. Mounting brackets, hooks and shelves sold separately.

Hanging Bin Cabinets

Sturdy steel cabinets have louvered panels that hold multiple rows of plastic bins for separating and organizing parts, tools, and other items for quick access. Bins are removable making them easy to refill or carry to another location. Use for shared storage in garages, supply rooms, and warehouses.

Flush doors have louvered panels to hang bins on the door's interior side for additional storage.

Ventilated doors have metal-mesh panes that allow air to circulate and prevent buildup of moisture and fumes. Gives visibility to cabinet contents, to aid in loss prevention and inventory management.

Solid doors fully conceal contents and do not have louvered panels to hang bins.

Deep Box doors have extra depth for strength and rigidity. Louvered panels on the door allow hanging larger bins for additional storage.

Clearview doors have a see-through pane allowing full visibility to contents. Electronic keypad provides security and controls access.

Hanging Bin Cabinets with Shelves

- Gray cabinet color

Durable steel cabinets are available in a variety of configurations with louvered panels to hold polypropylene bins and horizontal adjustable shelves to hold larger items. Select cabinets offer shelves in the door as well as in the interior.

Cabinets with half-shelves have a vertically divided interior offering half bins and half shelves for convenient storage.

Hanging Bin Cabinets with Shelves & Drawers

- Gray cabinet color

Standard steel cabinets are available in a variety of configurations with louvered panels to hold rows of polypropylene bins, drawers to keep loose items contained, and adjustable horizontal shelves to provide flat storage for larger items.

Corrosion-resistant cabinet is stainless steel to resist rusting in damp or humid environments.

Hanging Bin Cabinets with Pegboards

- Gray cabinet color
- Two interior shelves

Steel cabinets have louvered panels that hold rows of plastic bins for storing and organizing loose parts and items. Adjustable shelves provide flat storage for larger items. Upper back panel has pegboard that accepts hooks and other compatible accessories to create custom storage for tools and other items.

Mobile Hanging Bin Cabinets

- Units with shelves have 2 full-width shelves
- Gray cabinet color

Sturdy steel cabinets are mounted on four 6" casters so they can easily be moved from one location to another. Convenient side handle helps when pushing or pulling the unit. Cabinet interiors are available without shelves to accommodate bins only or with shelves for a combination of bins and shelves for storing small and large items. Doors do not accommodate hanging bins. Ideal when parts are used in multiple areas of a facility, or when floor plans change frequently.

Stationary Customizable Bin Cabinets

- Bins sold separately for a customized cabinet

Rugged steel cabinets without bins allow user to configure cabinet to meet specific needs. Units are available with louvered panels to accommodate bins only or with a combination of louvered panels to accommodate bins as well as shelves for flexible storage options.

Flush doors have louvered panels to hang bins on the door's interior side for additional storage.

Deep Box doors have extra depth for strength and rigidity. Louvered panels on the door allow hanging larger bins for additional storage.

QUANTUM™ STORAGE SYSTEMS AKRO-MILS

Stationary Bin Shelving

- Gray steel frames

Metal units have multiple shelves that hold rows of plastic bins for separating and organizing parts, tools, and other items for quick access. Use for sorting and storing items in garages, supply rooms, and warehouses.

Closed-Front Drawer Bins—Drawer-style bins have four walls of equal height and smoothly slide in and out between shelves. Keep items securely contained and dust free. Shelving units have side panels to keep out dust and dirt.

Open-Front Hang and Stack Bins—Open hopper front with a lip. Back and side grips for easy handling. Can hang from rails or louvered panels and are stackable.

Open-Front Indicator Bins—Two-color bins have one brightly colored side so bins can be rotated to see at a glance when items have low inventory and need to be restocked.

Open-Front Shelf Bins—Raised front opening keeps items contained. Stackable.

Open-Front Stacking Bins—Heavy-duty bins with reinforced walls can hold large or heavy parts. Open hopper front.

Without Bins—Order bins separately to select the desired color, style, and quantity, starting on page 1291.

1-Sided with Drawer Bins
F1586

Stationary Pick Racks

- 36"W
- Gray steel frames

Sturdy freestanding racks have sloped shelving to hold multiple rows of plastic bins. Angled shelves keep items at the front of the bin for clear visibility and easy access to contents.

1-Sided—Units can stand flat against a wall to save space.

2-Sided—Units have shelves on both sides for more storage capacity and to allow access to items from either side.

Drawer Bins—Drawer-style bins with four walls of equal height to keep items securely contained. Drawers can be easily removed to refill or carry to another location.

Shelf Bins—Raised front opening keeps items contained while allowing easy access. Stackable.

Without Bins—Order bins separately to select the desired color, style, and quantity of compatible bins for specific applications.

Mobile Pick Racks

- 36"W
- Gray steel frames

Racks are mounted on four casters so they can be easily moved from one location to another. Ideal when items are used in multiple areas of a facility or floor plans change frequently. Racks are 2-sided with shelves on both sides to allow access to items from either side.

Drawer Bins—Drawer-style bins have four walls of equal height to keep items securely contained. Drawers can be easily removed to refill or carry to another location.

Shelf Bins—Raised front opening keeps items contained while allowing easy access. Stackable.

Stationary Bin Rail Racks

- Gray steel frames

Freestanding frames have horizontal steel rails for hanging rows of compatible bins to store and organize small parts and items for easy access. Rail racks can accommodate bins of different depths and sizes on each rail offering flexibility as storage needs change.

1-Sided—Units can stand flat against a wall to save space.

2-Sided—Bins can hang on both sides of rail for more storage capacity and to allow access to items from either side.

Without Bins—Order bins separately to select the desired color, style, and quantity of compatible bins for specific applications.

Stationary Wire Bin Shelving

- 74"H
- Steel frames with chrome finish

Steel wire shelving allows air, liquids, dust, and debris to pass through for ventilation and to keep shelves clean. Freestanding units hold multiple rows of bins to store tools, parts, and supplies. Efficiently utilize vertical space in supply rooms, stock rooms, and other storage areas.

Open-Front Giant Hopper Bins—Heavy-duty bins are made to hold large, bulky, or heavyweight items and tools. Open hopper front for easy access to contents.

Open-Front Hang and Stack Bins—Open hopper front with a lip. Back and side grips for easy handling. Can hang from rails or louvered panels and are stackable.

Open-Front Indicator Bins—Two-color bins have one brightly colored side so bins can be rotated to see at a glance when items have low inventory and need to be restocked.

Open-Front Shelf Bins—Raised front opening keeps items contained. Stackable.

Mobile Wire Bin Shelving

- 6 two-sided shelves
- Steel frame with chrome finish

Steel wire shelving unit is mounted on four 5" swivel casters so it can be easily moved from one location to another. Ideal when items are used in multiple areas of a facility or floor plans change frequently. 2-sided open frame allows bins to be accessed from either side. Includes open front plastic bins.

Revolving Storage Bins

- Shelves rotate independently, even when fully loaded
- Gray powder-coated finish
- Easy to assemble

Rotating steel units offer more accessibility and visibility to contents than standard shelving units. Ideal for maximizing storage in tight spaces, while maintaining full access to items.

Sectional Stacking Bin Units

Heavy-gauge welded steel units have rows of bin compartments stacked vertically. Commonly used to store and organize parts and hardware in industrial facilities. Units have high weight capacities for heavy parts, tools, and equipment.

Standard Base— Freestanding units have a closed base to prevent dust or dirt from accumulating underneath.

Pallet Base—Units have fork pockets that allow them to be lifted with a forklift or pallet jack and moved without emptying the bins.

Caster Base—Units are mounted on 4 casters and can roll to any location needed. Ideal when parts are used in mulitple areas of a facility.

Selecting Storage Bins

BIN TYPES

Hanging—A lip on the back of the bin allows it to hang from a rack, rail, or panel.

Stacking—Bins may be placed on top of one another to save space and create vertical storage.

Cross-Stacking (pg. 1292)—Compatible-sized bins can be stacked vertically or sideways.

Nesting (pg. 1293)—When empty, bins slide inside each other to save space.

Shelf (pg. 1293)—Bins have open tops and hopper fronts. Compatible with shelving and pick rack systems.

Indicator (pg. 1295)—Bins are two different colors with hopper openings at each end. Bins can be rotated and used to identify low inventory or stock levels.

Drawer (pg. 1295)—Bins are equal height on all 4 sides with an open top. Keep items contained and slide easily in and out of shelving units or pick racks.

Hopper Front (pg. 1296)—The most common type of bin with a partially open front that provides easy access to contents.

Tip-Out (pg. 1297)—Bins fit inside a frame and tilt forward for access to contents then tilt back inside frame when not in use.

BIN MATERIAL

Plastic—Can be constructed of a variety of man-made polymers and resins. Provide water, chemical, and rust resistance.

Wire Mesh (pg. 1292)—Allows air, liquid, dust, and dirt to pass through keeping the bin clean and dry. Offers instant visibility to contents.

Corrugated (pg. 1294)—Lightweight, inexpensive cardboard bins usually ship unassembled.

ESD (Electrostatic Discharge) Static-Control (pg. 1294)—Made with a conductive material that dissipates static energy and reduces the amount of electrostatic energy passed through the container to the items. Used for storing sensitive electrical equipment and components.

Recycled Plastic (pg. 1295)—Contain the minimum amount of post-consumer materials to qualify for green initiative applications, including reducing a business's carbon footprint or adapting to federal and state regulations.

Steel (pg. 1295)—Provides strength and rust resistance. Suited for use at high temperatures and in combustive environments.

QUANTUM™ STORAGE SYSTEMS

Colored Hanging & Stacking Bins

- Plastic construction

Use bins to create color-coded storage systems to separate and distinguish items housed in the same area, such as tools and parts in workshops, electrical and plumbing supplies in maintenance closets, and hazardous and nonhazardous materials in medical environments. Back has a lip for hanging on louvered panels or rail systems. Same size bins are stackable. Molded slots for ID labels (labels not included).

Optional dividers are black plastic. Fit front-to-back in bins to create extra compartments within the bin.

Heavy-Duty Wire-Mesh Hanging & Stacking Bins

- Steel wire mesh with chrome finish
- Hopper front

Bins are woven or welded from wire with an open mesh design that allows clear visibility of contents and lets air, liquids, and dust pass through. Commonly used to hold items that may leak or need to dry, like hoses, extension cords, and spray paint.

Optional dividers are open wire design with vertical wires to allow airflow between compartments.

PCA PACKAGING CORPORATION OF AMERICA

Cardboard Shelf Bins

- Open hopper front
- Cardboard bin dividers available separately

Lightweight, economical bins store nuts, washers, and other small parts or nonfragile items. Easy to disassemble and lay flat when not in use for shipping or storage. Clean, white surface can be written on, eliminating the need for labels.

ESD Static-Control Cardboard Shelf Bins

- Open hopper front
- Black color

Reduce the amount of electrostatic energy passed through the bin to the items inside. Use to handle, transport, and store static-sensitive components and materials, such as computer chips, transistors, and light-emitting diodes (LED). Lightweight, reusable, easy to disassemble and lay flat when not in use. Black rectangular cardboard lids are also ESD static-control.

QUANTUM™ STORAGE SYSTEMS

ESD Static-Control Plastic Shelf Bins

- Open hopper front
- Black color

Reduce the amount of electrostatic energy passed through the bin to the items inside. Made with a conductive material that dissipates static energy. Ideal for handling, transporting, and storing static-sensitive parts and materials, such as computer chips, transistors, light-emitting diodes (LED), and electronic components.

Optional dividers are also made to protect sensitive electronic components. Fit side-to-side in bins to create extra compartments within the bin.

QUANTUM™ STORAGE SYSTEMS

Recycled Plastic Shelf Bins

- 100% post-consumer recycled content
- Black color
- Include molded-in label holders
- Optional dividers sold separately in packs of 50 only

Qualify for green initiative applications, including reducing a business's carbon footprint or adapting to federal and state regulations, with the minimum amount of post-consumer materials.

Optional dividers are not recycled plastic.

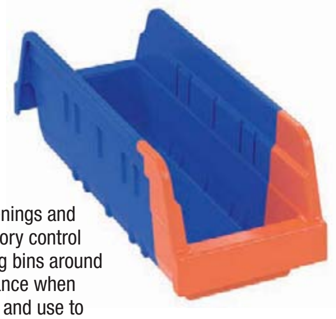
AKRO-MILS A Myers Industries Company

Replenishment Indicator Bins

H8694



- Sturdy plastic construction
- Include molded-in label holders

Front and back sides of bins have hopper openings and are different colors. Commonly used in inventory control systems to identify low stock levels by flipping bins around to reveal the secondary color and see at a glance when restocking is needed. Order optional dividers and use to designate normal and low stocking levels.

Metal Drawer Bins

- Durable steel construction
- Include dividers, additional dividers available as listed

Bins have solid bodies, open tops, and front handles that provide a grip to remove or insert them in compatible bin shelving units and pick racks. Extended vertical tab on the back side catches on a lip on the shelving unit to prevent it from sliding out. Used to organize and store small-to-medium-sized items such as hardware, replacement parts, and tools. Suitable for high temperature and combustive environments, such as welding, automotive, and machine shops.

Clearview Hopper Bins

QUANTUM™ STORAGE SYSTEMS — AKRO-MILS® A Myers Industries Company

- Stackable

Large sturdy bulk bins can store or transport heavy, odd-shaped, and surplus items. See-through sides give full visibility to contents. Open hopper fronts provide quick access, built-in side grips for carrying, and extra-wide sidewalls for stacking.

Clearview bins are helpful in applications where quick identification of contents is needed, such as healthcare supply closets, manufacturing facilities, and workshops.

Rolling bins have casters making it easy to move large, bulky items.

QUANTUM™ STORAGE SYSTEMS   AKRO-MILS

Tip-Out Bins

- Stackable

Clear plastic bins tilt forward for access to contents and tilt back inside frame when not in use. Allow full visibility to contents while keeping items shielded from dust and debris. Order individual bins, or a horizontal plastic frame containing multiple bins

Quantum bins are freestanding or wall-mount. **Akro-Mils** bins can be mounted on a frame, panel, rail, or wall.

Replacement bins can be ordered to replace broken or damaged bins.

Straight Wall Containers

- Stackable
- Plastic construction

Square or rectangular containers have non-tapered walls and can accommodate larger items for storage and transport. Sturdy rims enable stacking and containers fit trucks, pallets, and dollies for moving or storage.

Fully Vented—Open mesh sides and bottoms for storing and transporting items that produce condensation or need airflow. Built-in handles. Ideal for transporting bottles, staging food products in refrigerated areas, and storing items outside.

Vented Wall—Open mesh sides with a solid bottom. Used to store and transport items that produce condensation or need ventilation. Built-in handles.

Solid—Smooth, strong walls and bottoms. Easy to clean and help conceal contents from view.

Stacking & Nesting Totes

- Save space when not in use
- Lids ordered separately

Sturdy plastic totes have sidewalls that angle outward from the base up so that same-sized totes can fit within each other when empty. Wide-rim ledges enable totes to stack on top of one another. Use for medium to long-term storage, shipping products, and assembly manufacturing applications.

Cross-stacking totes have indented sidewall rims that allow sideways stacking of compatible totes.

Standard Divider Boxes & Accessories

J4496

- Black dividers and clear lids
- Dividers and lids are ordered separately

Plastic boxes separate and organize small items within one bin. Boxes have interior grooves that accommodate dividers to make custom-sized compartments within the box. Stackable boxes can fit on racks and shelving. Commonly used in health-care, manufacturing, and distribution industries.

ESD Static-Control Divider & Storage Boxes

- Black color

Separate, organize, and store sensitive electrical equipment like computer chips, transistors, and light-emitting diodes (LED). Made of conductive plastic or cardboard materials that dissipate static energy and are ideal for protecting sensitive electronic parts and components in transport and storage.

Divider boxes— Slots along the interior walls accommodate dividers and create compartments to organize small parts within one box. Plastic boxes do not include dividers. Cardboard boxes include dividers.

Storage boxes—Cardboard boxes have open interior compartments and can hold large or odd-shaped items. Side handles make them easy to carry.

High-Temperature Process Totes

- Fiberglass reinforced composite construction
- Temperature range: -60°F to 250°F
- Stackable

Lightweight composite material is resistant to chemicals, rust, corrosion, and extremely high temperatures. Also resists most cutting oils, detergents, mild acids, and alkaline solutions. Can be used to house hot products, allowing them to cool down after they come off a production line, including metal parts, plastics, and glass. Compatible lids are ordered separately.

Rolling Trunk 12A006

Rolling Trunk 1NTK5

Rolling Trunk F1331

PELICAN™ J. Terence Thompson suncast PLANO

Storage Trunks

Heavy-duty reinforced exteriors withstand impact and harsh weather conditions. Large capacities accommodate big or bulky items and protect them during transport and storage. Side handles for lifting and can accommodate padlock for security (padlock not included). All trunks have side hinged lids, except Plano Molding trunks have removable lids. Lids attach securely to hold contents when transporting valuable stage equipment, power tools, outdoor gear, or tradeshow materials.

Rolling trunks have wheels for mobility. Pelican, J. Terence Thompson and Suncast trunks have 2 wheels to lift at one end and pull at an angled position. Myton Industries trunks have 4 wheels to roll across flat surfaces.

Non-Collapsible Plastic Bulk Containers

- 4-way fork entry, except J0555, 55AA15 and 55AA16 are 2-way fork entry
- Stackable

Heavy-duty containers are suitable for storing and transporting heavy or large quantities of items. Can be securely stacked without damaging contents. Drop doors allow easy access to contents.

Decade Products— Impact-resistant HDPE containers are corrosion and UV resistant, reusable, and recyclable. Can be safely stacked with extra heavy loads. Runners add strength and help provide more stable stacking.

ORBIS—Heavy-duty molded polyethylene containers have an easy-to-clean smooth interior.

Buckhorn—Designed for heavy-duty applications in agricultural, manufacturing, and industrial settings.

Collapsible Wire Bulk Containers

- 4-way fork entry
- 1 drop door

Hold items that may leak, need to dry, or can't be stored in closed containers. Open steel wire mesh design allows for clear visibility to contents and lets air and liquids pass through. Fold down and can be stacked when not in use to save space. Commonly used in shipping, manufacturing, and warehouses.

Mobile containers are mounted on 4 casters, 2 rigid and 2 swivel, to easily move container to any location in a facility.

STEEL KING
BUILT TO DELIVER

Solid Steel Bulk Containers

- 4-way fork entry
- 4000-lb load capacity
- 4000-lb stacking capacity
- Green enamel finish

Built to withstand the weight and potential damage from heavy loads. Commonly used in warehouses, manufacturing, and machine shops to store and transport heavy items like metal scraps, machine parts, and maintenance equipment.

2MVU5 and 4TJ24 are collapsible with sides that easily fold down for storage and slide up and lock in place when needed. 2MVU5 has solid steel sides and bottom. 4TJ24 has wire mesh sides and bottom for ventilation.

4TJ19 through 4TJ22 have a wide adjustable side door that opens to a tray position for easy access to contents.

4TJ25 and 4TJ26 have rounded corners and steel stacking legs.

Suitcase-Style Equipment Cases

PELICAN™ plasticase NANUK™ PROFESSIONAL PROTECTIVE CASES

Protect valuable instruments, tools, and equipment from impact, dust, and liquids. Side-hinged opening and carrying handles make cases easy to load and transport.

Cases with wheels have handles for pulling, making it easier to move heavy items.

Order cases with foam to cushion and minimize movement of items in transport.

Heavy-Duty—Pelican Storm Series cases are constructed of strong HPX resin and withstand harsh conditions. Press and Pull latches lock automatically, but open with a light touch. Waterproof and crushproof with double-layered, soft-grip handles.

Lightweight—Pelican Air Series cases are made of extra light HPX polymer and are extremely water resistant. Automatic pressure equalization valve balances interior air pressure and keeps water out. Fold-down overmolded handles and stainless steel padlock protectors.

Standard—**Pelican** Protector Series cases are injection molded making them strong, yet lightweight. Automatic pressure equalization valve balances interior air pressure and keeps water out - ideal for flying or using at high altitudes. **Nanuk** cases are made with a tough, waterproof resin shell and have PowerClaw latches to keep case securely closed. Soft grip ergonomic handles.

WESTWARD STANLEY

Storage Trunks

Large capacities accommodate heavy tools, gear, and equipment and protect them during storage or transport.

Westward trunks are aluminum construction with steel hinges. Front latches and side handles.

Stanley trunks are plastic with side latches to secure lids. 2 wheels and an extendable handle make them easy to pull from one location to another.

PELICAN™ SKB CASES plasticase NANUK™ PROFESSIONAL PROTECTIVE CASES

Protective Transport Cases

- Waterproof
- Impact resistant
- Folding handle, except where noted

Rugged exteriors protect against drops and impacts, and big interiors hold large quantities of items or bulky, heavy equipment. Ideal for shipping on truck beds or in airplane cargo holds.

Cases with wheels have handles for pulling, making it easier to move heavy items.

Order cases with foam to cushion and minimize movement of items in transport.

Pelican—Protector Series cases are built to withstand extreme weather and harsh environments. Integrated pull handles and easy-to-open double throw latches. Automatic pressure equalization valve makes them ideal for use when flying.

SKB—Constructed of tough polypropylene resin with molded pull handles and trigger release latch system for secure lid closure.

Nanuk—Rugged resin shell with PowerClaw latches to keep lid securely closed.

Protective Long Cases

- Waterproof
- Impact resistant

Specifically designed to transport and store long items, such as instruments, cameras, guns, and other valuable gear. Integrated wheels and handle for pulling make it easier to move heavy items.

Order cases with foam to cushion and minimize movement of items in transport.

Lightweight—Constructed of super lightweight HPX polymer- ideal when items must be carried over long distances such as survey equipment or camera tripods. Press and Pull latches for secure closure.

Standard—**Pelican** Protector Series cases have an automatic pressure equalization valve - ideal when flying or using at high elevations. Injection-molded solid exterior walls and easy-to-open double throw latches. **SKB** cases are constructed of high-strength polypropylene resin. Trigger release latch system with cushion grip handles and automatic ambient pressure equalization valve.

Heavy-duty—Made from strong HPX resin to withstand drops and extreme weather conditions. Press and Pull latches automatically lock, but open with a light touch.

Butterfly Closure
418P75

Latch Closure
11Z988

Protective Rack-Mount Cases

Built-in interior racks absorb shock and vibration when transporting or storing sensitive equipment like servers, audiovisual gear, telecommunications hardware, and computers.

Butterfly closure—Ensures lids stay in place during transit. Cases are molded polyethylene with 2" deep front lid and 5" deep rear lid that open fully. Inner rack is built of aluminum alloy with carbon steel rack rails. 8 elastomeric isolators provide shock and vibration mitigation.

Latch closure—BlackBox series cases are constructed of blended resin with a light-duty steel frame and 8 cylindrical shock mounts that attach directly to the case and isolate equipment from vibration and impact forces.

Protective Tube Cases

- Lockable

Cylindrical cases have adjustable lengths to fit long items like fishing poles, posters, and banners. Prevent contents from bending or being crushed.

437U08 and 437U07 have a secure locking system, an easy-access lid and convenient carrying handle.

437U06 is a telescoping tube with a 3-tier design and a side handle.

437U05 has a 2-piece design with extra thick walls. Carrying handle and integrated wheels make transporting heavier items easy.

Small Parts Compartmented Boxes with Adjustable Dividers

- Translucent lids allow quick view of contents

Sturdy plastic boxes separate and store fasteners, fittings, connectors, and small parts keeping them dust and dirt free. Adustable dividers create custom-sized compartments within the box.

Cam Action—Tight-sealing latches provide a waterproof seal to protect contents.

Double Latch and Latch—Secure locking latches on front of box.

Mechanical—Sturdy latches are black color for quick identification and give a tight lid closure.

Snap—Push-to-close with snap shut latches.

Small Parts Storage Systems

30F061

437T77

19YZ99

Removable drawers and boxes offer flexibility and easy access for organizing and storing small items.

437T79 and 437T77 have enclosed storage space beneath the lid and a DuraView front cover for visibility to lower box contents. Include four removable StowAway utility boxes.

30F061 is a molded plastic cabinet with 3 large and 2 small pull-out trays. Clear door closes to keep trays in place.

19YZ99 and **4TJ28** are black polypropylene cabinets that hold 5 translucent drawers with dividers. Drawers slide easily in and out of cabinet. 19YZ99 has handles on drawers.

437T74 has enclosed storage space beneath the lid and molded-in storage compartments on the top for frequently used items. Includes four lower removable StowAway utility boxes with ProLatch closures. Clear DuraView front cover allows visibility to lower box contents.

3KN86 features a handy yellow polypropylene toolbox on top with no-spill latches, and a built-in handle. Includes (2) 3KN88 lower removable compartment boxes with built-in handles.

PORTA-KING BUILDING SYSTEMS

Modular In-Plant Offices

- Include wall panels, connecting posts, framing, and hardware
- Heavy-duty swing door with large vision lite
- Panels have Class A fire rating

Provide enclosed work areas inside warehouses, manufacturing plants, office buildings, and other large commercial and industrial facilities. Can be moved or reconfigured as floor plans change.

Note: PE-stamped drawings are not included; call 1-800-GRAINGER (472-4643). Before purchasing, consult your local building department for applicable code requirements. Consult an electrician for all electrical installations.

UNASSEMBLED

Easy to assemble and can be modified at any time. 2- and 3-wall units are designed to attach to existing walls; 4-wall units are freestanding. Outlets/switches include boxes and devices to install as needed in connecting posts; no wire included. Steel/Vinyl covered panels have steel facing on the exterior and vinyl facing on the interior. Vinyl covered panels feature vinyl facing on both sides.

Please choose: White, Gray

ASSEMBLED

Freestanding 4-wall units can be installed anywhere in large commercial or industrial facilities. Offices ship assembled and are prewired for easy set up. Can be lifted with a forklift or crane to position them in the facility.

ALL OFFICES INCLUDE:

- All wall panels, connecting posts, framing, and hardware
- Heavy-duty swing door with large vision lite that aesthetically matches posts, wall panels, and framing
- Panels have a Class A fire rating
- Outlets/switches include boxes and devices; install as needed in connecting posts; no wire included

Note: PE-stamped drawings are not included; call 1-800-GRAINGER (472-4643). Before purchasing, consult your local building department for applicable code requirements. Consult an electrician for all electrical installations.

Assembled Guard Buildings

Provide shelter and weather protection for security personnel or parking attendants who monitor access to the grounds of a facility. Buildings install on top of an existing concrete pad on the grounds of corporate campuses, government facilities, resorts, stadiums, and other secure areas. Buildings ship to site fully assembled and ready for immediate use. All units include a sliding door with window and hook bolt deadlock, a steel counter, one 115V and one 230V outlet, 12-circuit breaker box, and a fluorescent light fixture (except 3CHN5 and 3CHN6 have 2 fixtures).

Aluminum models have fully insulated R-10 walls and ceiling with a corrosion-resistant aluminum exterior.

Ballistic-rated steel models provide a bullet-resistant shelter for high-security settings such as government and military facilities. Feature ballistic-rated windows, doors, and exterior walls that are fully sheathed in ballistic-rated steel from the floor grade to the roof line. Fully insulated R-10 walls and R-19 ceiling with a white exterior. Conform to standards for UL752 Level 3 ballistic protection.

Mezzanine Platforms

- Capacity: 125 lb./sq.-ft. uniform load
- Gray polyurethane acrylic enamel finish

Platforms bolt together with compatible landings, stair units, and guardrails to create an extra vertical level in a facility and gain additional floor space for work or storage. Connecting hardware has been welded onto the platforms' structural beams and columns by the manufacturer. Commonly used for parts storage, work platforms, archive storage, or crossover platforms in warehouses and other large facilities.

Standard deck is ¾" OSB and is suitable for office and storage applications in light- to moderate-traffic areas where heavy equipment will not be traveling on the platforms.

Heavy Traffic deck is ¾" high-density fiberboard and offers extra durability and abrasion resistance. Suitable for high-traffic storage and work applications where pallet jacks and other heavy equipment will be frequently traveling on the platforms.

ACCESSORIES

Guardrail—Welded 1-pc. design with kick plate. Can be easily secured to mezzanine deck surface.

Corner Guardrail—Welded 2-pc. design with kick plate.

Swing Gate—Allows for easy relocation within the guardrail system. Includes latch.

Mezzanine Stair Unit (Without Landing)—Stairs are fully welded with closed risers and nonskid treads. Welded, 1-pc. unit has 34" high fully-welded handrail and 42" high guardrail. Meets IBC.

Mezzanine Landing—Freestanding unit can be installed anywhere on the mezzanine and easily moved to another location. Features steel diamond plate finished floor. Includes a guardrail on 2 sides and vertical corner posts that can accept either left- or right-handed stair placement.

Gable Roof Shed 32XT06

Cabinet Style Shed 2ERW6

Plastic Outdoor Storage Sheds

- All units are lockable; 32XT06 includes a lock

Protect tools and equipment from sun exposure and weather. Keep stored items organized and close to where they're used to free up indoor storage areas. Plastic construction will not rust or dent. All sheds have hinged double doors.

Gable Roof shed comes to a peak allowing snow and rain to run off. Provides extra storage capacity and headroom for storing large items such as ladders and lawnmowers.

Cabinet-Style units feature a flat roof and have a compact footprint. Vertical shed is suitable for storing tall items like rakes or brooms, and horizontal sheds are suitable for storing shorter items like pool equipment or garbage bins.

Single-Slope, Beige D7717

Gable Roof, Green D7721

Forkliftable w/ Flat Roof 2RMZ1

Steel Sheds

Strong, waterproof corrugated steel sheds are heavier and more durable than plastic sheds. Include hinged doors with locking latches. D7717, D7718, and D7721 have single doors; D7719, D7722 and D7723 have 2 doors.

Single-slope roof sheds have a compact footprint and allow rain and snow to run off.

Gable roof sheds provide extra storage capacity and headroom for large items like ladders and lawnmowers.

Forkliftable with flat roof sheds can be moved with a forklift after they are assembled, making them ideal for facilities with frequently changing storage needs. Use for large equipment in outdoor areas such as construction sites, military facilities, and maintenance operations. Include single swing-out door, built-in rain gutters, and a wooden floor to keep the shed's contents clean and dry.

80/20® Inc.
The Industrial Erector Set®

Profiles for T-Slot Framing

T-slot profiles can be machined to size and combined to build carts, shelving, displays, barriers, workstations, machine guards, enclosures, and other structures without requiring welding. Structures can be expanded or reconfigured as a facility's needs change. Aluminum profiles have recessed T-slots that accept compatible connectors and fasteners that can be moved anywhere along the slots for precise positioning. The connectors join profiles to create a frame for the structures, while the fasteners allow hinges, panels, handles, and other parts to be attached for customizing the structures. Aluminum extrusion alloy is lightweight, has a high strength-to-weight ratio, and a clear anodized matte finish which helps prevent oxidation and corrosion.

Lite and **Ultra-Lite** profiles have hollow corners making them more lightweight.

Black anodized finish profiles are a good choice for low reflective projects such as photo booths and military applications.

80/20® Inc.
The Industrial Erector Set®

Accessories for T-Slot Framing

For use in machine guards and enclosures, workstations, displays, carts, shelving, and more.

FASTENERS

Anchor Fasteners

Create strong, adjustable 90° connections.

Butt Hinges

Aluminum hinges have a clear iridite finish to match color of profiles. Use to mount lighter weight doors or two profiles side by side. Plastic hinges are black, fiberglass-reinforced nylon with stainless steel pin.

End Fasteners

Create concealed 90° connections between profiles.

Flat Joining Plates and Joining Plates

External fasteners ease connecting of profiles with no machining required.

Framing Extrusions

Provide a clean, flush connection and are typically used to reinforce a 90° connection.

Inside Corner Brackets

6105-T5 aluminum alloy with a clear anodized finish except for 30 Series 5JRT2, 5JRT3, and 5JRT4, which are die-cast aluminum with natural finish.

Pivot Nub Assemblies

Add axial motion to T-slot profiles: connect two same-series profiles in parallel configuration, allowing one profile 180° axial motion. 6105-T5 aluminum alloy.

Supports

6" supports made from T-slot profile add strength to 90° corners. Fasteners included.

T-Nut and Screw Kits

Fasteners to attach joining plates and brackets. Zinc-plated steel, except 2RCU9 is stainless steel.

FINISHING

End Caps

Black plastic caps for T-slot profile ends. Fasteners included.

L-Brake Handles

Ratcheting matte handle secures brake-ready linear slide bearing in a semipermanent position.

T-Slot Covers

Black cover snaps into profile slots to conceal wire and keep out dirt. Cut to size with scissors. 10 and 25 Series are PVC, the rest are polypropylene. 25 and 40 Series are 72½" long, and 30 and 45 Series are 78¾" long.

FLOOR-TO-FRAME

Base Plates

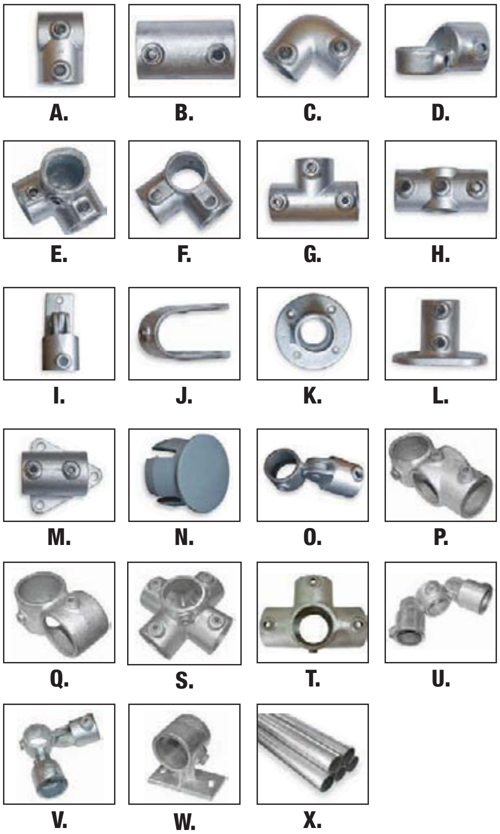
Threaded center hole in aluminum plate is used to mount leveling feet or casters. Bolt kits sold separately.

Deluxe Leveling Feet

Install in base plate or directly in the end of a tapped profile. Swivel up to 20° on uneven floors.

Swivel Casters with Brake

2RCV6 has ⅜-16 x 1.5" zinc-plated steel threaded stem with 2"-dia. rubber wheel. 5JRN0 has 4"-dia. polyurethane wheel.



Cast-Iron Pipe Fittings and Pipe

PIPE FITTINGS

Galvanized iron pipe fittings have a tensile strength of no more than 50,000 lb. Manufactured per international standards for durability and corrosion resistance. Feature quality set screws with antirust coating. Fittings build with no welding required; pipe cutters and a standard hex tool are usually the only tools needed. Constructed to ASTM Standards.

PIPE

Pipe is welded and hot-dipped galvanized for corrosion resistance. Tensile strength of 30,000 lb. Constructed to ASTM Standards.

Aluminum Slip-On Pipe Fittings and Pipe

Hollaender Your Handrail Source.

- Corrosion-resistant, nonmagnetic, nonsparking

Rugged fittings are as strong as malleable iron, but only ⅓ the weight. The 535 alloy aluminum fittings are suitable for use with aluminum pipe, black iron, galvanized carbon steel, or stainless steel with no electrolytic corrosion. You can easily assemble the railing and structure with just a standard hex key. Innovative set screw design can drastically reduce loosening caused by vibration, and they can resist pull-out and rotational slip. All pipe is anodized aluminum. OSHA, IBC, BOCA, SBC, and UBC Compliant.

Welded and Woven Wire Mesh Partition Selection Guide

WELDED WIRE MESH PARTITIONS

- Welded wire construction allows the installer to make modifications with relative ease
- Lightweight but strong
- Feature straight lines; steel wires are welded at each intersection, which allows it to maintain its shape when stressed
- Typically has larger openings than woven wire
- Less expensive than woven wire partitions

WOVEN WIRE MESH PARTITIONS

- Woven mesh often requires metal framing or edging to secure the partition panels
- Heavier product
- There are no easy footholds or handholds with woven wire panels
- Has a textured look with steel wires precision crimped and woven into a mesh, which locks them into place and provides extra strength

How To Order Wire Partitions

1. Sketch the enclosure and indicate the desired overall width, depth, and height on the sketch.

2. Add the location of the doors to the sketch and indicate the desired size and style of doors.

3. Determine the number and width of wall panels needed.

4. Add a corner post at each 90° corner.

5. Add line posts on both sides of each panel for straight runs of panels.

OR

Provide a drawing and forward all the information to your Grainger Account Manager and/or your local Grainger branch.

Complete Wire Security Cages

- Include a sliding door
- Keyed cylinder lock

Provide protected, enclosed areas for work or storage inside a facility. Restrict access to valuable tools, products, and equipment in stockrooms, warehouses, and other industrial facilities. Wire mesh panels allow light and air to pass through and give clear visibility to the contents of the cages. Include all necessary hardware for assembly.

Woven-wire cages assemble with bolts and nuts. Panels are made from 10-ga. steel wire that is crimped and woven into a 1½" diamond mesh. Mesh may unravel if cut.

Quick-assemble adaptable welded-wire cages assemble easily with clips and self-tapping screws. Panels are made of galvanized wires welded at each intersection to form a 1½" x 3" rectangular mesh, making them stronger and more durable than woven-wire panels. Panels can be cut to a smaller size if needed, or to accommodate pipes and other obstacles.

4-Wall Without Ceiling Panel 35W448

WireCrafters

Complete Wire Security Cages

- Include hinged or sliding door
- Keyed cylinder lock

Provide protected, enclosed areas for work or storage inside a facility. Restrict access to valuable tools, products, and equipment in stockrooms, warehouses, and other industrial facilities. Wire mesh panels allow light and air to pass through and give clear visibility to the contents of the cages. Installation and assembly is quick and easy with included hardware. For added security, bolts are only accessible from inside the cage.

Welded-wire panels are made from 10-ga.wire that is welded at each intersection to form a 2" x 2" square mesh. Cutouts can be made to accommodate pipes and other obstacles without affecting the mesh.

Woven-wire panels are made from 10-ga. wire that is crimped and woven into a 2" x 1" rectangular mesh, providing strength and security.

HUSKY RACK & WIRE™

Quick-Assemble Wire Partition Components

- Woven wire

Components swiftly assemble with clips and pound-in rivets to create secure, enclosed areas for work or storage. Clips and rivets are not accessible from outside the cage, to increase security and prevent tampering. Panels are made of 10-ga. steel wire that is crimped and woven into a diamond-shaped mesh with a 1½" x 1½" mesh opening. All doors include mounting hardware.

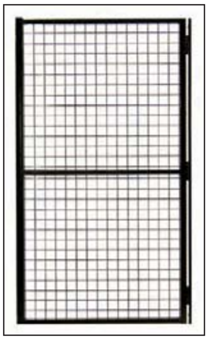
Machine Guard System



Hinged Door

- Includes installation hardware

Easy-to-assemble barriers protect workers from dangerous machinery, equipment, and robotic cells. 8-ga. panels are welded to a 2" x 2" wire grid pattern. Order panels separately. Use hook fasteners and drive pins (included) to fasten into a 16-ga. 2½" square steel post. Components come with welded footplates and anchor bolts. System installs 50% faster than most other wire guarding products and is easily modified to accommodate field obstructions.

Workbench Top Selection Guide

Steel stringer and fasteners included. Choose from 4 edges and 7 work surfaces.

Steel—Smooth surface will not crack or absorb oil. 12-ga. Gray powder-coated finish.

Shop—Versatile, oil- and moisture-resistant surface. Top and bottom are ⅜" super-hard custom board, sanded and sealed.

Plastic Laminate—Nonconductive surface, ideal for electronics assembly or repair and service of component parts. Melamine-laminated, gray scrim satin finish.

ESD Plastic Laminate—Protect circuit boards and other electronic components from electrostatic discharge. Built-in ground snap for easy connection. Resist stains, oils, and diluted chemicals. Almond finish.

Butcher Block Maple—Resist damage; provides maximum shock absorption. Top-quality, kiln-dried, hardwood maple laminated strips. Oil-rubbed natural finish.

Oak—Nonconductive, impact-resistant solid oak strips laminated together and sanded for a smooth, tough surface. Clear lacquer finish.

Phenolic—Nonconductive with higher resistance to chemicals, stains, abrasions, scratching, and humidity. Black finish.

Preconfigured Industrial Workbenches

Extra heavy-duty steel construction. All benches have legs with front and rear knockouts for 2" electrical boxes. 3" side and back stop keeps items from rolling off the workbench. Feature 14-ga. steel stringers with a deep profile. Medium-gray powder-coated finish. Steel tops have 2 intermediate reinforcement channels. Adjustable Leg workbenches adjust from 27⅞" to 35⅜" in 1½" increments.

Adjustable-Height Legs
1PA85

ACCESSORIES

Standard Shelf Risers—1½" back stop. Electrical risers are available to add optional electrical outlets.

Lower Shelf—Adds extra work space and features a 1½" protective back stop.

Side and Back Rail Kits—16"-ga. steel rails bolt to workbench top and can be used with other bench accessories. Easy to install with standard tools.

Stackable Drawer—Features adjustable divider, pencil tray, and adjustable ball bearing slides. Includes padlock hasp; optional cam lock 2ZV23 available separately.

Stackable Drawer Cam Lock—Compatible with stackable drawer 1PB13. Includes 2 keys.

Electric Wiring Kit—Kit 1PB78 comes 90% preassembled with 4 duplex receptacles, On/Off switch with pilot light, circuit breaker, and 8-ft. grounded cord and plug.

Mobile Caster Kit—2ZV22 can be used with 48", 60", and 72" Tennsco workbenches. 1000-lb. load rating. Recommend using a lower shelf for stability.

Preconfigured Industrial Workbenches

- Drawer capacity: 165 lb., based on evenly distributed loads
- 100% drawer extension
- Back and end stops extend 3" above work surface to retain small items
- Bright blue powder-coated finish

Designed to maximize storage in the work area, while heavy-duty, steel construction provides durability in tough environments. Pedestals have ergonomically designed drawer handles located at the top of the drawer and are flush with pedestal front when drawer is closed for added safety. Drawers include preinstalled partitions with dividers. Pedestals have overall dimensions of 22³⁄₁₆"W x 28½"D x 33½"H and come with a removable core lock for greater security and easy replacement. 2 keys included. Combination drawer/door pedestal features 1 drawer and hinged bottom door section with 1 fixed shelf. Drawer and door lock separately. 4 keys (keyed alike) included. Legs feature sturdy, 1-pc., all-welded construction with bottom hole for leveling glides (included). Feet have anchor holes for floor mounting. Models are also available with 13½"H x 10½"D steel riser shelf with 2"H back stop.

Stainless Steel Workbench 1NXY8

Pro-Line

Lab Workbenches

- 1000-lb. capacity, based on evenly distributed loads
- Light beige, powder-coated finish

Workbenches have a sturdy 4-leg design with 4" front, side, and back rails to support the work surface and allow operators to work on all 4 sides. Squared work surfaces allow units to be slid together with no gaps. Modular design allows optional accessories to easily bolt on. See Grainger.com® for available accessories.

Chem-Guard®—Black chemical-resistant work surface is 1.250" thick.

Stainless Steel—Work surface is 16-ga. with 0.125" radius edges.

Epoxy Resin—Benches are black with 1" eased edges.
